

The background of the slide is a photograph of a rural landscape. A paved road with a yellow center line and white edge lines stretches from the bottom left towards the horizon. To the left of the road is a green grassy field enclosed by a dark wooden fence. In the background, there are several trees, some with green leaves and others with yellow and orange autumn foliage. The sky is a vibrant orange and red, suggesting a sunset or sunrise. The title text is overlaid on the upper part of the image.

Searching Beyond The Horizon:

The Great Explorers Robin Hanbury-Tenison, 2018-10-16 Penetrating biographies written by a group of distinguished travel writers, broadcasters and historians reveal the lives, motives and passions of forty major explorers in history. It has always been mankind's gift or curse to be inquisitive and through the ages people have been driven to explore the limits of the worlds known to them and beyond. Here are the stories of forty of the world's greatest explorers from Europe, America, Asia and Australia. These are men and women who changed our perception of the world through their courageous adventures. Organized thematically, the book opens with the oceanic journeys of five hundred years ago when the great era of recorded exploration began. The following sections look at The Land, Rivers, Polar Ice, Deserts, Life on Earth and New Frontiers. Many of these explorers recounted their journeys in vivid firsthand accounts; others were superb artists or photographers. The book features quotes from their journals and reports and it is illustrated with paintings, photographs, engravings and maps so that we can experience their adventures through their own eyes and in their own words. Featured explorers include Christopher Columbus, Vasco da Gama, James Cook, Lewis and Clark, Richard Burton, Samuel de Champlain, David Livingstone, Roald Amundsen, Gertrude Bell, Alexander von Humboldt, Yuri Gagarin and Jacques-Yves Cousteau. **In Search of the Hidden**

Treasure George Rapanos, 2006-12-01 *In Search of the Hidden Treasure: The Pearl of Great Worth* is a book dealing with religious transformation. It is an aggregate of various sources as diverse as Buddha, Meister Eckhart, Edna St. Vincent Millay, Samuel Taylor Coleridge, Walt Whitman and the Bible. This book is both a spiritual autobiographical affirmation of my faith and encouragement to those who wish to follow a path that may lead them to spiritual fulfillment. It evolved from a religious revelation which I had in 1984 and is an anguished, forthright attempt to come to grips with the religious issues which I found hostile and unfriendly and contained in daily life. It is not my intent to reveal a set of truths about God as much as it is an attempt to convey through prose, poetry, quotations, parables, wisdom tales and my own mythological story and poetic works the intuition of reality that touches the heart and burns and stirs the soul. I have written what I feel is crucial and important in describing the reality of truth. *Looking Beyond?*, 2012-01-01 Religion is undergoing a transformation in current Western society. In addition to organized religions, there is a notable movement towards spirituality that is not associated with any institutions but in which experiences and notions of transcendence are still important. Transcendence can be described as God, the absolute, Mystery, the Other, the other, as alterity depending on one's worldview. In this book, these shifts in the views of transcendence in various areas of culture such as philosophy, theology, art and politics are explored on the basis of a fourfold heuristic model proposed by Wessel Stoker. In conversation with this model, various authors, established scholars in their fields, explain the meaning and role or the critique of transcendence in the thought of contemporary thinkers, fields of discourse or cultural domains. *Looking Beyond* will stimulate further research on the theme of transcendence in contemporary culture but can also serve as a textbook for courses in various disciplines ranging from philosophy to theology.

Knowledge-Free and Learning-Based Methods in Intelligent Game Playing

Jacek Mandziuk, 2010-03-14 Humans and machines are very different in their approaches to game playing. Humans use intuition, perception, mechanisms, selective search, creativity, abstraction, heuristic abilities, and other cognitive skills to compensate their comparably slow information processing speed, relatively low memory capacity, and limited search abilities. Machines, on the other hand, are extremely fast and infallible in calculations, capable of effective brute force search, use unlimited memory resources, but at the same time are poor at using reasoning based approaches and abstraction based methods. The above major discrepancies in the human and machine problem solving methods underlined the development of traditional machine game playing as being focused mainly on engineering advances rather than cognitive or psychological developments. In other words, as described by Winkler and Furnkranz [347-348] with respect to chess, human and machine axes of game playing development are perpendicular, but the most interesting, most promising, and probably also most difficult research area lies on the junction between human compatible knowledge and machine compatible processing. I undoubtedly share this point of view and strongly believe that the future of machine game playing lies in implementation of human type abilities: intuition, creativity, selective attention, and other, while still taking advantage of intrinsic machine skills.

