Globalization C. Gopinath,2018 Globalization evokes mixed responses It is praised for facilitating business greater trade between nations and reducing poverty and is also accused of causing job losses and homogenizing culture While some nations cheer its benefits others think of barriers to

protect themselves Yet everyone agrees that it is a multidimensional and complex process that continuously reshapes our environment Rather than wonder whether globalization is good or bad it is important to understand how it impacts nations organizations and individuals and be prepared to operate in that context Approaches to World Order Robert W. Cox, Timothy J. Sinclair, 1996-03-28 Robert Cox s writings have had a profound influence on recent developments in thinking in world politics and political economy in many countries This book brings together for the first time his most important essays grouped around the theme of world order The volume is divided into sections dealing respectively with theory with the application of Cox s approach to recent changes in world political economy and with multilateralism and the problem of global governance The book also includes a critical review of Cox s work by Timothy Sinclair and an essay by Cox tracing his own intellectual journey This volume will be an essential guide to Robert Cox s critical approach to world politics for students and teachers of international relations international political economy and international organisation Searching for a Demon Steven M. Chermak, 2002 This provocative volume thoroughly examines the ways in which the media demonized militia groups following the devastating bombing of the Alfred F Murrah building in Oklahoma City Using quantitative and qualitative research methods Steven M Chermak offers a fresh perspective on how news coverage and popular entertainment transformed a largely overlooked movement into a symbol for this new threat of domestic terrorism and ignited a national panic over the militia menace Searching for a Demon describes the representation of the militia movement in the news media editorial cartoons films and television Chermak delves into such topics as the type and amount of coverage after the blast how social problems are constructed in the news the motivations and biases of authoritative or celebrity figures used as news sources and why images of militias were framed in specific ways Chermak balances his account with an in depth look at the philosophies activities and strategies of militia groups Drawing on extensive interviews he conducted at gun shows and preparedness exhibitions the author compares and contrasts media depictions of militia life and ideology with the firsthand accounts of members and leaders themselves and he assesses how media coverage affected changes in the movement In conclusion Chermak discusses the parallels between media treatment of militias in the wake of the Oklahoma City bombing and the coverage of the al Qaeda terrorist network after the September 11 2001 attacks Solidly grounded in social constructionist theory Searching for a Demon fills a significant gap in the literature on terrorism as well as on the roles of the news media and popular culture in reshaping the public consciousness after dramatic crimes **Globalization and Civilizations** Mehdi Mozaffari, 2003-09-02 Globalization and Civilizations challenges established assumptions about the nature of civilizations and the supposed inevitability of the conflict between the Islamic and Western worlds Uniquely this edited book critically interrogates the concept of civilization by asking whether it is still valid in the globalized world economy of the twenty first century The first half of the book provides an historical and theoretical context to understand the idea of civilization in political science and demonstrates how the various social economic political and cultural processes of

globalization have radically altered perceptions of civilization The second half of the book looks particularly at non Western examples of the interaction between globalization and civilization and includes case studies on the Arab world Islam China India and Europe

China's Grand Strategy and Australia's Future in the New Global Order Geoff Raby,2025-05-14

The US dominated world order has been replaced by a multipolar order but its closest allies such as Australia seek to retain American primacy adding dangerously to heightened geopolitical competition between the dominant and the ascendant power China Where the first great power shift of the twenty first century was across the Pacific from the United States to China the next great power shift is now underway from Russia to China Putin s invasion of Ukraine has depleted Russia of its power and influence across Eurasia while China s continues to grow As China consolidates its power across Eurasia it can turn to project power globally just as the US did at the turn of the last century when it cemented its power over the western hemisphere Diplomatically Australia is forced to navigate an increasingly unfamiliar world where the guarantor of its security is no longer the sole dominant power while China remains its most important economic partner Is Australia agile enough to walk the fine line of supporting US primacy in the Asia Pacific while providing a bulwark against China s ambitions In China s Grand Strategy and Australia s Future in the New Global Order Geoff Raby believes something has to give and unpacks the ramifications for Australia
