Gurven, 2025-09-16 An anthropologist uncovers new evidence for

the evolutionary origins of human longevity and explains why growing old is an opportunity not a burden Our ability to live for decades may seem like a modern luxury made possible by clean water and advances in medicine In fact human longevity is a legacy of our unique evolutionary path as a species Seven Decades challenges the belief that life in the past was nasty brutish and short tracing how our capacity for long life came to be and transforming how we think about aging Blending vivid storytelling with cutting edge science anthropologist Michael Gurven weaves tales from his years of field experience among Indigenous societies whose diet and traditional lifeways are closer to how we all lived prior to industrialization demonstrating how these communities are relatively free of the chronic diseases of aging such as heart disease dementia and diabetes He provides compelling evidence that our longevity first evolved among our hunting and gathering ancestors and shows how the human body was built to last around seven decades At a time when people are more likely to live to old age than ever before Gurven discusses how we can harness this amazing evolutionary feat through a shift in societal values one that balances self reliance with interdependence nurtures multigenerational ties prioritizes women s health and longevity and enables us to rediscover the wisdom of our elders Sharing bold new perspectives on human ageing Seven Decades draws important lessons from our ancestral history bridging the past with the present to reveal what healthy happy and productive old age could look like for all generations

The Salish People and the Lewis and Clark Expedition Salish-Pend D'Oreille Culture Committee, Elders Cultural Advisory Council, Confederated Salish and Kootenai Tribes, 2008-07-01 On September 4 1805 in the upper Bitterroot Valley of what is now western Montana more than four hundred Salish people were encamped pasturing horses preparing for the fall bison hunt and harvesting chokecherries as they had done for countless generations As the Lewis and Clark Expedition ventured into the territory of a sovereign Native nation the Salish met the strangers with hospitality and vital provisions while receiving comparatively little in return For the first time a Native American community offers an in depth examination of the events and historical significance of its encounter with the Lewis and Clark Expedition The Salish People and the Lewis and Clark Expedition is a startling departure from previous accounts of the Lewis and Clark Expedition Rather than looking at Indian people within the context of the expedition it examines the expedition within the context of tribal history The arrival of non Indians is therefore framed not as the beginning of the history of Montana or the West but as only a recent chapter in a far longer Native history The result is a new understanding of the expedition and its place in the wider context of the history of Indian white relations Based on three decades of research and oral histories this book presents tribal elders recounting the Salish encounter with Lewis and Clark Richly illustrated The Salish People and the Lewis and Clark Expedition not only sheds new light on the meaning of the expedition but also illuminates the people who greeted Lewis and Clark and despite much of what followed thrive in their homeland today

Crossing Mountains Phyllis Ngai, 2012-03-16 Collaboration among contemporary Native American communities and local public schools is vital for nurturing Native languages Although public schools cannot bear the entire burden Native language education will remain on

