Rail Centres York:

Rail Centres, York K. Hoole, 1983 **Railway Centre York** David Mather, 2022-06-20 The ancient city of York has been closely associated with railways since their conception and promotion by the Railway King George Hudson Its impressive station and engine sheds have played host to the elite of East Coast Main Line traction as well as a wide variety of locals The major stabling point of York North shed coded 50A was home to a diverse collection of steam locomotives as well as welcoming visiting engines from the wider network As such it attracted interest from enthusiasts not only of steam power but later on as an important diesel depot finally closing but later to be reborn as the National Railway Museum Constructed in 1877 it was the largest railway station in the world Legendary expresses have called at the platforms under the imposing curved glass and iron roof now a Grade II listed building Today s flyers race between London and Edinburgh at speeds unheard of in steam days while cross country services also bring visitors keen to explore York s historic and cultural heritage Yet the sight and sound of steam traction is still a major attraction in this modern era with crowds flocking to see preserved locomotives at the head of the trains which regularly grace these famous tracks David Mather has brought together a collection of his images which represents York s railway heritage from its earliest days through to the present and which shows the city to be still justified in claiming the title Railway Centre The World's First Railway System Mark Casson, 2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other s territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography **Railway Towns** David Brandon, 2024-05-02 The railways changed the world They initiated a revolution in communications which continues to this day ever more profoundly influencing our lives They had an enormous

economic and social impact in Britain not least with its demography Before 1914 places on the railway system felt they were connected to the wider world Those left off the system often feared for their future It was never actually as simple as that Some places well served by railways prospered other did not Some with minimal or no railway connections managed to sustain themselves successfully Others became complex railway hubs perhaps with railway based engineering works extensive shunting yards and warehouses and a large requirement for labour Some companies built large numbers of dwellings for their workers and their families Sometimes they even built churches and parks for example Places of this character have often been described as railway towns but what is actually meant by this term In a pioneering attempt in book form to move towards an understanding of what constitutes a railway town the author considers a wide range of cities towns villages and other settlements and asks to what extent they owed their nineteenth and early twentieth century development to the railways This book should appeal to students of railway history British topography and the economic social and cultural impact of railways

The Railway King Robert Beaumont, 2016-11-10 George Hudson the eponymous Railway King started his career with a stroke of luck inheriting 27 000 a fortune in 1827 from a distant relative He invested successfully in the North Midland Railway then formed his own Midland Railway raising 5 million and bribing MPs along the way But from his glory in 1845 he fell into disgrace admitting corruption and selling land he did not own He was eventually imprisoned in York Castle and died a broken man in 1871 His story provides an excellent insight into nineteenth century politics and industrial progress full of moral dilemmas and a testimony to the growth of the railways in Britain a timely subject

The East Coast Main Line 1939-1959 (Volume 2)

Peter Tuffrey,B. W. L. Brooksbank,2022-07-02 The first detailed study of this huge mainline through its operational history Features extended commentaries from the authors rich in detail Superbly illustrated with black and white photographs many never seen before In this second and final volume the whole of the East Coast Main Line between King s Cross and Edinburgh Waverley stations is examined closely with a particular emphasis on the ways and structures the line stations connections yards and other physical features Interposed are accounts of the traffic at the principal stations including connecting and branch line services with observations on changes over the period 1939 to 1959 Some emphasis is placed on freight traffic on account of its importance and perhaps its relative unfamiliarity to the reader The lines stations and many other elements are described as they were in August 1939 but as some plans on which they are based are dated before the late 1930s there may be marginal differences from the precise layout in 1939
