The Amazon, Giver of Life, Unleashes the Pandemic

Photographs by TYLER BICKS | Written by JULIE TURKIEWITZ and MANUELA ANDREONI

The pandemic is battering Brazil, overwhelming it with more infections and deaths than any country except for the United States. And the Amazon region, so isolated as it may seem, has seen the greatest loss of life, with citizens along the river suffering the highest death rates than the national average. Even in remote towns, people have been as likely to get sick as in New York City. Since the 1500s, waves of epidemics have traveled the river,

seeking gold, land and converts — and later, rubber, helping to fuel the Industrial Revolution and change the world. But they have also brought smallpox, measles and other diseases, killing millions and wiping out communities. Now the virus, introduced to the region by a traveler from England, is spreading along the Amazon River, the region's most vital artery — and its biggest source of contagion.
