Robinson,2012-01-01 Matriarchy Patriarchy and Imperial Security in Africa is an interdisciplinary treatment of a topic that is usually addressed by political scientists and military strategists Rather than follow Thomas P M Barnett s Samuel Huntington s and Edward Sa d s top down approach to the turn of the twenty first century clash of the West and the Rest this book takes readers on a three thousand year grassroots journey through imperialism linguistics and applied critical theory to show readers that peace eludes us because we are not all working with the same definition of national security By adding a Saharan world trade system to the conventional Oriental Occidental binary of traditional Western Civilization narratives this book opens a view of Western Europe as a colonized territory of a medieval Roman empire that never died A parallel imperial reorganization occurred in West Asia Both systems deployed patriarchy as a gender bomb to implode and conquer matriarchal economies This clash of European West Asian and African matriarchal and patriarchal empires was the crucible that produced the United States of America as elder sibling of the family of post colonial frontier nations The author argues that patriarchal imperialists of Africa Western Asia and Western Europe tempted matriarchal men to betray the rights of women in exchange for the benefits of patria potestas Patriarchal empires then corrupt definitions of fatherhood and dehumanize the conquered men until they suffer from a societal malaise that the author calls patria impotestas Such economically castrated men revolted in the past and they respond now with twenty first century mass protests against austerity measures in Europe and protests against Wall Street in the U S as well as with acts of terrorism and tragically war crimes against women In this book the most insecure people are the elite The author concludes that terrorism piracy and acts of sabotage against industrial physical plants will continue in Africa Asia and the West until ordinary people around the world have positive answers to the Primordial Question Will my family eat today and sleep peacefully through the night

Denniston, Frederick Mansfield Hodges, Marilyn Fayre Milos, 2013-06-29 Every year in the United States and the third world combined 13.3 million boys and 2 million girls are circumcised. Whether because of perceived medical, cultural, or religious necessity, most of these parents feel they have no alternative but to allow their children to undergo this surgery. Sparking intense debate, the circumcision of children is a highly controversial and complex phenomenon that touches a variety of sociological areas such as religious beliefs, identity issues, medical conceptualizations, fear, and superstition. The contributors to this volume comprise an international panel of experts in the fields of medicine, psychology, law, ethics, sociology, anthropology, history, theology, and politics. In 18 chapters, they discuss the history of circumcision, document the physical and psychological consequences of circumcision, present the latest anatomical discoveries about the male prepuce, analyze the role of circumcision in various traditions, reveal the medical industry's investment in the practice, describe current legislative efforts to protect children from circumcision, and outline effective culturally sensitive methods that are being implemented today to safeguard the human rights of at-risk children. For its insights into this troubling aspect of culture, *Understanding Circumcision: A Multi-Disciplinary Approach to a Multi-Dimensional Problem* is a critically important contribution to the growing body of literature on this subject.

**Knowledge of Self** Supreme Understanding, Sunez Allah, C'BS Alife Allah, 2009-07-30 Do you know who and what you are? Do you know who you're meant to be? Do you know how to find the answers to questions like these? *Knowledge of Self* is the result of a process of self-discovery, but few of us know where to begin when we're ready to start looking deeper. Although self-actualization is the highest of all human needs, it is said that only 5% of people ever attain this goal. In the culture of the Nation of Gods and Earths, commonly known as the Five Percent, students are instructed that they must first learn themselves, then their worlds, and then what they must do in order to transform their world for the better. This often intense process has produced thousands of revolutionary thinkers in otherwise desperate environments where poverty and hopelessness dominate. Until now, few mainstream publications have captured the brilliant yet practical perspectives of these luminary men and women. *Knowledge of Self: A Collection of Writings on the Science of Everything in Life* presents the thoughts of Five Percenters, both young and old, male and female, from all over the globe, in their own words. Through essays, poems, and even how-to articles, this anthology presents readers with an accurate portrait of what the Five Percent study and teach, as well as sound direction on how to answer timeless questions like: Who am I and why am I here? Why is there so much injustice in the world and what can be done about it? Who is God and where on Earth is he? How do I improve myself without losing myself? Why are people of color in the situations they're in? What can we do about the global problems of racism and poverty?
