of Time Cynthia Ashperger,2008-01-01 The Rhythm of Space and the Sound of Time examines the place of Chekhov s Technique in contemporary acting pedagogy and practice Cynthia Ashperger answers the questions What are the reasons

behind the technique's current resurgence. How has this cohesive and holistic training been brought into today's mainstream acting training? What separates this technique from the other currently popular methods? Ashperger offers an analysis of the complex philosophical influences that shaped Chekhov's ideas about this psycho-physical approach to acting. Chekhov's five guiding principles are introduced to demonstrate how eastern ideas and practices have been integrated into this western technique and how they have continued to develop on both theoretical and practical levels in contemporary pedagogy, thereby rendering it intercultural. The volume also focuses on the work of several contemporary teachers of the technique associated with Michael Chekhov International Association (MICHA). Current teacher training is described as well as the different modes of hybridization of Chekhov's technique with other current methods. Contemporary practical experiments and some fifty exercises at both beginner and intermediate/advanced levels are presented through analysis, examples, student journals, and case studies delineating the sequences in which units are taught and specifying the exercises that differ from those in Chekhov's original writing. This book is for practitioners as well as students of the theatre.

Making Sense of Shakespeare Charles H. Frey, 1999. He argues that Lear's howl, for example, targets and rewards physical hearing, physical speaking, and their accompanying emotions as somatically connected to current or remembered sensations in mouth, throat, and lungs.

BOOK JACKET

Dance of the Ancient One Arnold Mindell, 2013-02. Just as the earth is moved by the universe, you, me, every human, every life form, and every thing is moved by the universe as well. This movement, feeling the sense of the universe's gravity field or what Einstein called space-time, is not just felt by astronauts. All of us feel moved by gravity all the time. When you let gravity move you, when you are moved by space-time, you are moved by the universe. When you are moved in this way, you are showing the dance of the ancient one and are in contact with the space between us with the subtle experience of being moved by what I shall explain is a system mind, possibly the most powerful system mind available to us.

Arnold Mindell, *The Dance of the Ancient One*, Spring 2013. In his latest book, Mindell expands on his earlier concept of the process mind as he develops the notion of space-time dreaming or dance of the ancient one in his rigorous efforts toward the elucidation of a ToE or theory of everything. Space-time dreaming weaves together essential spiritual concepts from the Eastern mystical tradition of the Tao and Wu Wei of Chinese philosophy along with modern Western field and space theories in quantum physics such as gravity, space-time, unified field theories, indeterminacy, and entanglement. He draws upon personal field ideas, i.e., the unconscious, interpersonal, social field, and role theory from psychology and sociology, then adds concepts of intersubjectivity and entanglement from transpersonal and integral psychology. On a group level, he incorporates interdependence from organizational system mind models and places it all in the context of ecology of Gaia and then the larger universe. One World concepts such as the *Unus Mundus* from mystical and alchemical traditions that work at a more essential or non-dual level to unite seeming opposites facilitate the coming together of all of these varied perspectives in his framing of the space-time dreaming concept, experientially accessible as *The Dance of the Ancient One*. Each chapter contains

either an exercise to do in pairs or a small group or an inner work exercise so that you can facilitate yourself and experience the space time dreaming states directly Transcripts of discussions with his students are distributed throughout the book and engagingly contribute to a diverse and resonant learning experience
