The Handbook of Road Safety Measures Rune Elvik, Truls Vaa, Alena Høy, Michael Sørensen, 2009-10-14 Contains summaries of the knowledge regarding the effects of 128 road safety measures This title covers various areas of road safety including traffic control vehicle inspection driver training publicity campaigns police enforcement and general policy instruments It also covers topics such as post accident care and speed cameras

Structural Crashworthiness and Failure N. Jones, T. Wierzbicki, 2010-02-25 This book contains twelve invited lectures from the Third International Symposium on Structural Crashworthiness Particular emphasis is given to the failure predictions for ductile metal structures under large dynamic loads and to the behaviour of composite and cellular structures

Behavioural Adaptation and Road Safety Christina Rudin-Brown, Samantha Jamson, 2013-05-24 Despite being an accepted construct in traffic and transport psychology the precise nature of behavioural adaptation including its causes and consequences has not yet been established within the road safety community A comprehensive collection of recent literature Behavioural Adaptation and Road Safety Theory Evidence and Action explores behavioural adaptation in road users It examines behavioural adaptation within the context of historical and theoretical perspectives and puts forth tangible and practical solutions that can effectively address adverse behavioural adaptation to road safety interventions before it occurs Edited by Christina Rudin Brown and Samantha Jamson with chapters authored by leading road safety experts in driver psychology and behaviour the book introduces the concept of behavioural adaptation and details its more relevant issues It reviews the definition of behavioural adaptation that was put forward by the OECD in 1990 and then puts this definition through its paces identifying where it may be lacking and how it might be improved This sets the context for the remaining chapters which take the OECD definition as their starting points The book discusses the various theories and models of behavioural adaptation and more general theories of driver behaviour developed during the last half century It provides examples of the evidence for behavioural adaptation instances in which behavioural adaptation arose as a consequence of the introduction of safety countermeasures The book then focuses on the internal human element and considers countermeasures that might be used to limit the development of behavioural adaptation in various road user groups The book concludes with practical tools and methodologies to address behavioural adaptation in research and design and to limit the potential negative effects before they happen Supplying easy to understand accessible solutions that can be implemented early on in a road safety intervention s design or conception phase the chapters represent the most extensive compilation of literature relating to behavioural adaptation and its consequences since the 1990 OECD report The book brings together earlier theories of behavioural adaptation with more recent theories in the area and combines them with practical advice methods and tangible solutions that can minimise the potential negative impact of behavioural adaptation on road user safety and address it before it occurs It is an essential component of any road safety library and should be of particular relevance to researchers

practitioners designers and policymakers who are interested in maximizing safety while at the same time encouraging innovation and excellence in road transport related design

What Value May Geographic Information Systems Add to the Art of Identifying Crash Countermeasures? John S. Miller, 2008-09 Geographic Info Systems GIS can be employed to relate organize and analyze roadway and crash data thereby facilitating crash countermeasure identification and evaluation GIS cannot however replace the role of the local analyst as a problem solver who needs to interpret results and recommend engineering enforcement or educ improvements Using the PC based Micro Traffic Records System MTRS a software packaged employed in Virginia that records crashes at either a specific intersection or between 2 cross streets it was possible to place 82% of the MTRS crash locations within a GIS Without crashes that were demarcated at private property locations the placement rate climbs to 94% for intersection locations Illus

Designing Safe Road Systems Jan Theeuwes, Richard van der Horst, 2017-09-18 Many books focus on individual differences and how those relate to traffic safety such as accident proneness gender differences age alcohol and the effects of drugs Others focus on the safety effects regarding the vehicle such as airbags anti lock brakes navigation systems intelligent cruise control and other new gadgets coming to the vehicle Even though these topics are undoubtedly important for traffic safety this book takes a unique approach as it focuses solely on the road environment Designing Safe Road Systems provides the background for those who want to know more about the effects of road design on driving behaviour It uses a systems approach to allow a better understanding of why and in what circumstances drivers may commit errors This understanding will ultimately lead to road systems that prevent fatal errors from occurring The book contains an overview of the current models and theories about human performance and human behaviour in traffic that are relevant for all those involved in designing safe road systems The central theme of this book is how design principles can reduce the probability of an error while driving The authors demonstrate how knowledge of human factors helps a road authority to better understand how road users behave They argue that in many cases the design of the environment can be further adjusted to human capabilities and that safety should be considered a system property to be built into the road system
