Radiocarbon Dating Second Edition:

Radiocarbon Dating, Second Edition R.E. Taylor, Ofer Bar-Yosef, 2014 This volume is a major revision and expansion of Taylor's seminal book *Radiocarbon Dating An Archaeological Perspective* again providing a benchmark for the method and critically reflecting on the data that underpins the chronologies used to understand the prehistoric archaeological record

Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book *Radiocarbon Dating An Archaeological Perspective* It covers the major advances and accomplishments of the ^{14}C method in archaeology and analyzes factors that affect the accuracy and precision of ^{14}C based age estimates In addition to reviewing the basic principles of the method it examines ^{14}C dating anomalies and means to resolve them and considers the critical application of ^{14}C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for ^{14}C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record

Nonmetals, Second Edition Monica Halka, Brian Nordstrom, 2019-12-01 Praise for the previous edition a solid addition to a high school and public library science collection Recommended Library Media Connection Materials that are poor conductors of electricity are generally considered nonmetals One important use of nonmetals is the ability to insulate against current flow The Earth's atmosphere is composed of nonmetallic elements but lightning can break down the electron bonds and allow huge voltages to make their way to the ground Water in its pure form is nonmetallic though it almost always contains impurities called electrolytes that allow for an electric field With an exploration of the benefits and challenges to society health and the environment *Nonmetals Second Edition* provides readers with new developments in the research of nonmetals including where they came from how they fit into our current technological society and where they may lead us Written in an easy to read format this newly updated full color resource discusses new developments and dilemmas past present and future uses of nonmetals in science and technology and much more *Nonmetals* explored in this title include hydrogen carbon nitrogen phosphorus oxygen sulfur and selenium

Chronology of Sea Water Boyd Ellertson Olson, 1967 This report is a summary of isotopic dating techniques applied to sea water Several of the naturally occurring isotopes have been investigated for use in determining the chronology of sea water Only one C^{14} has found widespread use for this purpose The mean time since equilibration of the deep and bottom water with the atmosphere is calculated from C^{14} measurements to be between about 1000 and 2000 years The corresponding apparent time beneath the surface layer is of the order of 500 years less with the youngest water in the Atlantic Ocean and the oldest in the Pacific Processes of equilibration and dissolution of carbon within the ocean must be understood better before such figures can be adequately interpreted Of the other natural isotopes tritium radium and to a limited extent silicon

32 have found application in the study of circulation and mixing processes in the ocean Radium shows particular promise for the study of diffusion rates near the bottom

Biology and Geology of Coral Reefs V4 O.A. Jones, 2012-12-02 Biology and Geology of Coral Reefs Volume IV Geology 2 covers the major advances made in the geological aspects of coral reef problems This book is composed of 10 chapters that summarize the types economics radiometric dating and geological features of coral reefs The introductory chapters present the types and distribution of coral reefs such as fringing barrier and Atoll reefs A chapter discusses the findings of the 1973 Royal Society and Queensland Universities Expedition to the northern part of the Great Barrier Reefs on the specialized Low Wooded Islands Another chapter deals with the interrelation of ecology and sedimentation in coral reef complexes and the Coral Sea Plateau The next part of the book discusses the techniques and results of radiometric dating of coral reefs and the coral reefs of the Solomon Islands The remaining chapters deal with the Great Barrier Reef Province and discuss the geology of the basement upon which the reefs rest is included The reefs are described from geological geophysical and hydrological viewpoints providing a complete bibliography on the reefs This volume will acquaint readers with some of the exciting developments in coral reef geology and will provide information that will enable them to assess the status of research in different fields

Radiocarbon and Climate Change Edward A.G. Schuur, Ellen R.M. Druffel, Susan E. Trumbore, 2016-05-17 This book is a useful guide for researchers in ecology and earth science interested in the use of accelerator mass spectrometry technology The development of research in radiocarbon measurements offers an opportunity to address the human impact on global carbon cycling and climate change Presenting radiocarbon theory history applications and analytical techniques in one volume builds a broad outline of the field of radiocarbon and its emergent role in defining changes in the global carbon cycle and links to climate change Each chapter presents both classic and cutting edge studies from different disciplines involving radiocarbon and carbon cycling The book also includes a chapter on the history and discovery of radiocarbon and advances in radiocarbon measurement techniques and radiocarbon theory Understanding human alteration of the global carbon cycle and the link between atmospheric carbon dioxide levels and climate remains one of the foremost environmental problems at the interface of ecology and earth system science Many people are familiar with the terms global warming and climate change but fewer are able to articulate the science that support these hypotheses This book addresses general questions such as what is the link between the carbon cycle and climate change what is the current evidence for the fate of carbon dioxide added by human activities to the atmosphere and what has caused past changes in atmospheric carbon dioxide How can the radiocarbon and stable isotopes of carbon combined with other tools be used for quantifying the human impact on the global carbon cycle

[Conservation Research in Libraries](#) David Howell, Ludo Snijders, 2020-06-08 Conservation research in libraries is a rapidly growing field This book places analysis within its context in conservation and provides examples of how this expensive resource can be used Through a series of case studies it describes major analytical procedures including visualization molecular elemental and separation techniques as well as chemical tests It is thus a suitable reference work for library conservators and curators Please note Despite careful production of our books sometimes mistakes happen Unfortunately the authorship for some chapters wasn't correct in the original publication Chapter 5 was written by Andrew Beeby and David Howell as co author chapter 6 by Kelly Domoney and David Howell as co author and chapter 9 is authored by Anita Quye This will be corrected We apologize for the mistake
