Roads To Modernity The British French And American Enlightenments:

The Roads to Modernity Gertrude Himmelfarb, 2007-12-18 In an elegant eminently readable work one of our most distinguished intellectual historians gives us a brilliant revisionist history The Roads to Modernity reclaims the Enlightenment an extraordinary time bursting with new ideas about human nature politics society and religion from historians who have downgraded its importance and from scholars who have given preeminence to the Enlightenment in France over concurrent movements in England and America Contrasting the Enlightenments in the three nations Himmelfarb demonstrates the primacy and wisdom of the British exemplified in such thinkers as Adam Smith David Hume and Edmund Burke as well as the unique and enduring contributions of the American Founders It is their Enlightenments she argues that created a social ethic humane compassionate and realistic that still resonates strongly today in America perhaps even more than in Europe The Roads to Modernity is a remarkable and illuminating contribution to the history of ideas **The**

Republican Treason Joseph Burrell, 2008 This book is a polemic directed against the Republican Party and the conservative movement drawing largely on their own published statements Alleging that the Republican Party is fascist and treasonous the author defines both fascism and treason and offers quoted testimony in support of his claim He shows that the US policy of political warfare around the world was originated under President Eisenhower and is still going on full force In the wake of World War II the US attacked democratic movements on the false claim of fighting communism Now democratic movements are targeted on the false claim of fighting terrorism suggesting that they are a threat to US security Deciphering some of the code words and unmasking the misleading motivations that have been used to make US citizens support war the book is a guide to reading between the lines of Washington news briefs and campaign rhetoric The author discusses the hypocritical nature of the Republican Party and describes an important change in this country's foreign policy from the Truman administration's containment of communism to a new policy of political warfare that has held sway ever since The narrative analyzes the Republican Party's overblown and misdirected anti communism and its fascist orientation Publisher's description **Religious America, Secular Europe?** Peter Berger, Grace Davie, Effie Fokas, 2021-11-18 Europe is a

relatively secular part of the world in global terms Why is this so And why is the situation in Europe so different from that in the United States The first chapter of this book the theme articulates this contrast The remaining chapters the variations look in turn at the historical philosophical institutional and sociological dimensions of these differences Key ideas are examined in detail among them constitutional issues the Enlightenment systems of law education and welfare questions of class ethnicity gender and generation In each chapter both the similarities and differences between the European and the American cases are carefully scrutinized The final chapter explores the ways in which these features translate into policy on both sides of the Atlantic This book is highly topical and relates very directly to current misunderstandings between Europe and America

The English and Their History Robert Tombs, 2015 The English and Their History presents in a single volume an

account of the English and their history The book spans 700 000 years from the island's very first inhabitants to the present day stopping along the way to recount the tales of conquerors kings and queens a nation's myths and legends facts and extraordinary truths The Rise of Common-Sense Conservatism Antti Lepistö,2021-04-20 In the years following the election of Donald Trump a victory that hinged on the votes of white Midwesterners who were both geographically and culturally distant from the media's coastal concentrations there has been a flurry of investigation into the politics of the so called common man The notion that the salt of the earth purity implied by this appellation is best understood by conservative politicians is no recent development though As Antti Lepistö shows in his timely and erudite book the intellectual wellsprings of conservative common sense discourse are both older and more transnational than has been thought In considering the luminaries of American neoconservative thought among them Irving Kristol Gertrude Himmelfarb James Q Wilson and Francis Fukuyama Lepistö argues that the centrality of their conception of the common man accounts for the enduring power and influence of their thought Intriguingly Lepistö locates the roots of this conception in the eighteenth century Scottish Enlightenment revealing how leading neoconservatives weaponized the ideas of Adam Smith Thomas Reid and David Hume to denounce postwar liberal elites educational authorities and social reformers Their reconfiguration of Scottish Enlightenment ideas ultimately gave rise to a defining force in modern conservative politics the common sense of the common man Whether twenty first century politicians who invoke the grievances of the people are conscious of this unusual lineage or not Lepistö explains both the persistence of the trope and the complicity of some conservative thinkers with the Trump regime **Edwards the Exegete** Douglas A. Sweeney,2017 Scholars have long recognized that Jonathan Edwards loved the Bible But preoccupation with his role in Western public life and letters has resulted in a failure to see the significance of his biblical exegesis Douglas A Sweeney offers the first comprehensive history of Edwards interpretation of the Bible **Anglican Enlightenment** William J. Bulman,2015-05-12 This is an original interpretation of the early European Enlightenment and the religious conflicts that rocked England and its empire under the later Stuarts In a series of vignettes that move between Europe and North Africa William J Bulman shows that this period witnessed not a struggle for and against new ideas and greater freedoms but a battle between several novel schemes for civil peace Bulman considers anew the most apparently conservative force in post Civil War English history the conformist leadership of the Church of England He demonstrates that the church's historical scholarship social science pastoral care and political practice amounted not to a culturally backward spectacle of intolerance but to a campaign for stability drawn from the frontiers of erudition and globalization In seeking to sever the link between zeal and chaos the church and its enemies were thus united in an Enlightenment project but bitterly divided over what it meant in practice Education, Politics and Religion James Arthur,Liam Gearon,Alan Sears,2010-06-28 In recent years a number of popular books have savaged religion arguing it is a dangerous delusion that poisons human societies and relationships This is but the most recent manifestation of a secularising

