Natural Fictions:

Natural Fictions A. R. Braunmuller, 1992 *Natural Fictions* is a theatrical and historical study of the principal tragedies written by George Chapman during the first decade of King James I's reign in England. Each chapter considers the theatrical and literary qualities of the respective plays and examines the historical sources used by Chapman.

Pararealities: The Nature of Our Fictions and How We Know Them Floyd Merrell, 1983-01-01 The objective of this study is to inquire from a broad epistemological view into the underlying nature of fictions and above all to discover how it is possible to create and process them. In Chapter One I put forth four postulates in the form of thought experiments. In Chapter Two I turn attention to make believe imaginary and dream worlds and how they can be conceived and perceived only with respect to the real world. Chapter Three includes a discussion of the affinities and differences between one's tacit knowledge of certain aspects of the number system in arithmetic, an ordered series and the range of all possible fictional entities, an unordered network. In Chapter Four I establish more precisely the relations between one's real world and one's fictional worlds in light of the conclusions from Chapter Three. And in Chapter Five I attempt to construct a formal model with which to account for the construction of all possible fictional sentences.

David Hume's Political Economy Margaret Schabas, Carl Wennerlind, 2008 This collection of twelve new essays by distinguished scholars in the fields of history and the philosophy of economics is one of the first book-length studies of Hume's political economy.

The Nature of Fiction Gregory Currie, 1990-10-26 This important book provides a theory about the nature of fiction and about the relation between the author, the reader and the fictional text. The approach is philosophical; that is to say, the author offers an account of key concepts such as fictional truth, fictional characters and fiction itself. The book argues that the concept of fiction can be explained partly in terms of communicative intentions, partly in terms of a condition which excludes relations of counterfactual dependence between the world and the text. This communicative model is then applied to the following problems: how can something be true in the story without being explicitly stated in the text? In what ways does interpreting a fictional story depend upon grasping its author's intentions? Is there always a unique best interpretation of a fictional text? What is the correct semantics for fictional names? What is the nature of our emotional response to a fictional work? In answering these questions, the author explores the complex interaction between author, reader and text. This interaction requires the reader to construct a fictional author, a character in the story whose personality, beliefs and emotional states must be interpreted if the reader is to grasp the meaning of the work.

Founded in Fiction Thomas Koenigs, 2024-11-26 This monograph presents a new history of early American literature that traces the diverse forms of fiction circulating in the early United States, 1789-1861, and how they shaped the way Americans thought and argued about political and cultural issues of their age.

Eighteenth-century Fiction and the Reinvention of Wonder Sarah Tindal Kareem, 2014 A footprint materializes mysteriously on a deserted shore; a giant helmet falls from the sky; a traveler awakens to find his horse

dangling from a church steeple Eighteenth century British fiction brims with moments such as these in which the prosaic rubs up against the marvelous While it is a truism that the period s literature is distinguished by its realism and air of probability Eighteenth Century Fiction and the Reinvention of Wonder argues that wonder is integral to rather than antithetical to the developing techniques of novelistic fiction Positioning its reader on the cusp between recognition and estrangement between faith and doubt modern fiction hinges upon wonder Eighteenth Century Fiction and the Reinvention of Wonder s chapters unfold its new account of British fiction s rise through surprising new readings of classic early novels from Daniel Defoe s Robinson Crusoe to Jane Austen s Northanger Abbey as well as bringing to attention lesser known works most notably Rudolf Raspe s Baron Munchausen s Narrative of His Marvellous Travels In this bold new account the eighteenth century bears witness not to the world s disenchantment but rather to wonder s re location from the supernatural realm to the empirical world providing a re evaluation not only of how we look back at the Enlightenment but also of how we read today

Introduction to Nineteenth-Century French Literature Tim Farrant, 2013-11-20 Everyone knows something of nineteenth century France or do they Les Miserables The Lady of the Camelias and The Three Musketeers Balzac and Jules Verne live in the popular consciousness as enduring human documents and cultural icons Yet the French nineteenth century was even more dynamic than the stereotype suggests This exciting new introduction takes the literature of the period both as a window on past and present mindsets and as an object of fascination in its own right Beginning with history the century s biggest problem and potential it looks at narrative responses to historical political and social experience before devoting central chapters to poetry drama and novels all genres the century radically reinvented It then explores numerous modernities ways nineteenth century writing and mentalities look forward to our own before turning to marginalities subjects and voices the canon traditionally forgot No genre was left unchanged by the nineteenth century This book will help to discover them anew

