Sea Strike:

Navy's Needs in Space for Providing Future Capabilities National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee on the Navy's Needs in Space for Providing Future Capabilities, 2005-07-18 The United States must operate successfully in space to help assure its security and economic well being The Department of the Navy is a major user of space capabilities although those capabilities are now primarily provided by DOD the Air Force and NOAA Following a DOD assessment of national space security management in 2001 the Navy commissioned a Panel to Review Space to assess Navy space policy and strategy As an extension of that review the NRC was requested by the Navy to examine its needs in space for providing future operational and technical capabilities This report presents a discussion of the strategic framework of future space needs the roles and responsibilities for meeting those needs an assessment of Navy support to space mission areas and a proposed vision for fulfilling Naval forces space needs

The Future of the Navy's Amphibious and Maritime Prepositioning Forces , National Security Challenges for the 21st Century Williamson Murray, 2003 Officers who participated in the Advanced Strategic Art Program ASAP during their year at the U S Army War College wrote these chapters The ASAP is a unique program that offers selected students a rigorous course of instruction in theater strategy Solidly based in theory doctrine and history the program provides these students a rich professional experience that includes staff rides exercises and the best instructional expertise available The program is designed to provide the joint community with the military's best theater strategists The challenges facing the defense establishment in the United States at the beginning of the 21st century are daunting indeed however the thoughtful essays included in this volume including two award winners representing some of the thinking by students at the U S Army War College provide insights into these trials that will prove useful to policymakers both in and out of uniform

2003 Assessment of the Office of Naval Research's Marine Corps Science and Technology Program National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee for the Review of ONR's Marine Corps Science and Technology Program, 2004-04-01 The Office of Naval Research ONR funds research across a broad range of scientific and engineering disciplines in support of the Navy and Marine Corps To ensure that its investments are serving those ends and are of high quality ONR requires each of its departments to undergo annual review Since 1999 the Naval Expeditionary Warfare Department of ONR has requested that the NRC conduct these reviews This report presents the results of the second review of the Marine Corps Science and Technology program The first review was conducted in 2000 The 2003 assessment examines the overall Marine Corps S T program the littoral combat future naval capability the core thrusts of the program and basic research activities The Role of Experimentation in Building Future Naval Forces National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee for the Role of Experimentation in Building Future Naval Forces, 2005-01-08 The Department of Defense is in the process of transforming

the nation's armed forces to meet the military challenges of the 21st century. Currently the opportunity exists to carry out experiments at individual and joint service levels to facilitate this transformation. Experimentation which involves a spectrum of activities including analyses, war games, modeling and simulation, small focused experiments and large field events among other things provides the means to enhance naval and joint force development. To assist the Navy in this effort the Chief of Naval Operations CNO asked the National Research Council (NRC) to conduct a study to examine the role of experimentation in building future naval forces to operate in the joint environment. The NRC formed the Committee for the Role of Experimentation in Building Future Naval Forces to perform the study.

Sedimentary Basins and Petroleum Geology of the Middle East A.E.M. Nairn, A.S. Alsharhan, 1997-12-11. The wealth of petroleum has made the Middle East one of the most actively explored regions of the world. The volume of geological, geophysical and geochemical data collected by the petroleum industry in recent decades is enormous. The Middle East may be a unique region in the world where the volume of subsurface data and information exceeds that based on surface outcrop. This book reviews the tectonic and geological history of the Middle East and the regional hydrocarbon potential on a country by country basis in the context of current ideas developed through seismic and sequence stratigraphy and incorporating the ideas of global sea level change. Subsurface data have been used as much as possible to amplify the descriptions. The paleogeographic approach provides a means to view the area as a whole. While the country by country approach inevitably leads to some repetition it enhances the value of the volume as a teaching tool and underlines some of the changing lithologies within formations carrying the same name. Sea Strike James H. Cobb, 1997. Action packed. Commander Amanda Garrett and her stealthy destroyer are drawn into an incipient war between Taiwan and China.

