Ophiolites in Earth History Yildirim Dilek, Paul T. Robinson, 2003
The 32 papers in this volume examine the mode and nature of igneous, metamorphic, tectonic, sedimentological and biological processes associated with the evolution of oceanic crust in different tectonic settings in Earth history as revealed in various ophiolites and ophiolite belts around the world and the geodynamic significance of these ophiolites in the evolution of different orogenic systems. Divided into six thematic sections, the book presents a wealth of new data and syntheses from mainly Phanerozoic ophiolites around the world.

Micropalaeontology in Petroleum Exploration Robert Wynn Jones, 1996
There have been a number of papers marking the association between micropalaeontology and petroleum exploration and a small number of books containing contributions to the subject. However, there have been no previous books that provide a comprehensive and thematic treatment. This book attempts to redress that imbalance. The first part deals with pure micropalaeontology. Microfossil groups include calcareous, siliceous, phosphatic and organic-walled microfossils and calcareous nanofossils. The second part treats the principles and practice of applied micropalaeontology and sequence stratigraphy. Case histories of applications in a range of geographic, geologic and stratigraphic settings are given. The final chapter deals with applications outside petroleum exploration and contains sections on environmental monitoring, coal mining, mineral exploration and exploitation and engineering. The book is extensively illustrated and referenced and is an invaluable resource for both academic and commercial palaeontologists.
