Searching For Certainty:

Searching for Certainty Shelly Miller, 2020-10-13 We all long for certainty in life yet things often don't go as we expect. When facing illness, job loss, strained relationships and other struggles, our impulse is to question God and strive to fix things ourselves. In this book, Shelly Miller, a trusted ministry leader, explores how difficult times can actually be purposeful times of spiritual growth. Weaving the exodus story from the Bible with her own story, she shares how to focus on God rather than trying to overcome challenges in our own limited strength. Each chapter features a simple spiritual practice to help us enjoy the peace and security that is only possible through Christ. Uncertain seasons will soon be translated as an aha instead of an oh no.

Searching for Certainty Jerry Stafford, 2013-05 When we were children in the Oklahoma hills, one of our pastimes was to pick the petals from a sunflower bloom or a daisy while saying with each petal, "She loves me, she loves me not." Thankfully, we don't have to do those kinds of things to determine whether or not God loves us because there is a way of knowing. That is through the knowledge gained by experiencing a personal relationship with Jesus Christ, His Son. How can we know? How can we confirm our experience in Christ? There are some ways we can know. Hopefully, some of these can be revealed in this attempt to describe a Christian Experience. During my more than fifty years in the ministry, I have heard many say they were not sure if they were saved, and I have seen others who claimed to be born again but denied it by their behavior. John makes it very clear in his writings in chapter five, verse twelve: "He just simply says if you have Christ, you're saved; if you don't, you aren't. Are you saved? Are you certain?" *Searching for Certainty* John L. Casti, 1993-04-08 [The Collected Works of J. Krishnamurti](#) Jiddu Krishnamurti, 2007 **A Search for Truth** Ernest J. Honigmann, 2016-08-03

The genesis of this book was in 1957 when the author was rejected from a loving courtship because he did not believe in the existence of God. To quell the pain and to understand what had happened to him, he researched the evidence as to why people believe that God exists. The result was this book, a predominance of evidence in favor of atheism. Further, the author found that truth should always be held provisionally, not permanently pending discovery of new evidence and insights. For example, the author's atheism is provisional. His search also brought a tough new world. If God does not exist, we need new concepts for the meaning of life, the basis of morality, and our unalienable Rights to Life, Liberty, and the pursuit of Happiness. This book offers his solutions to those problems. And one more thing: The author's recommendation in his final chapter for a new way to search for religious truth forms the most exciting part of this book and possibly the most prophetic. Now, in 2016, 50 years after it had been offered to the world and rejected by the publishers as a threat to their own interests, our society has come of age. And this book, with its eye-opening freshness still intact, is finally yours to learn from and to enjoy. **The Art of**

Listening J. Krishnamurti, 2022-09-09 This comprehensive record of Krishnamurti's teachings is an excellent wide-ranging introduction to the great philosopher's thought. With among others Jacob Needleman, Alain Naude, and Swami

Venkatananda Krishnamurti examines such issues as the role of the teacher and tradition, the need for awareness of cosmic

consciousness the problem of good and evil and traditional Vedanta methods of help for different levels of seekers **Smart Surveillance** Ric Simmons, 2019-08-22 Over the last decade law enforcement agencies have engaged in increasingly intrusive surveillance methods from location tracking on cell phones to reading metadata off of e mails As a result many believe we are heading towards an omniscient surveillance state and irrevocable damage to our privacy rights In Smart Surveillance Ric Simmons challenges this conventional wisdom by taking a broader look at the effect of new technologies and privacy arguing that advances in technology can enhance our privacy and our security at the same time Rather than focusing exclusively on the rise of invasive surveillance technologies Simmons proposes a fundamentally new method of evaluating government searches based on quantification transparency and efficiency resulting in a legal regime that can adapt as technology and society change **Artificial Intelligence Through Search** Chris Thornton, Benedict Du Boulay, 2012-12-06 This is an important textbook on artificial intelligence that uses the unifying thread of search to bring together most of the major techniques used in symbolic artificial intelligence The authors aware of the pitfalls of being too general or too academic have taken a practical approach in that they include program code to illustrate their ideas Furthermore code is offered in both POP 11 and Prolog thereby giving a dual perspective highlighting the merits of these languages Each chapter covers one technique and divides up into three sections a section which introduces the technique and its usual applications and suggests how it can be understood as a variant generalisation of search a section which developed a low level POP 11 implementation a section which develops a high level Prolog implementation of the technique The authors also include useful notes on alternative treatments to the material further reading and exercises As a practical book it will be welcomed by a wide audience including those already experienced in AI students with some background in programming who are taking an introductory course in AI and lecturers looking for a precise professional and practical text book to use in their AI courses About the authors Dr Christopher Thornton has a BA in Economics and a Sc in Computer Science and a DPhil in Artificial Intelligence Formerly a lecturer in the Department of AI at the University of Edinburgh he is now a lecturer in AI in the School of Cognitive and Computing Sciences at the University of Sussex Professor Benedict du Boulay has a BSc in Physics and a PhD in Artificial Intelligence Previously a lecturer in the Department of Computing Science at the University of Aberdeen he is currently Professor of Artificial Intelligence also in the School of Cognitive and Computing Sciences University of Sussex **People of Paradox** Terryl L. Givens, 2007-08-29 In People of Paradox Terryl Givens traces the rise and development of Mormon culture from the days of Joseph Smith in upstate New York through Brigham Young's founding of the Territory of Deseret on the shores of Great Salt Lake to the spread of the Latter Day Saints around the globe Throughout the last century and a half Givens notes distinctive traditions have emerged among the Latter Day Saints shaped by dynamic tensions or paradoxes that give Mormon cultural expression much of its vitality Here is a religion shaped by a rigid authoritarian hierarchy and radical individualism by prophetic certainty and a celebration of learning and intellectual

