Radical Political Economy Explorations In Alternative Economic Analysis:

Radical Political Economy Victor Lippit, 2015-03-04 Radical political economy is built upon the formal analysis of neoclassical economics and the tradition of Marxian radical analysis The essays presented in this book offer a representative sampling of the issues and methodologies involved in the study of radical political economy **Radical Political Economy: A Concise Introduction** Charles A. Barone, 2015-03-26 This straightforward introduction to radical political economy strikes a balance between breadth and depth and was written for the beginning student and others interested in a relatively short text on radical economics **Class Theory and History** Stephen A. Resnick, Richard D. Wolff, 2013-12-16 Class Theory and History takes an ambitious and ground breaking look at the entire history of the Soviet Union and presents a new kind of analysis of the history of the USSR examining its birth evolution and death in class terms Utilizing the class analytics they have developed over the last three decades resnick and Wolff formulate the most fully developed economic theory of communism now available and use that theory to answer the question did communism ever exist in the USSR and if so where why and for how long Their initial and controversial conclusion Soviet industry never established a communist class structure This conclusion then leads to the hypothesis that the USSR and private capitalism in the United States to discuss the future of private capitalism state capitalism and communism **Global Capital and Peripheral Labour** Ravi Raman, 2010-01-21 This book presents a historical account of plantations in India in the context of the modern world economy It brings history up to the present thereby showing how history can assist in explaining contemporary conditions and trends The author focuses on labour and economic development problems and uses the World Systems theory so as to demonstrate the practical utility of the theory and its limitations as a guide to historical research Based on extensive archival research the book interprets the dynamics of plantation capitalism by focusing on the work life and struggle of the dalits on plantations in colonial and post colonial South India as they evolved from the mid 19th century It argues that these elements of the plantation life world were fashioned by the specific characteristics of the workers location within the capitalist world economy the then prevailing local social structure and the scheme of disciplining to which the workers were subjected to Treating the relations among various social forces the planting communities the oppressed communities dalits in India the regional and national state and the Imperial regime this book fills a gap in academic literature on capitalism economic development and globalization The Elgar Companion to Social Economics, Second Edition John B. Davis, Wilfred Dolfsma, 2015-05-29 Social economics is a dynamic and growing field that emphasizes the key roles social values play in the economy and economic life This second edition of the Elgar Companion to Social Economics revises all chapters from the first edition and adds imo **The Restructuring of Capitalism in Our Time** William K. Tabb, 2012 Actions taken by the United States and other countries during the Great Recession focused on restoring the viability of major financial institutions while guaranteeing debt and stimulating growth Once the markets stabilized the United States enacted regulatory reforms

that ultimately left basic economic structures unchanged At the same time the political class pursued austerity measures to curb the growing national debt Drawing on the economic theories of Keynes and Minsky and applying them to the modern evolution of American banking and finance William K Tabb offers a chilling prediction about future crises and the structural factors inhibiting true reform Tabb follows the rise of banking practices and financial motives in America over the past thirty years and the simultaneous growth of a shadow industry of hedge funds private equity firms and financial innovations such as derivatives He marks the shift from an American economy based primarily on the production of goods and nonfinancial services to one characterized by financialization then shows how these developments perspectives and approaches not only contributed to the recent financial crisis but also prevented the enactment of effective regulatory reform He incisively analyzes the damage that increasing unsustainable debt and excessive risk taking has done to our financial system and expands his critique to a discussion of world systems and globalization Revealing the willful blind spots of mainstream finance theory Tabb moves beyond an economic model reliant on debt expansion and dangerous levels of leverage proposing instead a social structure of accumulation that places economic justice over profit and more practically institutes an inclusive sustainable model for growth