Novel Machines Joseph Drury, 2017-11-10 Eighteenth century fiction is full of mechanical devices and contrivances Robinson Crusoe uses his gun and compass to master his island and its inhabitants Tristram Shandy s conception is interrupted by a question about a clock and he has his nose damaged at birth by a man midwife s forceps Ann Radcliffe s gothic heroines play musical instruments to soothe their troubled minds In Novel Machines however Joseph Drury argues that the most important machine in any eighteenth century novel is the narrative itself Like other kinds of machine a narrative is an artificial construction composed of different parts that combine to produce a sequence of causally linked actions Like other machines a narrative is designed to produce predictable effects and can therefore be put to certain uses Such affinities had been apparent to critics since Aristotle but they began to assume a particular urgency in the eighteenth century as authors sought to organize their narratives according to the new ideas about nature art and the human subject that emerged out of the Scientific Revolution Reading works by Eliza Haywood Henry Fielding Laurence Sterne and Ann Radcliffe Novel Machines tracks the consequences of the effort to transform the novel into

an Enlightenment machine On the one hand the rationalization of the novel's narrative machinery helped establish its legitimacy such that by the end of the century it could be celebrated as a modern invention that provided valuable philosophical knowledge about human nature On the other hand conceptualizing the novel as a machine opened up a new line of attack for the period's moralists whose polemics against the novel were often framed in the same terms used to reflect on the uses and effects of machines in other contexts Eighteenth century novelists responded by adapting the novel's narrative machinery devising in the process some of the period's most characteristic and influential formal innovations

Library of Congress Subject Headings Library of Congress, 2009 **Pluralism and the Personality of the State** David Runciman, 1997-06-05 Set against the broad context of philosophical arguments about group and state personality Pluralism and the Personality of the State tells for the first time the history of political pluralism The pluralists believed that the state was simply one group among many and could not therefore be sovereign They also believed that groups like individuals might have personalities of their own The book examines the philosophical background to political pluralist ideas with particular reference to the work of Thomas Hobbes and the German Otto von Guericke It also traces the development of pluralist thought before during and after the First World War Part Three returns to Hobbes in order to see what conclusions can be drawn about the nature of his Leviathan and the nature of the state as it exists today Understanding Behaviorism William M. Baum, 2016-12-28 Understanding Behaviorism is a classic textbook that explains the basis of behavior analysis and its application to human problems in a scholarly but accessible manner Now in its third edition the text has been substantially updated to include the latest developments over the last decade in behaviour analysis evolutionary theory and cultural evolution theory The only book available that explains behavior analysis and applies it to philosophical and practical problems written by one of today's best known and most highly respected behaviorists Explores ancient concepts such as purpose language knowledge and thought as well as applying behavioural thinking to contemporary social issues like freedom democracy and culture Part of the new evolutionary perspective for understanding individual behavior in general and culture in particular culminates with practical approaches to improving the lives of all humanity *Philosophy and Fiction* Schuy R. Weishaar, 2022-11-22 Fiction lies in order to tell the truth and seeks reality through shadows Philosophy attempts to dispel false realities it pursues clear understanding of things as they are While the relation of philosophy and fiction is perhaps paradoxical they implicate one another's picture of human experience This book uses fiction to help readers process philosophical themes and the philosophical reflection in turn helps clarify the fiction The study moves through roughly a hundred years of modern fiction from Washington Irving's *The Devil* and Tom Walker 1824 through James M Cain's *Double Indemnity* 1936 Several classic works of literary fiction are examined a few largely forgotten stories and several popular novels Reading fiction through the lens of philosophy helps readers perceive the complexity and richness of fiction reinvigorating the pursuit of wisdom that lies just beneath the surface of the words on the page *Scott's Shadow* Ian