investigation by existence in exile and a yearning for integration and acceptance by the larger world. Givens divides Mormon history into two periods separated by the renunciation of polygamy in 1890. In each he explores the life of the mind, the emphasis on education, the importance of architecture and urban planning so apparent in Salt Lake City and Mormon temples around the world, and Mormon accomplishments in music and dance, theater, film, literature, and the visual arts. He situates such cultural practices in the context of the society of the larger nation and in more recent years the world. Today he observes only fourteen percent of Mormon believers live in the United States. Mormonism has never been more prominent in public life. But there is a rich inner life beneath the public surface, one deftly captured in this sympathetic, nuanced account by a leading authority on Mormon history and thought.

Confessions of a French Atheist Guillaume Bignon, 2022-06-07. A compelling spiritual memoir that traces Bignon's fascinating quest for answers to life's most profound questions. Lee Strobel: God Wasn't in His Plans Until Guillaume Bignon was a French atheist and he was perfectly happy. He was very successful as a software engineer in finance, a musician, and a volleyball player. Yet a chance encounter with a beautiful woman would change the way he thought about his life and beliefs forever. *Confessions of a French Atheist* is the unusual story of Guillaume Bignon, a man who didn't need God but who grew to believe in God after he thought through the nature of morality, the relationship between science and faith, the supernatural, and the reliability of the Bible. With rigorous reasoning, remarkable authenticity, and a sense of humor, Guillaume takes the reader on a journey of his innermost questions and surprising discoveries.

Interpreting Islam Tamara Sonn, 1996-10-10. In this book, Sonn provides the first English translation of *The History of Intellectual Movements in Islam* (1928), a seminal text of Arab modernism written by the Palestinian intellectual Bandali al-Jawzi (1871-1942). In that book, Jawzi offered the first Marxist interpretation of the history and development of Islamic thought. The continuing importance of his work lies in Jawzi's critical method of reevaluating both European orientalist and classical Muslim accounts of Islamic history. Fifty years before Edward Said's landmark *Orientalism*, Jawzi identified the vested imperial interests as the weakness in both methodologies. Sonn's translation brings to life this skillful and entertaining critique of Islamic history. Her introduction places Jawzi's thought in context with both postmodern intellectuals and Muslim reformers who continue the struggle to apply Islamic principles to contemporary life.

Signs, Search and Communication René J. Jorna, Barend van Heusden, 2011-09-15. No detailed description available for *Signs, Search and Communication*.

