Provided by publisher: *The Search for the Self* Heinz Kohut, 1990 *Toward a Psychology of Uncertainty* Doris Brothers, 2011-04-12. Since trauma is a thoroughly relational phenomenon it is highly unpredictable and cannot be made to fit within the scientific framework Freud so admired. In *Toward a Psychology of Uncertainty: Trauma Centered Psychoanalysis* Doris Brothers urges a return to a trauma centered psychoanalysis. Making use of relational systems theory she shows that experiences of uncertainty are continually transformed by the regulatory processes of everyday life such as feeling, knowing, forming categories, making decisions, using language, creating narratives, sensing time, remembering, forgetting, and fantasizing. Insofar as trauma destroys the certainties that organize psychological life it plunges our relational systems into chaos and sets the stage for the emergence of rigid, life constricting relational patterns. These trauma generated patterns which often involve denial of sameness and difference, the creation of complexity, reducing dualities, and the transformation of certainty into certitude figure prominently in virtually all of the complaints for which patients seek analytic treatment. Analysts, she claims, are no more strangers to trauma than are their patients. Using in-depth clinical illustrations Dr. Brothers demonstrates how a mutual desire to heal and to be healed from trauma draws patients and analysts into their analytic relationships. She recommends the reconceptualization of what has heretofore been considered transference and countertransference in terms of the transformation of experienced uncertainty. In her view the increased ability of both analytic partners to live with uncertainty is the mark of a successful treatment. Dr. Brothers' perspective sheds fresh light on a variety of topics of great general interest to analysts as well as many of their patients such as gender, the acceptance of death, faith, cult-like training programs, and burnout. Her discussions of these topics are enlivened by references to contemporary cinema and theatre.

Religious Experience and Self-Psychology Jung Eun Jang, 2016-11-09. This book explores the 1907 Korean Revival Movement from a self psychological perspective. The examination of the psychological processes in the movement based on Heinz Kohut's self psychology can shed light on religious experiences as self-object experiences by identifying the sense of defeatedness and helplessness that Korean people experienced under Japanese occupation as what Kohut calls self fragmentation of the Korean group self and explaining its

therapeutic functions which facilitate potential for the narcissistic nourishment of the fragmented group self leading to renewed self esteem transformation and empowerment of the Korean people Korean people in the early 1900s experienced abuses and oppression by corrupt officials and exploitation by Japanese government Through religious experiences which emphasized the individual repentance the experience of God through the spirit emphasis on prayer and eschatological faith the Korean Revival Movement in 1907 enabled its followers to experience mirroring and idealizing selfobjects which function as a role of transforming the lower shape of narcissism into the higher one

The New World of Self Charles B. Strozier,Konstantine Pinteris,Kathleen Kelley,Deborah Cher,2022-10-07

There are two foundational thinkers in the history of psychoanalysis Sigmund Freud and Heinz Kohut Though Kohut is much less well known he revolutionized psychoanalytic theory and the practice of psychotherapy In a burst of creativity from the mid 1960s until his death in 1981 he reimagined the field in a way that made it open mutual relational and inclusive His conceptualization of a holistic self that is in an ongoing relationship with others represented a paradigm shift from the purely intrapsychic Freudian model of id ego superego In The New World of Self Charles B Strozier Konstantine Pinteris Kathleen Kelley and Deborah Cher draw upon their deep knowledge of Kohut s extensive and diverse writing to understand the full significance of his thinking His self psychology released psychoanalysis from the inherent limits created by its theoretical dependence on drive theory Kohut instead focused on immediate experience He also embraced historical themes leadership and culture literature from Kafka to O Neill the psychology of music much about art and a theory of religion and spirituality for modern sensibilities Acquainting the work of this eminent psychoanalytic theorist to a new generation of clinicians and scholars The New World of Self unpacks the transformative research of Heinz Kohut and highlights his significance in the history of psychoanalysis

The Spiritual Horizon of Psychotherapy William S. Schmidt,Merle R. Jordan,2013-09-13 This book explores the wise and conscious use of spiritual resources within counselling and psychotherapy Written by veteran clinicians from different spiritual perspectives and from various therapeutic schools of thought this book provides a broad view of how the spiritual is present within therapeutic practice The work of counselling and psychotherapy is increasingly seeking to ground its efforts within the richness of spiritual traditions One of the surprising developments of the contemporary psychotherapeutic scene is a growing reliance on both hard objective sciences such as for example neurology or Genetics whilst at the same time engaging very subjective soft sciences such as states of consciousness studies psychology of religion clinical or Pastoral Theology and the over arching tasks of meaning making Written by and for clinicians who are also teachers in the field this collection offers a variety of viewpoints in terms of the diverse spiritual traditions they draw

from theoretical sources that guide and inform them or the spiritual applications they bring to their work This book was published as a special issue of the Journal of Spirituality in Mental Health

