REGULATION

The Lifting Operations and Lifting Equipment Regulations 1998 deal with specific responsibilities associated with lifting equipment and lifting operations. For most lift truck work, operating with safety is a matter for the operator, who should therefore have the appropriate training, knowledge and experience. However, they may need to be supervised if required to lift an unusual load, or to lift in particularly hazardous conditions.

The Provision and Use of Work Equipment Regulations 1998 require that all trucks which carry a seated operator should be fitted with a restraining system, such as a seat belt.

TYPES OF LIFT TRUCKS

There are a number of varieties of lift truck. To ensure safe practice, it is essential for operating instructions of the manufacturer or supplier to be followed.

- **Side loading lift trucks**
- **Hydraulic controlled lift trucks**
- **Large lift trucks**

THE WORKING AREA

The use of lift trucks and movement of loads should be planned into the overall safety culture for people, plants and equipment.

- Roads, gangways and aisles should have sufficient width and overhead clearance.
- Allowing safe use for the large lift trucks.
- Manoeuvring, turning and reversing.
- To allow vehicles and loads to pass with other safety.
- Where possible, pedestrians should be prohibited from entering areas in which lift trucks are operating.
- Where loads and purchased distributions should be allocated or avoided as far as possible.
- Where hazards cannot be removed, the risk should be reduced by the use of barriers which are clearly marked.
- The edges of loading bays, reception and gate should be clearly marked.
- Operating areas should be as free as possible of obstructions.
- It is important to select lift trucks which are suitable for use in all the conditions likely to be encountered in the workplace where they are to be used.
