Jarvie,2015-07-03 Anthropology revolves round answers to problems about the nature development and unity of mankind problems that are both philosophical and scientific In this book first published in 1984 Professor Jarvie applies Popper s philosophy of science to

understanding the history and theory of anthropology Jarvie describes how the ancient view that the aim of science and philosophy was to get at the truth is challenged in anthropology by the doctrine of cultural relativism that is that truth varies with the cultural framework He shows how philosophers as various as Peter Winch W V O Quine W T Jones Nelson Goodman and Richard Rorty were influenced by this doctrine Yet these philosophers also accept the value of rational argument Jarvie believes that there is a contradiction between relativism and any notion of human rationality that centres around argument Forced by the contradiction to choose between rationality and relativism he argues strongly that logical scientific and moral considerations favour rationality and urge repudiation of relativism The central argument of the book is that relativism is intellectually disastrous and has fostered intellectual attitudes from which anthropology still suffers **American**

Loren Graham, Wolf Lepenies, P. Weingart, 2012-12-06 Edward Gibbon's allegation at the beginning of his *Essay on the Study of Literature* 1764 that the history of empires is that of the miseries of humankind whereas the history of the sciences is that of their splendour and happiness has for a long time been accepted by professional scientists and by historians of science alike For its practitioner the history of a discipline displayed above all the always difficult but finally rewarding approach to a truth which was incorporated in the discipline in its actual form Looking back it was only too easy to distinguish those who erred and heretics in the field from the few forerunners of true science On the one hand the traditional history of science was told as a story of hero and hero worship on the other hand it was paradoxically enough the constant attempt to remind the scientist whom he should better forget It is not surprising at all therefore that the traditional history of science was a field of only minor interest for the practitioner of a distinct scientific discipline or specialty and at the same time a hardly challenging task for the professional historian Nietzsche had already described the historian of science as someone who arrives late after harvest time it is somebody who is only a tolerated guest at the thanksgiving dinner of the scientific community **Kubrick's Monolith** Joe R. Frinzi, 2017-07-24 Stanley Kubrick's 2001 A Space Odyssey is re-examined in a post-millennial context in this heavily researched highly detailed study of the making of the landmark film Its artistic and mythic pedigrees are of special interest Kubrick and writer Arthur C Clarke faced a number of challenges in producing an intelligent and innovative A list movie in what almost a decade before Star Wars was considered a second class genre science fiction The author explores the film's enigmatic storyline and offers a fresh perspective on several artistic elements such as production design special effects and the use of music **The Catholic Institute Magazine**, 1857 **The Oxford Handbook of Science Fiction** Rob Latham, 2014-09-01 The excitement of possible futures found in science fiction has long fired the human imagination but the genre's acceptance by academe is relatively recent No longer marginalized and fighting

for respectability science fictional works are now studied alongside more traditional art forms Tracing the capacious genre's birth evolution and impact across nations time periods subgenres and media The Oxford Handbook of Science Fiction offers an in depth comprehensive assessment of this robust area of scholarly inquiry and considers the future directions that will dictate the terms of the scholarly discourse The Handbook begins with a focus on questions of genre covering topics such as critical history keywords narrative the fantastic and fandom A subsequent section on media engages with film television comics architecture music video games and more The genre's role in the convergence of art and everyday life animates a third section which addresses topics such as UFOs