Andy Sumner,2018-07-03 Since the Second World War surprisingly few developing countries have experienced a truly sustained episode of economic and social convergence towards the structural characteristics of the advanced nations East Asia has exceeded most regions in its achievement of convergence and much has been written on comparative industrialization and development in North East Asia Less discussed is South East Asia and the surprising and inclusive transformation several of its countries has undergone Development and Distribution focuses on South East Asia and more specifically on Malaysia Indonesia and Thailand These three nations have all undergone a major transformation in a way never anticipated from being poor agrarian countries to middle income countries with developed industrial and manufacturing bases How did Malaysia Indonesia and Thailand achieve such a transformation and how did they achieve the transformation with a form of economic growth that was driven by structural transformation but that was inclusive Given that historically it has been thought that structural transformation tends to push up inequality whilst inclusive growth necessitates static or even falling inequality this last point is particularly salient to developing countries Understanding how the transformation was possible in a relatively small space of time the extent to which it was inclusive and the caveats and prospects for South East Asia is thus an area of enquiry significant to all developing countries as they seek economic and social transformation Green Business Nevin Cohen,2011-06-28 Annotation Presenting 150 signed entries this book provides an overview of key principles approaches strategies and tools businesses have used to reduce environmental impacts and contribute to sustainability **Handbook on Growth and Sustainability** Peter A. Victor,Brett

Dolter,2017-06-30 This Handbook assembles original contributions from influential authors such as Herman Daly Paul Ekins Marina Fischer Kowalski Jeroen van den Bergh William E Rees and Tim Jackson who have helped to define our understanding of growth and sustainability The Handbook also presents new contributions on topics such as degrowth the debt based financial system cultural change energy return on investment shorter working hours and employment and innovation and technology Explorations of these issues can deepen our understanding of whether growth is sustainable and in turn whether a move away from growth can be sustained With issues such as climate change looming large our understanding of growth and sustainability is critical This Handbook offers a broad range of perspectives that can help the reader to decide Growth Sustainability Both Or neither **Female Voices from the Worksite** Marquita R. Walker,2020-11-24 This collection

analyzes women's narratives on the workplace. These narratives speak to the daily struggles women face in the workforce such as inflexible and long work hours, masculine workplace cultures, employers' stereotypical attitudes, and the absence of work-life balance initiatives. Viewed from a sociological perspective, the authors emphasize the reoccurring themes of devaluation, exploitation, and dehumanization of female workers resulting from unconscious or implicit bias, which directly impacts women's quality of life.

Constructing Leadership 4.0 Richard Kelly, 2018-11-27 The Fourth Industrial Revolution signals a sea change in the way we lead our organisations. Moving away from relational leadership and horizontal organisationally led development, it is imperative that business leaders are able to adapt to more networked organisations and shift away from dated assumptions of positional power. *Constructing Leadership 4.0* breaks new ground by explaining the urgent challenges facing managers and business leaders. It will teach you how to approach leadership development as a system rather than a programme. Develop an organisational ecosystem to support leadership 4.0. Build collaborative networks. Cultivate a responsive mindset through sensemaking. Use non-classroom based learning methodologies for educating leaders. Rooted in leadership development methodology and underpinned by cutting edge research, this book calls for businesses to cultivate responsive leaders through a theory of connectivism and swarm intelligence that reflects the coming cybernetic revolution.

Marginality and Exclusion in Egypt Ray Bush, Habib Ayeub, 2012-06-14 What does it mean to be marginalized? Is it a passive condition that the disadvantaged simply have to endure? Or is it a manufactured label reproduced and by its nature transitory? In the wake of the new uprising in Egypt, this insightful collection explores issues of power, politics, and inequality in Egypt and the Middle East. It argues that the notion of marginality tends to mask the true power relations that perpetuate poverty and exclusion. It is these dynamic processes of political and economic transformation that need explanation. The book provides a revealing analysis of key areas of Egyptian political economy such as labour, urbanization, and the creation of slums, disability, refugees, street children, and agrarian livelihoods, reaching the impactful conclusion that marginalization does not mean total exclusion. What is marginalized can be called upon to play a dynamic part in the future, as is the case with the
