

LORENZO
THE MAGNIFICENT

*The Story
of an Orphaned
Blue Jay*

Robert Franklin Leslie

Lorenzo The Magnificent The Story Of An Orphaned Blue Jay

Lesley J. Rogers, Gisela T. Kaplan

Lorenzo The Magnificent The Story Of An Orphaned Blue Jay:

Lorenzo the Magnificent Robert Franklin Leslie,1985 In the Shadow of a Rainbow: The True Story of a Friendship Between Man and Wolf Robert Franklin Leslie,1996-08-17 In wilderness British Columbia a young Indian and a wild wolf form a close loving relationship

Bird Minds Gisela Kaplan,2015-08-03 In her comprehensive and carefully crafted book Gisela Kaplan demonstrates how intelligent and emotional Australian birds can be She describes complex behaviours such as grieving deception problem solving and the use of tools Many Australian birds cooperate and defend each other and exceptional ones go fishing by throwing breadcrumbs in the water extract poisonous parts from prey and use tools to crack open eggshells and mussels The author brings together evidence of many such cognitive abilities suggesting plausible reasons for their appearance in Australian birds Bird Minds is the first attempt to shine a critical and scientific light on the cognitive behaviour of Australian land birds In this fascinating volume the author also presents recent changes in our understanding of the avian brain and links these to life histories and longevity Following on from Gisela s well received books on the Australian Magpie and the Tawny Frogmouth as well as two earlier titles on birds Bird Minds contends that the unique and often difficult conditions of Australia s environment have been crucial for the evolution of unusual complexities in avian cognition and behaviour

Comparative Vertebrate Cognition Lesley J. Rogers,Gisela Kaplan,2012-12-06 This book explores afresh the long standing interest and emphasis on the special capacities of primates Some of the recent discoveries of the higher cognitive abilities of other mammals and also birds challenge the concept that primates are special and even the view that the cognitive ability of apes is more advanced than that of nonprimate mammals and birds It is therefore timely to ask whether primates are in fact special and to do so from a broad range of perspectives Divided into five sections this book deals with topics about higher cognition and how it is manifested in different species and also considers aspects of brain structure that might be associated with complex behavior

Songs, Roars, and Rituals Lesley J. Rogers,Gisela T. Kaplan,2002 From the calling macaw and the roaring lion to the dancing lyrebird animals all around us can be heard and seen communicating with each other and occasionally with us Why they do so what their utterances mean and how much we know about them are the subject of Songs Roars and Rituals This is a concise yet comprehensive introduction to the complexities of communication in animals Rogers and Kaplan take us on an exciting journey through communication in the animal world offering insights on how animals communicate by sight sound smell touch and even electrical signaling They explore a wide variety of communication patterns in many species of mammals and birds and discuss in detail how communication signals evolved how they are learned and what song and mimicry may mean An up to date account of the science of animal communication this book also considers modern concepts such as that of deceptive communication and modern controversies primarily those surrounding the evolution of human language and the use of symbolic language by apes It concludes with a thought provoking look at the future of communication between humans and animals
