Belonging in America gives voice to unspoken conventions and silent understandings and asks why our culture draws the lines it does between home and work family and friends humans and animals Throughout her fascinating book Constance Perin shows us the systems of meaning through which contemporary American create social order and define their relationships Intimate Integration Allyson Stevenson, 2021 Privileging Indigenous voices and experiences Intimate Integration documents the rise and fall of North American transracial adoption projects including the Adopt Indian and M tis Project and the Indian Adoption Project The author argues that the integration of adopted Indian and M tis children mirrored the new direction in post war Indian policy and welfare services She illustrates how the removal of Indigenous children from

Indigenous families and communities took on increasing political and social urgency contributing to what we now call the Sixties Scoop. *Intimate Integration* utilizes an Indigenous gender analysis to identify the gendered operation of the federal Indian Act and its contribution to Indigenous child removal over representation in provincial child welfare systems and transracial adoption. Specifically, women and children's involuntary enfranchisement through marriage as laid out in the Indian Act undermined Indigenous gender and kinship relationships. Making profound contributions to the history of settler colonialism in Canada, *Intimate Integration* sheds light on the complex reasons behind persistent social inequalities in child welfare.

Belonging Dustin Bindreiff, 2022-12-22. Develop a sense of safety and connection in our youth. Research shows that a sense of belonging has a profound effect on the physical, mental, and social well-being of children and adolescents. Yet current events, including the decline of community and rising tensions over racial and economic inequalities, have endangered that fragile and critical component, and nowhere is this felt more acutely than in schools. In *Belonging*, the author, who has spent decades working with the most challenging students, provides research-based strategies to strengthen relationships, build inclusive classrooms, develop trust, and foster a sense of psychological safety. Readers will find vignettes demonstrating how belonging applies to a variety of learning contexts. Research around mindsets, the development of empathy, and community building. Sections dedicated to equity and inclusion. Strategies teachers can directly apply in their classrooms. With his deep knowledge of education, behavior, and neuroscience, Dustin Bindreiff provides a fresh look at the troubling issues our students face and provides practical strategies for building a more hopeful future.

Native American Transracial Adoptees Tell Their Stories Rita James Simon, Sarah Hernandez, 2008-01-01. This study focuses on the lives of Native American transracial adoptees and their struggle to establish a healthy sense of cultural identity while being raised in non-Native homes. The twenty participants in this study focus on what methods their adoptive parents used or, in some cases, did not use to help them establish their own sense of cultural identity. In the end, most participants agreed that adoptive parents can help their adoptive child establish a healthy sense of

cultural identity by nurturing a connection between their child and their child's tribal community *Children in Mind* Jenny Perkel, 2022-04-01 A psychologist's guide for parents, care givers and health care practitioners to the emotional challenges facing children and their parents today. Current research shows that certain childhood mental disorders are diagnosed more frequently today than in previous generations. Many of today's children and teenagers are more unhappy, anxious and distressed than young people used to be. In this highly informative book, child psychologist Jenny Perkel explores in depth why this might be so, highlighting what modern day South African children and adolescents are experiencing and the environment in which they are being raised. *Children in Mind* presents a broad range of up to date findings from psychological, neurobiological, genetic, psychiatric, sociological and epidemiological research related to the diagnosis and treatment of children's mental health problems. Theoretically informed but not theoretically dense, the book cites both local and international studies to increase awareness and understanding of children's mental health. Perkel discusses a broad spectrum of issues faced by today's children and adolescents: the Covid 19 pandemic, the influence of electronic media, diverse family structures, stress and trauma and difficult socio-economic circumstances. While offering no easy answers or formulaic solutions to the problems of troubled children, she shows how to think about children's mental well-being in today's South Africa. *Children in Mind* is an invaluable resource for all those who work with troubled children and adolescents: psychologists, social workers, counsellors, educators and parents. The author's informed and compassionate approach will help equip professionals and parents to help young people navigate complex issues and make adjustments in their behavior in order to live more balanced and happier lives. *Children and the Politics of Cultural Belonging* Alice Hearst, 2012-08-27

Conversations about multiculturalism rarely consider the position of children. Yet providing care for children unanchored from their birth families raises questions central to multicultural concerns. This book explores the debate over communal and cultural belonging in three contexts: domestic transracial adoptions of non-American Indian children, the scope of tribal authority over American Indian children and cultural and communal belonging for transnationally adopted children.

Therapeutic Work for Children with Complex Trauma Nicole Vliegen, Eileen Tang, Nick Midgley, Patrick Luyten, Peter Fonagy, 2023-07-10 *Therapeutic Work for Children with Complex Trauma* offers a contemporary three-track psychodynamic treatment model to mental health professionals working with traumatised children and their caregivers. The book provides a contemporary and comprehensive approach to working with traumatised children by integrating knowledge and skills from traditional psychodynamic child psychotherapy and more contemporary trauma-informed and mentalization-based frameworks. It advocates three tracks of work: involving direct work with the child, work with the child's primary caregivers and work with the network. The book is divided into two parts. Part I of the book covers the theoretical background and Part II discusses the core components and phases of the trauma-informed and mentalization-based treatment approach. The authors bring out the specific dynamics of the psychotherapeutic work through four composite cases woven through the book. Written

in accessible language this treatment guide is primarily aimed at psychodynamically trained psychotherapists mental health professionals and professional caregivers working with traumatised children