the margins without their support Using case studies of school districts on the Flathead Indian Reservation in Montana Crossing Mountains provides important insights about integrating Native language learning into public education Phyllis Ngai argues that carefully designed and inclusive Native language programs can benefit communities and students regardless of ethnic identity by providing for language revitalization and promoting intercultural competence *Other Ways of Growing Old* Pamela T. Amoss,Stevan Harrell,1981 As anthropologists we offer this book about aging in a wide variety of human societies in the hope of its making three contributions First this book will help to remedy a massive neglect of old age by the discipline of anthropology The pioneering work of Leo Simmons 1945 has remained a lonely monument since the 1940 s for despite recent interest in the subject of aging in modern Western societies on the part of social gerontologists and sociologists little has been done by anthropologists on aging in non Western societies Where it has been treated at all it has been in the form either of a few final paragraphs in the discussion of the life cycle or of a simple ethnographic fact among other facts about a certain social system What has been missing has been any attempt to put aging in a cross cultural or comparative perspective to give this vital subject the same treatment that has been accorded marriage for example or death or inheritance or sex roles Second this book will bring a needed cross cultural perspective to the study of social gerontology The recent explosion of interest in this field has been largely confined to the study of aging in North America and Europe But we anthropologists feel that such a culturally limited study though interesting and productive in its own right is dangerously narrow if it does not consider what aging is like in other societies What aspects of aging for example are human universals and have to be planned for as inevitable and what aspects are cultural particulars and can be avoided modified or strengthened under certain social conditions By presenting both a biological account of the universals of human aging Weiss and specific ethnographic accounts of aging in a wide variety of societies we believe we can help to put North American aging into perspective Third we hope this book will serve as an illustration of a particular anthropological approach to unity and diversity in human societies and cultures Perhaps the main task of sociocultural anthropology is a twofold one the explanation of cross cultural universals somehow rooted either in the biological nature of the human species or in universal imperatives of social organization and the explanation of intercultural variations rooted in a dialectical interaction between culture and the material conditions partially created by culture in which it exists If unity and diversity can indeed be explained in this way the cross cultural study of aging can serve as a paradigm By first setting out what seem to be the universals determined by the biology of the human species and by then exploring the range of variation in cultural solutions we ought to be able to formulate a set of principles that will allow us to explain why variations occur in a certain way Nine ethnographic case studies are enough we believe to enable us to formulate some preliminary hypotheses about the nature and causes of variation in the social process of aging **Oral History on Trial** Bruce Granville Miller,2024-03-20 In many western countries judicial decisions are based on black letter law text based well established law Within this tradition

testimony based on what witnesses have heard from others known as hearsay cannot be considered as legitimate evidence This interdiction however presents significant difficulties for Aboriginal plaintiffs who rely on oral rather than written accounts for knowledge transmission This important book breaks new ground by asking how oral histories might be incorporated into the existing court system Through compelling analysis of Aboriginal legal and anthropological concepts of fact and evidence *Oral History on Trial* traces the long trajectory of oral history from community to court and offers a sophisticated critique of the Crown's use of Aboriginal materials in key cases A bold intervention in legal and anthropological scholarship this book is a timely consideration of an urgent issue facing Indigenous communities worldwide and the courts hearing their cases

The Green Depression Matthew M. Lambert, 2020-10-16 Dust storms Flooding The fear of nuclear fallout While literary critics associate authors of the 1930s and 40s with leftist political and economic thought they often ignore concern in the period's literary and cultural works with major environmental crises To fill this gap in scholarship author Matthew M Lambert argues that depression era authors contributed to the development of modern environmentalist thought in a variety of ways Writers of the time provided a better understanding of the devastating effects that humans can have on the environment They also depicted the ecological and cultural value of nonhuman nature including animal predators and pests Finally they laid the groundwork for environmental justice by focusing on the social effects of environmental exploitation To show the reach of environmentalist thought during the period the first three chapters of *The Green Depression* American Ecocriticism in the 1930s and 1940s focus on different geographical landscapes including the wild rural and urban The fourth and final chapter shifts to debates over the social and environmental effects of technology during the period In identifying modern environmental ideas and concerns in American literary and cultural works of the 1930s and 40s *The Green Depression* highlights the importance of depression era literature in understanding the development of environmentalist thought over the twentieth century This book also builds upon a growing body of scholarship in ecocriticism that describes the unique contributions African American and other nonwhite authors have made to the environmental justice movement and to our understanding of the natural world

Decolonizing Research Jo-ann Archibald Q'um Q'um Xiem, Jenny Bol Jun Lee-Morgan, Jason De Santolo, 2019-05-15 From Oceania to North America Indigenous peoples have created storytelling traditions of incredible depth and diversity The term Indigenous storywork has come to encompass the sheer breadth of ways in which Indigenous storytelling serves as a historical record as a form of teaching and learning and as an expression of Indigenous culture and identity But such traditions have too often been relegated to the realm of myth and legend recorded as fragmented distortions or erased altogether Decolonizing Research brings together Indigenous researchers and activists from Canada Australia and New Zealand to assert the unique value of Indigenous storywork as a focus of research and to develop methodologies that rectify the colonial attitudes inherent in much past and current scholarship By bringing together their own indigenous perspectives and by treating Indigenous storywork on its own terms the contributors illuminate valuable new avenues for research and show how such reworked scholarship can contribute to the movement for Indigenous rights and self determination
