Conversation Analysis for Social Work Gerald de Montigny, 2018-10-11. What do the stories youth in state care tell about life in their family of origin? What stories do they tell us about coming into care, living in care and relationships with foster parents and social workers? This book presents the stories of youth in care, though not in splendid isolation but as interactively produced turn by turn in interviews and in conversations with other youth. By using tools from conversation analysis (CA), the author examines interviews with youth in care and social workers to unfold the essential and incorrigible reflexivity of story production. CA allows us to grasp the ways that a youth's story emerges turn by turn and is an artefact of a social relation between a youth and an interviewer. This text provides social work readers with a sense of art, artistry and ambiguity at the heart of social interaction. It will be required reading for all social work students and academics looking for a deeper, more philosophical understanding of the profession.

Key Concepts and Theory in Social Work David Hodgson, Lynelle Watts, 2017-06-09. Social work is a discipline committed to social justice and human rights and to improving the well-being of individuals, families, communities and societies. But the world is changing with environmental disasters, an increase in violent conflict and the aftermath of the Global Financial Crisis impacting negatively on human and ecological well-being. Social workers are often working at the forefront of these and other challenging situations and they must apply knowledge and skills to their practice in a thoughtful and ethical way. What kind of knowledge and skills will social workers need to succeed in this intellectually and emotionally demanding job? Broad-ranging in scope and depth, this highly readable text introduces readers to the key concepts in social work such as empathy, reflective practice and notions of risk, and provides both a focus on the theory and research literature that informs each one and an examination of how each will aid practitioners in their day-to-day work. With the help of engaging practice examples that contextualize the topics under discussion, the book also draws on ideas and literature from other disciplines including philosophy, sociology and psychology in order to promote the open

mindedness and depth of understanding required for practice with people from all walks of life An accessible text that brings all of the major social work concepts together in one place Key Concepts and Theory in Social Work is an essential book for students and practitioners alike Practising Critical Reflection to Develop Emancipatory Change Christine Morley,2016-04-08 Overwhelmingly critical practitioners working across a range of human service fields who are committed to emancipatory and progressive social change ideals report feeling powerless alienated from the means of change and hopeless about their capacities to make a difference in the lives of the individuals groups or communities with whom they work because of restrictive contexts that ultimately determine the nature and parameters of their work This ground breaking book addresses this dilemma by demonstrating how critical reflection as an educational tool enables practitioners to envision possibilities for change The legal system particularly in its response to sexual assault provides a perfect example of this type of context and this volume explores the work of sexual assault practitioners that are engaged in supporting victims survivors of sexual assault through the legal process By reshaping ideas that have previously been considered as predominantly theoretical and abstract Morley s work provides an innovative framework that enables social work and human services practitioners to find hope agency and practical strategies to work towards change despite operating in contexts that appear immutably oppressive Structural Social Work in Action Steven F.