Cooperative search for moving targets with the ability to perceive and evade using multiple UAVs Ziyi Wang, Wencheng Zou, Sheng Li, 2023-10-28. This paper focuses on the problem of regional cooperative search using multiple unmanned aerial vehicles (UAVs) for targets that have the ability to perceive and evade. When UAVs search for moving targets in a mission area, the targets can perceive the positions and flight direction of UAVs within certain limits and take corresponding evasive actions, which makes the search more challenging than traditional search problems. To address this problem, we first define a detailed motion model for such targets and design various search information maps.

and their update methods to describe the environmental information based on the prediction of moving targets and the search results of UAVs We then establish a multi UAV search path planning optimization model based on the model predictive control which includes various newly designed objective functions of search benefits and costs We propose a priority encoded improved genetic algorithm with a fine adjustment mechanism to solve this model The simulation results show that the proposed method can effectively improve the cooperative search efficiency and more targets can be found at a much faster rate compared to traditional search methods

Essays on Consumer Search and Interlocking Directorates Silva Deželan,2001 Information is crucial to make good decisions but obtaining and providing information often comes at a cost Consumers and firms both need to balance these costs and benefits of obtaining and providing information in order to make the best decisions The research in this thesis investigates several questions that pertain to the acquisition and provision of information In the first part of this thesis it is assumed that consumers are not fully informed about the prices or availability of a product they want to buy Consumers can search for information but this comes at a cost At the same time shops can influence these costs In the first two studies in this part shops have the possibility to advertise An advertisement provides information to consumers and reduces the search costs We investigate among other things the pricing behavior of shops and the relation between search and advertising The third study in this part of the thesis considers the location choice of shops Locating together in a shopping mall reduces the search costs of consumers This increases the competition between shops and lowers the prices but we show that at the same time the sales volume increases The total effect of locating together on profits is generally positive The second part of this thesis considers director ties also named interlocks A director who has several directorships in different firms can serve as an information bridge between the different firms At the same time interlocking directors are busy and form a homogenous group Data from the Netherlands show that in The Netherlands the positive information providing effect of interlocks is outweighed by a negative busyness and homogenous group effect

Finding Faith---A Search for What Makes Sense Brian D. McLaren,2009-07-13 Does having faith mean abandoning reason

It's easy to get that impression. Still, it seems reasonable that a supremely intelligent God would want you to use your God-given intellect on your spiritual journey as much as in any other aspect of your life. Faith may not stand on rational thinking alone, but a solid faith should walk hand in hand with intellectual integrity. Does it really matter what I believe? What is the relationship between faith and knowledge? Why are there so many religions? Do all paths lead to the same God? This book helps you sort through the questions, objections, and concerns you can't help but raise. *A Search for What Makes Sense* will help you think your way clearly and honestly to answers that satisfy because they're your answers, conclusions you've arrived at personally without manipulation, coercion, or game playing. For faith to exist and grow, it's got to make sense, good sense, carefully thought-out sense. And chances are it does. **FINDING FAITH: The Finding Faith books** *A Search for What Makes Sense* and *A Search for What Is Real* don't try to tell you what to believe; they are guides in learning how to believe. If you think the spiritual journey requires turning your back on honesty and intellectual integrity, these two companion volumes will speak to both your mind and your soul. **The Search for Concreteness** Darrel E. Christensen, 1986-09 Presents a methodological basis for a philosophy of concrete actuality. Also breaks new ground in its mediation between two varied traditions of speculative philosophy. **The Trial of Dr. Briggs Before the General Assembly** J. R. Laidlaw, 1893

Search Algorithms and Applications Nashat Mansour, 2011-04-26 Search algorithms aim to find solutions or objects with specified properties and constraints in a large solution search space or among a collection of objects. A solution can be a set of value assignments to variables that will satisfy the constraints or a sub structure of a given discrete structure. In addition, there are search algorithms, mostly probabilistic, that are designed for the prospective quantum computer. This book demonstrates the wide applicability of search algorithms for the purpose of developing useful and practical solutions to problems that arise in a variety of problem domains. Although it is targeted to a wide group of readers, researchers, graduate students, and practitioners, it does not offer an exhaustive coverage of search algorithms and applications. The chapters are organized into three parts: Population-based and quantum search algorithms; Search algorithms for image and video processing; and Search algorithms for engineering applications. *In Search of a New Humanism* M.R. Egidi, 2013-04-17 This collection of essays presents a systematic and up-to-date survey of the main aspects of Georg Henrik von Wright's philosophy, tracing the general humanistic leitmotiv to be found in his vast, varied output. The analysis covers the developments in Von Wright's thought up to the end of the 1990s. The essays are arranged thematically to focus on the chief areas of Von Wright's interests: practical rationality, human action, and determinism; philosophical logic and theories of norms; research in the analytical tradition and Wittgenstein studies; Readership: Scholars and students of moral philosophy, logic, psychology, sociology, cognitive science, and the history of contemporary philosophy.