The book is focused on the developments and prospective challenging problems in the area of mind game playing, i.e. playing games that require mental skills using Computational Intelligence (CI) methods, mainly neural networks, genetic evolutionary programming, and reinforcement learning.

Looking Beyond the Runway

Nawal K. Taneja, 2016-12-05 The global airline industry facing significant changes and discontinuity is prompted and forced to deal with a new normal. Who would have imagined a few years ago that a significant percentage of consumers in the US now prefer to fly low cost airlines instead of full service airlines because they perceive the product to be better. Airlines would generate up to a third of their total income from non ticket revenue. Many low cost airlines would add complexity to their original simple business models through the development of code share agreements, the use of global distribution systems, and travel agents to distribute their seats. Jetstar, a low cost subsidiary of Qantas, would grow faster and be more profitable than its parent. A survey carried out by Ryanair would show that 42 percent of passengers would be willing to stand on short one hour flights if they could pay 50 percent less than seated passengers. Passengers could pay as little as US 2,000 for a transatlantic Business Class ticket on top brand airlines. Lufthansa would have ownership in airlines based in Austria, Belgium, Italy, Switzerland, Turkey, the UK, and the US, and that it would continue to pursue equity ownership in airlines based in Poland and Scandinavia. Or the Japanese and Canadian governments would struggle to find different ways to bail out their heretofore flag carriers. To deal with this upcoming new normal, airlines have to go beyond their short term circumstantial strategies; they need strategic renewal of their ageing business model. In this candidly written book, Nawal Taneja explains what will separate the winners from the losers. He maintains the leaders will be the airlines that 1) exploit this crisis driven change to their best advantage, 2) learn to

work around the airline inherent constraints that prevent them from running their businesses just like other businesses 3 learn from successes and failures of other global enterprises 4 sharpen their business intelligence analytics and strategic agility and 5 proactively explore the pockets of growth in this emerging markets century To help airline executives become informed of new competitive games the author analyzes numerous business sectors such as auto hospitality retail technology and entertainment For example relevant lessons can be learned from the strategic mistakes made by the US automakers Likewise emergent and compelling insights can be gained in superior customer experience from Ritz Carlton and Zappos and in value creating innovation from Cirque du Soleil and Zipcar The book also features a multitude of forewords from airlines and related businesses to provide readers with multiple perspectives on the changing landscape in the global airline industry Nawal Taneja is a career analyst of the global airline industry with wide ranging experience in the aviation industry academia and public policy Encouraged by industry executives he has written five other books for practitioners in the global airline industry including FASTEN YOUR SEATBELT The Passenger is Flying the Plane and Flying Ahead of the Airplane ,

Looking Beyond Borderlines Lee Rodney, 2016-12-19 American territorial borders have undergone significant and unparalleled changes in the last decade They serve as a powerful and emotionally charged locus for American national identity that correlates with the historical idea of the frontier But the concept of the frontier so central to American identity throughout modern history has all but disappeared in contemporary representation while the border has served to uncomfortably fill the void left in the spatial imagination of American culture This book focuses on the shifting relationship between borders and frontiers in North America specifically the ways in which they have been imaged and imagined since their formation in the 19th century and how tropes of visibility are central to their production and meaning Rodney links ongoing discussions in political geography and visual culture in new ways to demonstrate how contemporary American borders exhibit security as a display strategy that is resisted and undermined through a variety of cultural practices