Duncan,2016-08-02 Scott's Shadow is the first comprehensive account of the flowering of Scottish fiction between 1802 and 1832 when post Enlightenment Edinburgh rivaled London as a center for literary and cultural innovation Ian Duncan shows how Walter Scott became the central figure in these developments and how he helped redefine the novel as the principal modern genre for the representation of national historical life Duncan traces the rise of a cultural nationalist ideology and the ascendancy of Scott's Waverley novels in the years after Waterloo He argues that the key to Scott's achievement and its unprecedented impact was the actualization of a realist aesthetic of fiction one that offered a socializing model of the imagination as first theorized by Scottish philosopher and historian David Hume This aesthetic Duncan contends provides a powerful novelistic alternative to the Kantian Coleridgean account of the imagination that has been taken as normative for British Romanticism since the early twentieth century Duncan goes on to examine in detail how other Scottish writers inspired by Scott's innovations James Hogg and John Galt in particular produced in their own novels and tales rival accounts of regional national and imperial history Scott's Shadow illuminates a major but neglected episode of British Romanticism as well as a pivotal moment in the history and development of the novel

Human Nature: Fact and Fiction Robin Headlam Wells,Johnjoe McFadden,2006-05-30 **Truth, Rationality, Cognition, and Music** Kepa Korta,Jesús M.

Larrazabal,2004-03-31 The International Colloquium on Cognitive Science held in Donostia San Sebastián every two years since 1989 is one of the main regular meeting points for a diversity of researchers in this exciting multi disciplinary area of inquiry This volume brings together some of the most important contributions to that colloquium Besides the various interdisciplinary origins and standpoints of the participating researchers the volume also reflects the richness fruitfulness and great miscellany of research in cognitive science today In Truth Rationality Cognition and Music a wide variety of topics that are crucial to human beings are addressed from a cognitive perspective by some of the world's leading scientists Philosophers linguists logicians psychologists musicians and anyone interested in what cognitive science has to say about these topics should not miss it **Piers Plowman and the Books of Nature** Rebecca Ann Davis,2016 Piers Plowman and the Books of Nature explores the relationship of divine creativity poetry and ethics in William Langland's fourteenth century dream vision These concerns converge in the poem's rich vocabulary of kynde the familiar Middle English word for nature broadly construed But in a remarkable coinage Langland also uses kynde to name nature's creator who appears as a character in Piers Plowman The stakes of this representation could not be greater by depicting God as Kynde that is under the guise of creation itself Langland explores the capacity of nature and of language to bear the plenitude of the divine In doing so he advances a daring claim for the spiritual value of literary art including his own searching form of theological poetry This claim challenges recent critical attention to the poem's discourses of disability and failure and reveals the poem's place in a long and diverse tradition of medieval humanism that originates in the twelfth century and indeed points forward to celebrations of nature and natural capacity in later periods By contextualizing Langland's poetics of kynde within

contemporary literary philosophical legal and theological discourses Rebecca Davis offers a new literary history for *Piers Plowman* that opens up many of the poem's most perplexing interpretative problems Early Modern Metaphysical Literature Michael Morgan Holmes, 2001-01-19 *Early Modern Metaphysical Literature* illuminates now obscured aspects of cultural negotiation and denaturalization germane to numerous Metaphysical texts Examining poetry and prose by Donne Marvell Lanyer Crashaw and Edward Herbert this book challenges readers to recognize the provocative strangeness of these writings in their original contexts and today *Catalogue of Books in the Library* Boston Public Library. Jamaica Plain Branch, 1878 **Shakespeare the Historian** P. Pugliatti, 1995-12-18 In a major reassessment of Shakespeare's dominant dramatic genre Paola Pugliatti explores the historiographical quality of Shakespeare's histories Her main assumption is that Shakespeare's staging of English history helped to shape a new historiography In particular multi-perspectivism in the treatment of political issues produced a problem-oriented kind of historical perspective This exploited the opportunities offered by the theatrical medium and inaugurated a drama which portrayed history as a critical outlook on a world of problems and retrospective possibilities rather than as unconditional belief in or even worship of a world of facts

Victorian Detective Fiction and the Nature of Evidence L. Frank, 2003-07-02 Frank investigates an intertextual exchange between nineteenth-century historical disciplines philology cosmology geology archaeology and evolutionary biology and the detective fictions of Poe Dickens and Doyle In responding to the writings of figures like Lyell Darwin and E. B. Taylor detective fiction initiated a transition from scriptural literalism and a prevailing Natural Theology to a naturalistic secular worldview In the process detective fiction sceptically examined both the evidence such disciplines used and their narrative rendering of the world