The Empathic Civilization Jeremy Rifkin, 2009-12-31 One of the leading big picture thinkers of our day Utne Reader delivers his boldest work in this erudite tough minded and far reaching manifesto Never has the world seemed so completely united in the form of communication commerce and culture and so savagely torn apart in the form of war financial meltdown global warming and even the migration of diseases No matter how much we put our minds to the task of meeting the challenges of a rapidly globalizing world the human race seems to continually come up short unable to muster the collective mental resources to truly think globally and act locally In his most ambitious book to date bestselling social critic Jeremy Rifkin shows that this disconnect between our vision for the world and our ability to realize that vision lies in the current state of human consciousness The very way our brains are structured disposes us to a way of feeling thinking and acting in the world that is no longer entirely relevant to the new environments we have created for ourselves The human made environment is rapidly morphing into a global space yet our existing modes of consciousness are structured for earlier eras of history which are just as quickly fading away Humanity Rifkin argues finds itself on the cusp of its greatest experiment to date refashioning human consciousness so that human beings can mutually live and flourish in the new globalizing society In essence this shift in consciousness is based upon reaching out to others But to resist this change in human relations and modes of thinking Rifkin contends would spell ineptness and disaster in facing the new challenges around us As the forces of globalization accelerate deepen and become ever more complex the older faith based and rational forms of consciousness are likely to become stressed and even dangerous as they attempt to navigate a world increasingly beyond their reach and control Indeed the emergence of this empathetic consciousness has implications for the future that will likely be as profound and far reaching as when Enlightenment philosophers upended faith based consciousness with the canon of reason

Therapy Narrative Therapy Buddhist Mindfulness and Jungian understanding of individuation are represented *Progress in Self Psychology, V. 15* Arnold I. Goldberg, 2013-06-17 Volume 15 of Progress in Self Psychology conveys the rich pluralism of contemporary self psychology with respect to a central theoretical and clinical issue the nature of the self and the manner in which it can best be studied This topic is initially addressed through a series of papers reassessing selfobject transferences and the selfobject function of interpretation It is then approached via the theory of psychoanalytic technique with papers that focus on boundaries and intimacy and on Surface Depth and the Isolated Mind And it culminates in two case studies that elicit animated discussion delineating different perspectives intersubjective motivational systems and self selfobject on the self in relation to the therapeutic process Two studies comparing Melanie Klein and Heinz Kohut a discussion of how current cultural attitudes affect parenting a relational view of the therapeutic partnership and an integration of Silvan Tomkins's affect theory with self psychology add breadth to this timely and provocative collection Volume 15 includes additional letters from the Kohut Archives and a moving account of Kohut's struggle with his own impending death

Psychology in Nietzsche's Criticism of Religion Jan-Olav Henriksen, 2022-11-14 Friedrich Nietzsche claimed to be a psychologist This claim is substantiated in his criticism of religion In this book Jan Olav Henriksen provides new perspectives on Nietzsche's contribution to such criticism by applying elements from attachment theory and self psychology The result is that Nietzsche's insights into the problematic elements in religion point beyond what he was able to articulate based on the psychological resources available to him Henriksen sheds new light on the psychological dimensions in Nietzsche's individualism his understanding of God morality metaphysics and emotions and demonstrates how Nietzsche's criticism of religion is rooted in both psychological splitting and a profound loss of the orientational resources religion provided in his childhood

Wesleyan Theology and Social Science M. Kathryn Armistead, Brad D. Strawn, Ronald W. Wright, 2009-12-14 Science and religion are living organic and creative traditions Both see humans as profoundly interconnected and in some way responsible for our environs This worldview is especially true for social science and Wesleyan religious tradition While the dance between science and religion will always be complex it can also be enjoyable and mutually satisfying However when couples dance only one at a time can lead and both have to acknowledge the importance of the other This book is written with the conviction that theology and science can have a beneficial relationship if only both recognize their mutual value to the lives of persons The Methodist tradition links the welfare of the body with care for the soul Historically ministry involved tending to physical and psychological needs of the Methodist band members but also to non-churched poor and imprisoned Thus Methodists built places of worship schools orphanages and hospitals For John Wesley the founder of Methodism practical divinity always involved attention to whole persons including their living conditions and basic physical needs He sought to improve life for all Therefore throughout his life Wesley was interested in theology but also scientific discovery as paths toward a better future He believed that both were of value to help people move

toward perfection He even attended lectures and offered medical treatment in the first Methodist meeting hall in Bristol England As a scientific practitioner Wesley wrote the best selling book Primitive Physic or An Easy and Natural Method of Curing Most Diseases using the cutting edge science of his day Packed next to the Bible this book traveled with countless pioneers as they settled the territories that became the United States Methodism has a long tradition of using science and religion to carry out the biblical mandate to go into the world and make disciples for Jesus Christ This book seeks to continue that legacy by bringing current trends in psychology into conversation with Wesleyan theology Composed of essays that represent different psychologies and theological traditions which trace their roots to Wesley this book aims at creating a space where science and theology can partner and dance In the book readers will find positive psychology self psychology object relations family systems moral psychology and neuroscience in conversation with various theologies Under this canopy the contributors see themselves as people called Methodists seeking to follow the example of Wesley to use all available tools to enable persons to live fully and well
