

Royal Aircraft Factory S.E.5

The S.E.5 was a fighter aircraft built by the Royal Aircraft Factory during WWI. The vast majority of the production was the S.E.5a version with the 200 hp engine. It was designed to use a conventional V8 engine instead of the more common rotary engines. It became a stable and successful fighter, with demand always exceeding supply.

The S.E.5a was armed with 1 x .23 mm Vickers machine gun and 1 x .77 mm Lewis machine gun.

This example is an S.E.5a of the 20th Aero Squadron US Air Service 1918.

Air Power Supremo William Pyke, 2022-04-13 Sir John Slessor was one of the twentieth century's most distinguished wartime commanders and incisive military thinkers and William Pyke's comprehensive new biography reveals how he earned this remarkable reputation Slessor a polio victim who always walked with a stick became a First World War pilot in the Sudan and on the Western Front and a squadron and wing commander in India between the wars When aerial warfare was still a new concept he was one of the first to develop practical tactics and strategies in its application In the Second World War as the Commander in Chief of Coastal Command during the Battle of the Atlantic and the RAF in the Mediterranean during the Italian and Balkan campaigns he made a remarkable contribution to the success of Allied air power Then after the war as a senior commander he established himself as one of the foremost experts on strategic bombing and nuclear deterrence That is why this insightful biography of a great British airman and his achievements is so timely and important as we enter a new era of strategic doubts and deterrence at the beginning of the twenty first century William Pyke follows each stage of Slessor's brilliant career as a pilot and commander in vivid detail In particular he concentrates on Slessor's writings from his treatise on the application of air power in support of land armies to his thinking on nuclear deterrence and Western strategy

The Royal Air Force: The Trenchard Years, 1918-1929 Ian M. Philpott, 2005-07-19 The inter

war years between 1918 and 1939 saw the newly created Royal Air Force fighting for its very existence politically being dispatched to the remotest corners of the British Empire and its Protectorates in various policing roles and then finally engaged in a headlong rush to modernize in the face of the new German Fascist regime that was threatening British and European freedom Yet this important period in RAF history and its effect on political and military rationale during the period has never been completely documented This exhaustive and comprehensive reference is the most detailed work to be published on the subject The author gives full information on the changing structure of the Force during the period squadron operations political machinations and their effects the airplanes and their equipment the personnel technical advances in navigation and breakthroughs achieved in engine performance The book is cross referenced throughout extremely well illustrated and contains an abundance of location maps and other diagrams This book will become a Bible for anyone interested in the history of the RAF This work has been reviewed by personnel at the RAF Historical Branch who praise it

Heroic Flights John Frayn Turner, 2003-12-19 A century after the Wright Brothers first took to the air the author records those moments of aviation history that stand out from all the others for their pioneering bravery or gallantry in the face of the enemy A fascinating potpourri embracing the whole story of aviation from those first faltering flights through the conquest of the world by flight the drama of war in the air right up to the present day and the four ill fated flights of September 11th 2001 Each story is a superb description of the great moments in the history of aviation A superb read for both the layman and aviation specialist alike

Bomber Command 1939-1940 Gordon Thorburn, 2013-09-16 For Bomber Command the term Phoney War never really meant much Five Blenheims of 107 Squadron were among the blood and bullets the day after war was declared and only one came back On 14 December 1939 in a disastrous raid on shipping 99 Squadron lost six Wellingtons with only three survivors out of thirty six crew Even worse in the biggest air battle so far 18 December Wilhelmshaven five Wellingtons of 9 Squadron went down four of 37 Squadron and two of 149 Squadron Bomber Command lost sixty eight aircraft and crews in action in the four war months of 1939 and a further seventy eight in accidents In the months up to the French surrender losses rose spectacularly as the Germans triumphed wherever they went In a few hours on 14 May resisting the Blitzkrieg forty seven Fairey Battles and Bristol Blenheims were shot from the sky Through the Scandinavian defence in France and Belgium at Dunkirk and at last over Germany for Bomber Command there was no Phoney War It was real war from the start

Fall of the Red Baron Leon Bennett, 2012-02-19 Fighter pilot Manfred von Richthofen the Red Baron lacked innate aerobatic ability As a tyro he attempted to solve this problem through denial going so far as to sneer at stunting as pointless Great War air combat experience proved quite the reverse and so we would anticipate a short and sad fighting life for the fellow Yet the Red Baron became the Great War's single greatest scorer as measured by total victories How did he do it This book is concerned with tactics especially those tactics used by the Red Baron and his opponents It offers the how and why of Great War aerial combat The author leans heavily on his expertise in engineering and aerodynamic techniques to explain this with his reasoning presented in a readable non mathematical style Absent are both the usual propaganda laced Air Service reports and psychobabble Offered instead is the logic behind Great War aerial combat i.e. those elements determining success or failure in the Red Baron's air war Gunnery experience led to the machine gun as the weapon best suited for aerial combat Joined with a suitable aircraft the extremely successful Fokker diving attack resulted In reaction effective defensive techniques arose using forms of shrewd tactical cooperation by two seater crews pilot and gunner These are detailed Numbers mattered establishing the level of assault firepower Tactics of machines flying together in formation are given as well as those of formation busters intent upon reversing the odds and turning large numbers into a disadvantage A pilot's nature and emotions had much to do with choosing between the options defining tactics What were the aces like How were tactics tailored to suit personality What traits made for the ability to grapple with a jammed machine gun A dozen high achievers are examined in terms of tactics and background In a fascinating study Leon Bennett covers all of these aspects of WWI aerial combat and more Similarly the author turns his attention to examining the cause of von Richthofen's death employing the tools of logic rather than merely accepting one of the many conflicting eyewitness reports as truth In doing so much testimony is exposed as unlikely The bullet scatter to be expected from ground anti aircraft fire matters greatly and is developed along with the odds against lone riflemen hoping to hit a fast moving low altitude target The most dangerous altitude for front line crossing is established The author concludes by rating the possibility of a rifleman downing the Red Baron as quite realistic certainly as likely as any of the more celebrated

