constitutes valid and valuable knowledge how we know and who gets to say The book argues that for OA to deliver its potential it first needs to be associated with epistemic openness a wider and more inclusive understanding of what constitutes valid and valuable knowledge It also needs to be accompanied by participatory openness enabling contributions to knowledge from more diverse communities Interacting with relevant theory and current practice the book discusses the challenges in implementing these different forms of openness the relationships between them and their limits Achieving Global Open Access is essential reading for academics and students engaged in the study of Library and Information Science Open Access and Publishing It will also be valuable and interesting to library and publishing professionals around the world

La Conversation Fracturée Clanton C.W. Dawson Jr., 2017-12-14 This project is a philosophical analysis of the dominant concepts of race that prevail within contemporary American society It is the claim of this book that four main concepts attempt to answer the question what is race The four concepts are racial essentialism race as a social construct with objective status racial nihilism and race as an existential phenomenological process Each concept fails however in providing the necessary and sufficient conditions for a satisfactory concept of race and thus the project calls for a new conceptual framework for answering the question what is race

Constructivist Psychotherapy Gabriele Chiari, Maria Laura Nuzzo, 2009-09-29 Psychotherapy has undergone major changes in recent years with a variety of new approaches including cognitive behavioural therapy joining the more traditional and widespread schools of thought These new approaches all share the epistemological assumption of constructivism which states that there are alternative ways of looking at events and that we interpret events according to how we see the world Constructivist Psychotherapy reviews the constructivist trends in psychotherapy which link these new approaches allowing the reader to enter an entirely new dialogue The book traces

constructivist thought elaborating on Kelly's personal construct theory and the implications for psychotherapeutic theory and practice. Areas of discussion include the therapist's understanding of the client's narrative, a constructivist understanding of the person, psychological constructivism, and constructivist trends in psychotherapy. Setting constructivist psychotherapy within its therapeutic, social, and philosophical context and using case studies throughout the book revisits Kellian ideas and theories, bringing them up to date to explore what it is to be a constructivist psychotherapist today. As such, this book will be of interest to all psychotherapists as well as anyone with an interest in the psychotherapeutic field. Ethics in Action AA.

VV., 2013-04-17T00:00:00+02:00 Introduction Erminio Gius Sabrina Cipolletta 1 The inescapability of ethics and the impossibility of anything goes: A constructivist model of ethical meaning-making Jonathan D Raskin Alanna E Debany 2 Presence in the health care relationship Sabrina Cipolletta 3 Ethics in psychoanalysis: From the classical model to the implication of moral pact Donatella Cavanna Patrizia Velotti 4 Diagnosing vigorexia: When normative ideology becomes value judgment Alessandro Salvini Elena Faccio 5 Dream enactment and violent behaviour during REM sleep: A new forensic and psychophysiological issue Carlo Cipolli Giuseppe Plazzi Giovanni Tuozi 6 Lie lie detection and the brain Giuseppe Sartori Sara Agosta Patrizia Pezzoli 7 Ethics in the field of law: Some reflections Andrea Zanotti 8 Between norms and psychology: The well-being of the person and the social community Patrizia Patrizi 9 The dynamics of power, authority, and freedom Giancarlo Trentini 10 Work, spirituality, and political action Cesare Kaneklin Authors *The Reality of Social Construction* Dave Elder-Vass, 2012-04-23 Social construction is a central metaphor in contemporary social science, yet it is used and understood in widely divergent and indeed conflicting ways by different thinkers. Most commonly, it is seen as radically opposed to realist social theory. Dave Elder-Vass argues that social scientists should be both realists and social constructionists, and that coherent versions of these ways of thinking are entirely compatible with each other. This book seeks to transform prevailing understandings of the relationship between realism and constructionism. It offers a thorough ontological analysis of the phenomena of language, discourse, culture, and knowledge, and shows how this justifies a realist version of social constructionism. In doing so, however, it also develops an analysis of these phenomena that is significant in its own right. Routledge Handbook of Adapted Physical Education Justin Haeghele, Samuel Hodge, Deborah
