**Stranger Than Fiction** Edwin Frank,2024-11-19 One of the Washington Post s 50 Best Nonfiction Books of 2024 A New York Times Book Review Editors Choice Ambitious intelligent and happily unpretentious Louis Menand The New Yorker Convincing idiosyncratic and often felicitous Alexandra Jacobs The New York Times Book Review A legendary editor s reckoning with the twentieth century novel and the urgent messages it sends How can we live differently a young woman urgently demands in Virginia Woolf s novel The Waves It is the 1930s war and death are in the air but her question was asked again and again in the course of a century where things changed fast and changed all the time The century brought world wars revolutions automobiles movies and the internet votes for women death camps The century brought questions Novelists

in the twentieth century had a question of their own how can we write a novel as startling and unforeseen as the world we live in Again and again they did transforming the novel as the century remade the world Imagine the history of the twentieth century novel recounted with the urgency and intimacy of a novel That s what Edwin Frank the legendary editor who has run the New York Review Books publishing imprint since its inception does in Stranger than Fiction With penetrating insight and originality Frank introduces us to books some famous some little known from the whole course of the century and from around the world Starting with Dostoevsky s Notes from Underground of 1864 Frank shows how its twitchy self undermining and never satisfied narrator established a voice that would echo through the coming century He illuminates the political vision of H G Wells s science fiction Colette and Andre Gide s subversions of traditional gender roles and Gertrude Stein s untethering of the American sentence He describes the monumental ambition of books such as Mrs Dalloway The Magic Mountain and The Man Without Qualities to rebuild a world of human possibility upon the ruins of World War I and explores how Japan s Natsume S seki and Nigeria s Chinua Achebe broke open European models to reflect their own distinct histories and experience Here too are Vasily Grossman Anna Banti and Elsa Morante reckoning in specific ways with the traumas of World War II while later chapters range from Marguerite Yourcenar and V S Naipaul to Gabriel Garc a Marquez and W G Sebald The story as a whole is one of fearless often reckless exploration as well as unfathomable desolation Throughout we discover the power of the novel to reinvent itself to find a way for itself to live differently Stranger than Fiction offers a new vision of the history and art of the novel and of a dark and dazzling time in whose light and shadow we still stand

Species, Serpents, Spirits, and Skulls Sherrie Lynne Lyons,2010-07-02 Science permeates nearly every aspect of our lives and yet as current debates over intelligent design the causes of global warming and alternative health practices indicate the question of how to distinguish science from pseudoscience remains a difficult one To address this question Sherrie Lynne Lyons draws on four examples from the nineteenth century sea serpent investigations spiritualism phrenology and Darwin s

theory of evolution Each attracted the interest of prominent scientists as well as the general public yet three remained at the edges of scientific respectability while the fourth evolutionary theory although initially regarded as scientific heresy ultimately became the new scientific orthodoxy Taking a serious look at the science behind these examples Lyons argues that distinguishing between science and pseudoscience particularly in the midst of discovery is not as easy as the popular image of science tends to suggest Two examples of present day controversies surrounding evolutionary psychology and the meaning of fossils confirm this assertion She concludes that although the boundaries of what constitutes science are not always clear cut the very intimate relationship between science and society rather than being a hindrance contributes to the richness and diversity of scientific ideas Taken together these entertaining and accessible examples illuminate important issues concerning the theory practice and content of science