agenda that has been sweeping contemporary democratic societies since the Enlightenment This book pushes back against that agenda examining its key assumptions and arguing that the exclusion of religious people and ideas from education and the public square is both undemocratic and unwise For the most part the book draws arguments and examples from Christianity the religious tradition of the authors but it recognises that many religions share the concerns and possibilities examined The book examines contemporary expressions of the secularising agenda in Western democracies with particular focus on how that is played out in education It demonstrates how republican theory understood within a faith perspective provides a shared understanding and substantive basis for education within a Western democracy It explores the historical connections and disconnections between religion and civic life in the West from ancient to contemporary times and examines religiously based civic action and pedagogical approaches contending both have the potential to contribute greatly to democracy It will be of value to any who are interested in exploring how democracies can include the voices of all their citizens the religious and the secular

Religions and Churches in a Common Europe János Wildmann, 2012-10 The European religious landscape is changing fundamentally Are we experiencing a decline revival recycling or transformation of religion Moreover will Europe become a museum of religions or a laboratory of new religious experiences A group of experts from different disciplines and nationalities meeting in Pecs Hungary the European Capital of Culture 2010 examines in detail the contrasting developments around the religious lives of individuals communities institutions emerging from processes of secularisation relativisation and privatisation believing without belonging What emerges is a picture of very contrasting mega trends with positive and negative aspects characterised for example by a sharp decline in traditional situations as well as the emergence of new situations rich of flurries which are featured mostly under the so called creative minorities On which heritage of ultimate values does the EU and its member states want to base the cohesion of the new society while respecting cultural diversities and religious pluralism What happens in the world of religions cannot be side lined if we are looking for an appropriate response Important indications can be provided by the way in which the heads of religious institutions as well as communities and individuals live in possible dialogue in a European society that is increasingly multicultural multi ethnic and multi religious The analysis of on going experiences in Europe shows that a truly constructive dialogue can give a vital contribution to the strengthening of social cohesion and democracy But what are the real terms in this confrontation In other words what is tolerable And what is acceptable European experts who have worked with a multidisciplinary and systemic approach of the analysis of these phenomena attended the initiatives of the European Research Group R I P E Religious Innovation and Pluralism in 21st Century Europe which was founded in 2006 by P

The Evangelical Counter-Enlightenment William R. Everdell, 2021-05-21 This contribution to the global history of ideas uses biographical profiles of 18th century contemporaries to find what Salafist and Sufi Islam Evangelical Protestant and Jansenist Catholic Christianity and Hasidic Judaism have in common Such figures include Muhammad Ibn Abd al Wahab Count Nikolaus Zinzendorf Jonathan Edwards John Wesley Jean Jacques Rousseau and Israel Ba'al Shem Tov The book is a unique and comprehensive study of the conflicted relationship between the evangelical movements in all three Abrahamic religions and the ideas of the Enlightenment and Counter Enlightenment Centered on the 18th century the book reaches back to the third century for precedents and context and forward to the 21st for the legacy of these movements This text appeals to students and researchers in many fields including Philosophy and Religion their histories and World History while also appealing to the interested lay reader

Civic Catechisms and Reason in the French Revolution Adrian Velicu, 2016-05-23 At the heart of the French Revolution there lay a fundamental paradox how to liberate the minds of the people whilst simultaneously ensuring their loyalty to the new regime It is an exploration of the facts and implications of this tension that forms the basis of this study which reconstructs the intellectual world of the Revolution The new radical regime attacked the old institutionalized forms of Catholic worship and instruction yet retained the catechetical outlook with its dogmatic mindset as

an important feature of political education Catechisms not only conveyed information in an accessible manner they also revealed the intellectual tendencies of those who favoured the genre Civic catechisms were meant to play an important part of revolutionary instruction they were the only category of texts repeatedly mentioned in the National Assembly and in various pieces of legislation including education bills and there were calls for a national catechism The status of the catechisms changed throughout the Revolution and this study also investigates the degree of continuity of purpose across the period as well as the catechisms place alongside other texts such as speeches and bills An important contribution to the literature on the intellectual history of the French Revolution this book will also be of interest to scholars of rhetoric education and the intellectual history of the eighteenth century as well as to revolutionary studies in general

Truth Considered and Applied Stewart E. Kelly, 2011 A classroom text for philosophy and theology students learning to defend Christianity with love and truth in the context of history and against the challenges of postmodernist thought

