Biologic Applications of Radiotracers Howard J. Glenn, 2019-08-14 First published in 1982 This present volume presents an excellent amount of animal Models in radiotracer investigations describes the animal radiopharmacology laboratory and discusses radiotracer distribution differences between species

Source Book of Educational Materials for Nuclear Medicine, 1981 *Crime Laboratory Digest*, 1995 **DNA Fingerprinting** Lorne T. Kirby, 1993-09-23 DNA fingerprinting is a revolutionary technique that enables scientists to match minute tissue samples and facilitates scientific studies on the composition reproduction and evolution of animal and plant populations As a tool for positive identification of criminals it plays a particularly important role in forensic science The first book to be published in the field DNA Fingerprinting is a practical guide to basic principles and laboratory methods as applied to a variety of fields including forensic analysis paternity testing medical diagnostics animal and plant sciences and wildlife poaching

Methods for General and Molecular Microbiology C. A. Reddy, Terry J. Beveridge, John A. Breznak, George Marzluf, 2007-08-17 A first source for traditional methods of microbiology as well as commonly used modern molecular microbiological methods Provides a comprehensive compendium of methods used in general and molecular microbiology Contains many new and expanded chapters including a section on the newly important field of community and genomic

analysis Provides step by step coverage of procedures with an extensive list of references to guide the user to the original literature for more complete descriptions Presents methods for bacteria archaea and for the first time a section on mycology Numerous schematics and illustrations both color and black and white help the reader to easily understand the topics presented

Biochemistry David E. Metzler, 2001-04-25 The most comprehensive textbook reference ever to cover the chemical basis of life the Green Bible of Biochemistry has been a well respected contribution to the field for more than twenty years The complex structures that make up cells are described in detail along with the forces that hold them together and the chemical reactions that allow for recognition signaling and movement There is ample information on the human body its genome and the action of muscles eyes and the brain The complete set deals with the natural world treating the metabolism of bacteria toxins antibiotics specialized compounds made by plants photosynthesis luminescence of fireflies among many other topics The most comprehensive biochemistry text reference available on the market Organized into two volumes comprising 32 chapters and containing the latest research in the field Biological content is emphasized for example macromolecular structures and enzyme action are discussed
