Who's Asking? Douglas L. Medin, Megan Bang, 2014-01-03 Analysis and case studies show that including different orientations toward the natural world makes for more effective scientific practice and science education The answers to scientific questions depend on who s asking because the questions asked and the answers sought reflect the cultural values and orientations of the questioner These values and orientations are most often those of Western science In Who s Asking Douglas Medin and Megan Bang argue that despite the widely held view that science is objective value neutral and acultural scientists do not shed their cultures at the laboratory or classroom door their practices reflect their values belief systems and worldviews Medin and Bang argue further that scientist diversity the participation of researchers and educators with different cultural orientations provides new perspectives and

leads to more effective science and better science education Medin and Bang compare Native American and European American orientations toward the natural world and apply these findings to science education The European American model they find sees humans as separated from nature the Native American model sees humans as part of a natural ecosystem Medin and Bang then report on the development of ecologically oriented and community based science education programs on the Menominee reservation in Wisconsin and at the American Indian Center of Chicago Medin and Bang s novel argument for scientist diversity also has important implications for questions of minority underrepresentation in science [Here with Me](#) Christina Pickett,2023-06-08 Each of us face various challenges every day When one obstacle is resolved it is almost always replaced by another one of equal or greater value This leaves us wondering Does God really have a plan for my life This is a valid question that is asked by more people than we may realize Christina Pickett shares personal stories inspiring lessons biblical wisdom and reflective questions that lead believers on an introspective journey of hope intended to help them discover their God designed purpose and see how He works in every aspect of their lives While reflecting upon God s kindness and goodness Pickett reminds believers that He has a divine plan for their lives and that all they need to do is trust Him to move forward into becoming everything He wants them to be Included is advice on how to write a personal mission statement using scriptures as a guide Here with Me shares a spiritual journey of hope reflective questions and biblical wisdom to shine an inspiring light on God s word and reveal truths about His divine plan for all of us **Fundamentals of Modern Statistical Methods** Rand R. Wilcox,2010-03-10 Conventional statistical methods have a very serious flaw They routinely miss differences among groups or associations among variables that are detected by more modern techniques even under very small departures from normality Hundreds of journal articles have described the reasons standard techniques can be unsatisfactory but simple intuitive explanations are generally unavailable Situations arise where even highly nonsignificant results become significant when analyzed with more modern methods Without assuming the reader has any prior training in statistics Part I of this book describes basic statistical principles from a point of view that makes their shortcomings intuitive and easy to understand The emphasis is on verbal and graphical descriptions of concepts Part II describes modern methods that address the problems covered in Part I Using data from actual studies many examples are included to illustrate the practical problems with conventional procedures and how more modern methods can make a substantial difference in the conclusions reached in many areas of statistical research The second edition of this book includes a number of advances and insights that have occurred since the first edition appeared Included are new results relevant to medians regression measures of association strategies for comparing dependent groups methods for dealing with heteroscedasticity and measures of effect size *Late Bronze Age Weapon Depositions of North-Western Europe* Tobias Mörtz,2024-11-20 The European Bronze Age ca 2200 to 800 BC is characterised by the deposition of metal artefacts in very different compositions and conditions They were usually deliberately abandoned in conspicuous places especially near bodies

of water The purposes of these actions continue to be controversially interpreted in archaeological research with the spectrum of suggestions ranging from hidden treasures in times of crisis to concealed caches of craftsmen and traders to ritual offerings to superhuman beings Tobias M rtz systematically presents a specific group of these so called hoards and discusses their interpretation in a wider cultural scientific context Based on his own investigations of the original artefacts traces of wear and damage are identified on spearheads and swords from Britain France and Ireland indicating their use during violent conflicts and subsequent deliberate destruction by bending breaking crushing and burning The final concealment in wetlands and rivers ruled out a potential retrieval So were they sacrifices after warlike events What role did violence play in the Late Bronze Age Were the rituals also intended to contain it *Under a Blackberry Moon (Northwoods Dreams Book #2)* Serena B. Miller, 2013-10-15 Just a few days after she gives birth alone in the Northwoods a recently widowed young Chippewa woman stumbles into a nearby lumber camp in search of refuge and sustenance Come summer the camp owner sends Skypilot his most trusted friend to accompany Moon Song and her baby on the long and treacherous journey back to her people But when tragedy strikes off the shore of Michigan s Upper Peninsula wilderness Moon Song and Skypilot must depend on each other for survival With every step they take into the forbidding woods they are drawn closer together until the tough questions must be asked Will she leave her culture to enter his Will he leave his world to enter hers Or will they walk away from a love that seems too complicated to last With evocative descriptions of a breathtaking landscape *Under a Blackberry Moon* will sweep readers into a wild realm where beauty masks danger and only the truly courageous survive even as the sweet love story along the way tightly grips their hearts
