Sensing Changes Joy Parr, 2010-07-01 Our bodies are archives of sensory knowledge that shape how we understand the world But if global environmental changes continue at their present unsettling pace how will we make sense of time and place when the air land and water around us are no longer familiar Joy Parr one of Canada's premier historians tackles this question by exploring situations in the recent past when state driven megaprojects such as chemical plants dams nuclear reactors transportation corridors and new regulatory regimes forced people to cope with radical transformations in their work and home environments In each case the familiar was transformed so thoroughly that residents no longer recognized where they lived or by implication who they were Sensing Changes and its associated website <http://megaprojects.uwo.ca> make a key contribution to environmental history and the emerging field of sensory history This study offers a timely prescient perspective on how humans make sense of the world in the face of rapid environmental change

The Oxford Handbook of Public History, 2017-09-20 The Oxford Handbook of Public History introduces the major debates within public history the methods and sources that comprise a public historian's tool kit and exemplary examples of practice It views public history as a dynamic process combining historical research and a wide range of work with and for the public informed by a conceptual context The editors acknowledge the imprecision bedeviling attempts to define public history and use this book as an opportunity to shape the field by taking a deliberately broad view They include professional historians who work outside the academy in a range of institutions and sites and those who are politically committed to communicating history to the wide range of audiences This volume provides the information and inspiration needed by a practitioner to succeed in the wide range of workplaces that characterizes public history today for university teachers of public history to assist their students and for working public historians to keep up to date with recent research This handbook locates public history as a professional practice within an intellectual framework that is increasingly transnational technological and democratic While the nation state remains the primary means of identification increased mobility and the digital revolution have occasioned a much broader outlook and awareness of the world beyond national borders It addresses squarely the tech savvy media literate citizens of the world the digital natives of the twenty first century

in a way that recognizes the revolution in shared authority that has swept museum work oral history and much of public history practice This volume also provides both currently practicing historians and those entering the field a map for understanding the historical landscape of the future not just to the historiographical debates of the academy but also the boom in commemoration and history outside the academy evident in many countries since the 1990s which now constitutes the historical culture in each country Public historians need to understand both contexts and to negotiate their implications for questions of historical authority and the public historian s work The boom in popular history is characterized by a significant increase in both making and consuming history in a range of historical activities such as genealogy family history and popular collecting cultural tourism historic sites and memorial museums increased memorialization both formal and informal from roadside memorials to state funded shrines and memorial Internet sites increased publication of historical novels biographies and movies and TV series set in the past Much of this as well as a vast array of new community cultural projects has been facilitated by the digital technologies that have increased the accessibility of historical information the democratization of practice and the demand for sharing authority To Think Like a Mountain Niels Sparre

Landscapes of Conflict William G. Robbins, 2009-11-23 Post World War II Oregon was a place of optimism and growth a spectacular natural region from ocean to high desert that seemingly provided opportunity in abundance With the passing of time however Oregon's citizens rural and urban would find themselves entangled in issues that they had little experience in resolving The same trees that provided income to timber corporations small mill owners loggers and many small towns in Oregon also provided a dramatic landscape and a home to creatures at risk The rivers whose harnessing created power for industries that helped sustain Oregon's growth and were dumping grounds for municipal and industrial wastes also provided passageways to spawning grounds for fish domestic water sources and recreational space for everyday Oregonians The story of Oregon's accommodation to these divergent interests is a divisive story between those interested in economic growth and perceived stability and citizens concerned with exercising good stewardship towards the state's natural resources and preserving the state's livability In his second volume of Oregon's environmental history William Robbins addresses efforts by individuals and groups within and outside the state to resolve these conflicts Among the people who have had roles in this process journalists and politicians Richard Neuberger and Tom McCall left substantial legacies and demonstrated the ambiguities inherent in the issues they confronted

River Ecology and Management Robert Naiman, Robert E. Bilby, 2001-02-16 As the vast expanses of natural forests and the great populations of salmonids are harvested to support a rapidly expanding human population the need to understand streams as ecological systems and to manage them effectively becomes increasingly urgent The unfortunate legacy of such natural resource exploitation is well documented For several decades the Pacific coastal ecoregion of North America has served as a natural laboratory for scientific and managerial advancements in stream ecology and much has been learned about how to better integrate ecological processes and characteristics with a human dominated environment These in sightful but hard learned ecological and social lessons are the subject of this book Integrating land and rivers as interactive components of ecosystems and watersheds has provided the ecological sciences with important theoretical foundations Even though scientific disciplines have begun to integrate land based processes with streams and rivers the institutions and processes charged with managing these systems have not done so successfully As a result many of the watersheds of the Pacific coastal ecoregion no longer support natural settings for environmental processes or the valuable natural resources those processes create An important role for scientists educators and decision makers is to make the integration between ecology and consumptive uses more widely understood as well as useful for effective management

Sacajawea's People John W. W. Mann, 2004-12-01 On October 20 2001 a crowd gathered just east of Salmon Idaho to dedicate the site of the Sacajawea Interpretive Cultural and Education Center in preparation for the Lewis and Clark Bicentennial In a bitter instance of irony the American Indian peoples conducting the ceremony dedicating the land to the

tribe the city of Salmon and the nation the Lemhi Shoshones Sacajawea's own people had been removed from their homeland nearly a hundred years earlier and had yet to regain official federal recognition as a tribe John W W Mann's book at long last tells the remarkable and inspiring story of the Lemhi Shoshones from their distant beginning to their present struggles Mann offers an absorbing and richly detailed look at the life of Sacajawea's people before their first contact with non Natives their encounter with the Lewis and Clark Expedition in the early nineteenth century and their subsequent confinement to a reservation in northern Idaho near the town of Salmon He follows the Lemhis from the liquidation of their reservation in 1907 to their forced union with the Shoshone Bannock tribes of the Fort Hall Reservation to the south He describes how for the past century surrounded by more populous and powerful Native tribes the Lemhis have fought to preserve their political economic and cultural integrity His compelling and informative account should help to bring Sacajawea's people out of the long shadow of history and restore them to their rightful place in the American story