The Enlightenment Kieron O'Hara, 2012-12-01 Blamed for the bloody disasters of the 20th century Auschwitz the Gulags globalisation Islamic terrorism heralded as the harbinger of reason equality and the end of arbitrary rule the Enlightenment has been nothing if not divisive To this day historians disagree over when it was where it was and what it was and sometimes still is Kieron O'Hara deftly traverses these conflicts presenting the history politics science religion arts and social life of the Enlightenment not as a simple set of easily enumerated ideas but an evolving conglomerate that spawned a very diverse set of thinkers from the radical Rousseau to the conservative Burke

Moderate and Radical Liberalism Nathaniel Wolloch, 2022-01-31 This book provides a new reading of one of the most significant chapters in the history of social and political thought the transition from the late Enlightenment to early liberalism In contrast with prevailing interpretations of the emergence of liberalism which emphasize the conservative liberal reaction of the nineteenth century it presents a more optimistic depiction of how formerly radical principles of the Enlightenment were eventually adopted by the mainstream of moderate early liberalism To substantiate this innovative interpretation the book provides a detailed history of late Enlightenment and early liberal social and political thought on both sides of the Atlantic See inside the book

[Macaulay and the Enlightenment](#) Nathaniel Wolloch, 2022 A new intellectual biography of Thomas Babington Macaulay showing how nineteenth century British liberal culture retained and transformed the ideas of the Enlightenment in a rapidly changing world Macaulay and the Enlightenment sheds new light on both familiar and unfamiliar aspects of the life and ideas of this most famous of nineteenth century British historians Thomas Babington Macaulay 1800-1859 was a prominent representative of mainstream British liberalism in the first half of the nineteenth century He was also a Member of Parliament and government minister and famously spent several years as a member of the governing council in India where he promoted legal and educational reforms One of the book's key contributions is the investigation of Enlightenment influences on the more well known aspects of Macaulay's thought history politics social and economic issues religion revolution and

colonialism The book also offers new revelations about Macaulay's attitude towards women and provides insight into his views on art nature and animals In this study Macaulay emerges as a more subversive at times even radical figure than previously assumed The book thus emphasizes the transformation of Enlightenment ideas into early nineteenth century liberalism Publisher description *Political Thought in the Age of Revolution 1776-1848* Michael Levin, 2010-12-09 The years between the American Revolution of 1776 the French Revolution of 1789 and the European Revolutions of 1848 saw fundamental shifts from autocracy to emerging democracy It is a vital period in what may be termed modernity that is of the western societies that are increasingly industrial capitalist and liberal democratic Unsurprisingly these years of stress and transition produced some significant reflections on politics and society This indispensable introductory text considers how a cluster of key thinkers viewed the global political upheavals and social changes of their time covering the work of Edmund Burke Georg Hegel Thomas Paine Alexis de Tocqueville Jeremy Bentham Karl Marx and Friedrich Engels Lively and approachable it is essential reading for anyone with an interest in modern history political history or political thought

Monstrous Fictions Carl J. Rasmussen, 2016-09-14 The Reformer John Calvin has influenced America in a formative way Calvin remains respected as a theologian to whose work intellectuals on both the right and left appeal In the nineteen nineties Evangelicals and Catholics Together ECT formed a politically influential ecumenical coalition to oppose abortion and change the culture Its ecumenism of the trenches influenced the administration of George W Bush and continues to influence religious elements in the Tea Party Evangelicals in the coalition presume to speak for Calvin This book provides a counter argument Calvin rejects the ethics advocated by ECT an ethics of individual virtue conscience and natural right Instead he affirms an ethics of obedience to the authority of secular government as an institution with a divinely ordained mandate This work considers the following themes in Calvin Calvin on Faith Modern and postmodern philosophical approaches including Reformed epistemology do not explain how Calvin understood faith Faith is divine activity Belief is human activity Faith is not a belief system or worldview on which to base a political theology The author provides four Augustinian theses about Calvin on faith Calvin on Sanctification Calvin rejected virtue ethics or an ethics of individual conscience His ethics require self denial and service An important requirement of his ethics is obedience to government The author provides three theses about Calvin on sanctification as a critique of attempts to revive virtue ethics Calvin on Natural Law Calvin's doctrine of natural law is one of the most vexed issues in Calvin studies The author provides five theses to clarify Calvin's doctrine of natural law For Calvin secular government transcends the authority of conscience and Christians in conscience are required to obey it In conclusion the author discusses Karl Barth's interpretation of Calvin and its relevance for the church struggle against the Third Reich Based on his analysis of Calvin he provides a defense of gay marriage and the right to terminate a pregnancy as well as an analysis of religious freedom Calvin would reject ECT's theology of virtue conscience and natural law But he would affirm its ecumenism as a possible path out of culture war