possibilities This is an important book offering a groundbreaking account of WWI aerial tactics and a thorough examination of the final combat and death of the Red Baron Aeronautics, 1949 Churchill's Eagles Richard Mead, 2025-11-04 offers a critical perspective on how the socialization of RAF officers in public schools influenced the force's operational culture Mead provides compelling evidence that while the system produced leaders of character and discipline it could also stifle innovation with consequences that reverberated throughout the RAF's wartime efforts The Journal of the Air Force Historical Foundation The RAF did not come of age until the Second World War The role of its forerunners in the Great War the Royal Flying Corps and the Royal Naval Air Service although important was peripheral to that of the ground forces The founding father of the RAF Lord Trenchard was determined that it should become a fully fledged third service equal in status to the Royal Navy and British Army and this he succeeded in doing between the wars firstly by setting up the RAF College at Cranwell and Staff College at Andover and secondly by providing a cost effective policeman of the more rebellious parts of the British Empire By 1939 the RAF had grown substantially but of the three best aircraft of the coming War only the Supermarine Spitfire was in service as neither the Avro Lancaster nor the De Havilland Mosquito would be available until early 1942 Aircraft however were not enough It was the leaders of the RAF the subjects of this book who would take the battle to the enemy and who after six long years would prevail **The Sky With Diamonds** Malcolm Macdonald, 2013-10-10 It is the 1920s an age of innovation and daring in transportation both on the road and in the air At the forefront of motor car development is Somerville's to own a Somerville bodied Rolls Royce is every man's dream But when George Somerville has an accident that leaves him paralysed the future of the firm looks uncertain George has no sons old enough to manage the firm He does however have a wife Defying general skepticism and her own doubts Julia gradually takes control warding off takeover attempts with breathtaking skill and cunning In Eliot Baring an American employee and a brilliant airplane engineer she sees a new future for Somerville's and perhaps for herself Together they take Somerville's into the skies where competition is fierce and enemies common But the skies darken as fascism spreads across Europe and Julia's conscience becomes ever more important in Somerville's future Beset on all sides deserted by her colleagues and lovers her future looks bleak until help comes from the most unexpected quarter Lost Voices of The Royal Air Force Max Arthur, 2012-02-16 Bestselling author Max Arthur presents this moving collection of first hand accounts of life in the Royal Air Force from 1918 to the present day Lost Voices of the Royal Air Force records the role of the RAF in the events of World War II and particularly the Battle of Britain and the desert battles of North Africa and the events leading up to VE day It also reveals the crucial role of the RAF in the Falklands and in the Gulf War Through original interviews with air and ground crew the spirit and comradeship the stress courage isolation vulnerability and the wonder of the wartime flying experience is vividly explored **Reckless Fellows** Edward Bujak, 2015-09-25 The Royal Flying Corps later the Royal Air Force was formed in 1912 and went to war in 1914 where it played a vital role in reconnaissance supporting the British Expeditionary

Force as air cavalry and also in combat establishing air superiority over the Imperial German Air Force Edward Bujak here combines the history of the air war including details of strategy tactics technical issues and combat with a social and cultural history The RFC was originally dominated by the landed elite in Lloyd George s phrase from the stateliest houses in England and its pilots were regarded as knights of the air Harlaxton Manor in Lincolnshire seat of landed gentry became their major training base Bujak shows how within the circle of the RFC the class divide and unconscious superiority of Edwardian Britain disappeared absorbed by common purpose technical expertise and by an influx of pilots from Canada Australia New Zealand and South Africa He thus provides an original and unusual take on the air war in World War I combining military social and cultural history Aviation and Aeronautical Engineering ,1919 **Aerospace** ,1988 **Elephant Island and Beyond** John Thomson,2003 The aristocracy of Antarctic exploration does not include the name of Thomas Orde Lees He came away from Shackleton s 1914 expedition with the reputation of being the least popular and most criticised of the men involved in the Endurance adventure in the Weddell Sea Not only was he disliked simply for being himself but he was also expected to become the first victim of cannibalism if the 22 men of Elephant Island had run out of food Previous accounts of Shackleton s adventure have unfailingly mentioned that Orde Lees was unpopular Though they have plundered his excellent journal for much of the detail of life on board the Endurance on the pack ice and finally on Elephant Island the part he played in keeping the men alive has not been recognised His journal has surprisingly never been published and this book is a long overdue testament to a much misunderstood and probably unfairly maligned man After his rescue from Elephant Island Orde Lees campaigned vigorously for the use of parachutes in the newly formed Royal Air Force and he was publicly credited with being the primary advocate Many pilots owe their lives to his faith in this new invention He went on to perform more service for his country in Japan and spent the final period of his life in New Zealand **British Built Aircraft** Ron Smith,2002 First in a series of five volumes about British aircraft this book provides a complete record of aircraft construction in Greater London at famous sites such as Cricklewood Croydon Hanworth Hayes Hendon Heston Kingston upon Thames and Stag Lane The aim of the series is to record British aircraft manufacture in nearly all of its manifestations in the form of a regional survey of the United Kingdom The scope of this volume extends to all concerns within the Greater London area involved in the manufacture of complete aircraft since the very first aircraft were flown in Britain