Charles Wilkinson, 2006-01-13 Billy Frank Jr has been celebrated as a visionary but if we go deeper and truer we learn that he is best understood as a plainspoken bearer of traditions a messenger passing along messages from his father from his grandfather from those further back from all Indian people really They are messages about the natural world about societies past about this society and about societies to come When examined rigorously not out of any romanticism but only out of our own enlightened self interest these messages can be of great practical use to us in this and future years Charles Wilkinson from the Introduction In 1974 Federal Judge George H Boldt issued one of the most sweeping rulings in the history of the Pacific Northwest affirming the treaty rights of Northwest tribal fishermen and allocating to them 50 percent of the harvestable catch of salmon and steelhead Among the Indians testifying in Judge Boldt's courtroom were Nisqually tribal leader Billy Frank Jr and his 95 year old father whose six acres along the Nisqually River known as Frank's Landing had been targeted for years by state game wardens in the so called Fish Wars By the 1960s the Landing had become a focal point for the assertion of tribal treaty rights in the Northwest It also lay at the moral center of the tribal sovereignty movement nationally The confrontations at the Landing hit the news and caught the conscience of many Like the schoolhouse steps at Little Rock or the bridge at Selma Frank's Landing came to signify a threshold for change and Billy Frank Jr became a leading architect of consensus a role he continues today as one of the most colorful and accomplished figures in the modern history of the Pacific Northwest In Messages from Frank's Landing Charles Wilkinson explores the broad historical legal and social context of Indian fishing rights in the Pacific Northwest providing a dramatic account of the people and issues involved He draws on his own decades of experience as a lawyer working with Indian people and focuses throughout on Billy Frank and the river flowing past Frank's Landing In all aspects of Frank's life as an activist from legal settlements negotiated over salmon habitats destroyed by hydroelectric plants to successful negotiations with the U S Army for environmental protection of tribal lands Wilkinson points up the significance of the traditional Indian world view the powerful and direct legacy of Frank's father conveyed through generations of Indian people who have crafted a practical working philosophy and a way of life Drawing on many hours spent talking and laughing with Billy Frank while canoeing the Nisqually watershed Wilkinson conveys words of respect and responsibility for the earth we inhabit and for the diverse communities the world encompasses

These are the messages from Frank's Landing Wilkinson brings welcome clarity to complex legal issues deepening our insight into a turbulent period in the political and environmental history of the Northwest The Boldt decision profoundly changed natural resource management in the Pacific Northwest This book clearly builds an historical base to help guide us today The wisdom and patience of Billy Frank fill virtually every page It is required reading for anyone interested in salmon preservation Governor Daniel J Evans Charles Wilkinson evokes the character and culture of the Nisqually people as well as their deep love for their land From Chief Leschi to Billy Frank we see the long thread of cultural continuity culminating in modern times with this fight for justice Ada Deer Menominee University of Wisconsin Madison Charles Wilkinson's Moses Lasky Professor of Law at the University of Colorado Boulder He is the author of *Fire on the Plateau* *Conflict and Endurance in the American Southwest* and numerous other books including standard texts on Indian and Federal public land law

Return to the River Richard N. Williams, 2005-11-21 *Return to the River* will describe a new ecosystem based approach to the restoration of salmon and steelhead populations in the Columbia River once one of the most productive river basins for anadromous salmonids on the west coast of North America The approach of this work has broad applicability to all recovery efforts throughout the northern hemisphere and general applicability to fisheries and aquatic restoration efforts throughout the world The Pacific Northwest is now embroiled in a major public policy debate over the management and restoration of Pacific salmon The outcome of the debate has the potential to affect major segments of the region's economy river transportation hydroelectric production irrigated agriculture urban growth commercial and sport fisheries etc This debate centered as it is on the salmon in all the rivers has created a huge demand for information The book will be a powerful addition to that debate A 15 year collaboration by a diverse group of scientists working on the management and recovery of salmon steelhead trout and wildlife populations in the Pacific Northwest Includes over 200 figures with four color throughout the book Discusses complex issues such as habitat degradation juvenile survival through the hydrosystem the role of artificial production and harvest reform

Osiris, Volume 40 Tamar Novick, Lisa Onaga, Gabriel N. Rosenberg, 2025-07-14 *Situates animal mobility within the politics of movement opening new perspectives in the history of science Human societies often come to know the natural world by*

examining animals even as animals frequently both willful and animate can elude human grasps and challenge human aims. Animals and their movements have underpinned many methodological, moral, and epistemic dilemmas that generatively trouble the field. Featuring a range of geographies, species, languages, and cultures, the contributions in this volume broaden the view of the historical roles animals play in knowledge production processes. Organized according to three scales of animal movement—individuals, groups, systems—the twelve richly illustrated inquiries are situated in different time periods from the sixteenth-century Ottoman Empire to the recent globalized past and introduce varied forms, capacities, and politics of movement associated with animals. The analytic attention to animal mobility deepens comprehension of animal agency and human-animal interactions in unexpected spaces, including airports, entertainment venues, living rooms, dirt roads, and waterways. Taken together, the case studies in this volume reconsider how, where, and by whom science is done.