Autonomous Vehicles in Support of Naval Operations National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee on Autonomous Vehicles in Support of Naval Operations, 2005-09-05. Autonomous vehicles (AVs) have been used in military operations for more than 60 years with torpedoes, cruise missiles, satellites and target drones being early examples. They have also been widely used in the civilian sector for example in the disposal of explosives for work and measurement in radioactive environments by various offshore industries for both creating and maintaining undersea facilities for atmospheric and undersea research and by industry in automated and robotic manufacturing. Recent military experiences with AVs have consistently demonstrated their value in a wide range of missions and anticipated developments of AVs hold promise for increasingly significant roles in future naval operations. Advances in AV capabilities are enabled and limited by progress in the technologies of computing and robotics, navigation, communications and networking, power sources and

propulsion and materials Autonomous Vehicles in Support of Naval Operations is a forward looking discussion of the naval operational environment and vision for the Navy and Marine Corps and of naval mission needs and potential applications and limitations of AVs This report considers the potential of AVs for naval operations operational needs and technology issues and opportunities for improved operations *Options for the Navy's Future Fleet* Eric Jackson Labs,2006 **Department of**

FORCENet Implementation Strategy National Research Council,Division on Engineering and Physical Sciences,Naval Studies Board,Committee on the FORCENet Implementation Strategy,2006-01-14 FORCENet is currently defined as the operational construct and architectural framework for naval warfare in the information age that integrates warriors sensors networks command and control platforms and weapons into a networked distributed combat force that is scalable across all levels of conflict from seabed to space and sea to land Although this definition views FORCENet as the operational construct and the architectural framework for the entire transformed Navy some have viewed FORCENet merely as an information network and the associated FORCENet architecture merely as an information systems architecture FORCENet Implementation Strategy provides advice regarding both the adequacy of this definition and the actions required to implement FORCENet **Australia Navy Handbook Volume 1 Strategic Information and Weapon Systems** IBP

USA,2011 2011 Updated Reprint Updated Annually Australia Navy Handbook *Information Assurance for Network-Centric Naval Forces* National Research Council,Division on Engineering and Physical Sciences,Naval Studies Board,Committee on Information Assurance for Network-Centric Naval Forces,2010-04-11 Owing to the expansion of network centric operating concepts across the Department of Defense DOD and the growing threat to information and cybersecurity from lone actors groups of like minded actors nation states and malicious insiders information assurance is an area of significant and growing importance and concern Because of the forward positioning of both the Navy s afloat and the Marine Corps expeditionary forces IA issues for naval forces are exacerbated and are tightly linked to operational success Broad based IA success is viewed by the NRC s Committee on Information Assurance for Network Centric Naval Forces as providing a central underpinning to the DOD s network centric operational concept and the Department of the Navy s DON s FORCENet operational vision Accordingly this report provides a view and analysis of information assurance in the context of naval mission assurance *Salvaging American Defense* Anthony H. Cordesman,2007-04-30 From grassroots terrorism to the nuclear ambitions of hostile nations the United States faces increasingly complex threats to its national security Combating these threats continues to demand a reshaping of the nation s security structure military forces and defense expenditures In

this study Anthony Cordesman offers a detailed analysis of critical challenges affecting U S national security and how failures in adapting to these challenges have exacerbated the strains on available resources He systematically identifies the most glaring obstacles to successful national security planning and proposes constructive and practical ways to proceed in the future Cordesman focuses on ten specific challenges and each is addressed within the context of the Iraq War Afghan War War on Terrorism and the risk of conflict over the Taiwan Straits Out of the lessons drawn from these experiences he examines the future of international coalitions asymmetric warfare nation building and stability operations and concludes that perhaps the most pressing area for change is the need for accountability among civilian and military policymakers

Identification of Promising Naval Aviation Science and Technology Opportunities National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee on Identification of Promising Naval Aviation Science and Technology Opportunities, 2006-04-09 The Department of Defense is developing the means to transform the nation's armed forces to meet future military challenges For the Navy and Marine Corps this vision is encompassed in Naval Power 21 Many new war fighting concepts will be needed to implement this vision and the ONR has requested the NRC to identify new science and technology opportunities for new naval aviation capabilities to support those concepts This report presents an assessment of what they imply for naval aviation an analysis of some capabilities that if developed would make a significant contribution to realizing those concepts and an identification of key technologies in which ONR could invest to achieve those capabilities In particular the report focuses on seven key capabilities multispectral defense unmanned air operations hypersonic weapons delivery fast kill weapons heavy lift air transport intelligent combat information management and omniscient intelligence
