

New Fragments 1897

Lynn Thorndike

New Fragments 1897:

Catalogue of the Library of Charles A. Welch, 1907 Charles Alfred Welch, 1907 **The Periodical**, 1925 *The Cambridge Companion to Victorian Culture* Francis O'Gorman, 2010-01-21 Stimulating and informative new essays on many aspects of nineteenth century culture **Hidden Gospels** Philip Jenkins, 2002-12-05 This incisive critique thoroughly and convincingly debunks the claims that recently discovered texts such as the Gospel of Thomas the Gospel of Mary and even the Dead Sea Scrolls undermine the historical validity of the New Testament Jenkins places the recent controversies surrounding the hidden gospels in a broad historical context and argues that far from being revolutionary such attempts to find an alternative Christianity date back at least to the Enlightenment By employing the appropriate scholarly and historical methodologies he demonstrates that the texts purported to represent pristine Christianity were in fact composed long after the canonical gospels found in the Bible Produced by obscure heretical movements these texts have attracted much media attention chiefly because they seem to support radical feminist and post modern positions in the modern church Indeed Jenkins shows how best selling books on the hidden gospels have been taken up by an uncritical drama hungry media as the basis for a social movement that could have powerful effects on the faith and practice of contemporary Christianity

Bulletin, 1895 Consists of accessions and books in foreign languages Index Catalogue Glasgow (Scotland). Public Libraries. Possilpark district library, 1916 *Huxley's Church and Maxwell's Demon* Matthew Stanley, 2014-11-24 During the Victorian period the practice of science shifted from a religious context to a naturalistic one It is generally assumed that this shift occurred because naturalistic science was distinct from and superior to theistic science Yet as Huxley's Church and Maxwell's Demon reveals most of the methodological values underlying scientific practice were virtually identical for the theists and the naturalists each agreed on the importance of the uniformity of natural laws the use of hypothesis and theory the moral value of science and intellectual freedom But if scientific naturalism did not rise to dominance because of its methodological superiority then how did it triumph Matthew Stanley explores the overlap and shift between theistic and naturalistic science through a parallel study of two major scientific figures James Clerk Maxwell a devout Christian physicist and Thomas Henry Huxley the iconoclast biologist who coined the word agnostic Both were deeply engaged in the methodological institutional and political issues that were crucial to the theistic naturalistic transformation What Stanley's analysis of these figures reveals is that the scientific naturalists executed a number of strategies over a generation to gain control of the institutions of scientific education and to reimagine the history of their discipline Rather than a sudden revolution the similarity between theistic and naturalistic science allowed for a relatively smooth transition in practice from the old guard to the new **A History of Magic and Experimental Science: The first thirteen centuries of our era** Lynn Thorndike, 1923 A history of science and magic spanning the period from early Christianity through early modern Europe to the end of the 17th century **Who's who** Henry Robert Addison, Charles Henry Oakes, William John

Lawson, Douglas Brooke Wheelton Sladen, 1903 An annual biographical dictionary with which is incorporated Men and women of the time **Bulletin of the United States Geological Survey**, 1898
