**Papyrus in classical antiquity** Naphtali Lewis,1989     Antigonos the One-eyed and the Creation of the Hellenistic State Richard A. Billows,1990 Called by Plutarch the oldest and greatest of Alexander s successors Antigonos the One Eyed 382 301 BC was the dominant figure during the first half of the Diadoch period ruling most of the Asian territory conquered by the Macedonians during his final twenty years Billows provides the first detailed study of this great general and administrator establishing him as a key contributor to the Hellenistic monarchy and state After a successful career under Philip and Alexander Antigonos rose to power over the Asian portion of Alexander s conquests Embittered by the persistent hostility of those who controlled the European and Egyptian parts of the empire he tried to eliminate these opponents an ambition which led to his final defeat in 301 In a corrective to the standard explanations of his aims Billows shows that Antigonos was scarcely influenced by Alexander seeking to rule West Asia and the Aegean rather than the whole of Alexander s Empire     The Oxford Handbook of Papyrology Roger S. Bagnall,2011-12 Thousands of documentary and literary texts written on papyri and potsherds in Egyptian Greek Latin Aramaic Hebrew and Persian have transformed our knowledge of many aspects of life in the ancient Mediterranean and Near Eastern worlds Here experts provide a comprehensive guide to understanding this ancient documentary evidence     The Book Keith Houston,2016-08-18 A masterful and overwhelmingly entertaining volume Clea Simon Boston Globe In The Book Keith Houston reveals that the paper ink thread glue and board from which a book is made tell as rich a story as the words on its pages In an invitingly tactile history of this 2 000 year old medium Houston follows the development of writing printing the art of illustrations and binding to show how we have moved from cuneiform tablets and papyrus scrolls to the hardcovers and paperbacks of today     The Frontiers of Ancient Science Brooke Holmes,Klaus-Dietrich Fischer,2015-03-30 Our understanding of science mathematics and medicine today can be deeply enriched by studying the historical roots of these areas of inquiry in the ancient Near East and Mediterranean The fields of ancient science and mathematics have in recent years witnessed remarkable growth The present volume brings together contributions from more than thirty of the most important scholars working in these fields in the United States and Europe in honor of the eminent historian of ancient science and medicine Heinrich von Staden Professor Emeritus of Classics and History of Science at the Institute of Advanced Study and William Lampson Professor Emeritus of Classics and Comparative Literature at Yale University The papers range widely from Mesopotamia to Ancient Greece and Rome from the first millennium B C to the early medieval period and from mathematics to philosophy mechanics to medicine representing both a wide diversity of national traditions and the cutting edge of the international scholarly community
