Political Economy Of Manufacturing Protection:

The Political Economy of Manufacturing Protection Christopher Findlay, Ross Garnaut, 2017-10-10 Protection is a persistent feature of economic policy in developed and developing countries alike. However, it is now widely accepted that high protection holds back economic growth. Why is protection so pervasive when it is widely recognised to be against the national interest of the countries which impose it? This contradiction is the focus of this important volume, first published in 1986. Economists from the Philippines, Thailand, Malaysia, Singapore and Australia have written about their countries and draw conclusions on the causes of protection from statistical analysis and from interindustry structure. The Political Economy of Manufacturing Protection in Indonesia 1975-1995 Muhammad Chatib Basri, 2001. The Political Economy of East Asia Ming Wan, 2007-10-17. For students of international political economy, it is hard to ignore the growth dynamism and global impact of East Asia. Japan and China are two of the largest economies in the world in a region now accounting for almost 30 percent more trade than the United States. Canada and Mexico combined. What explains this increasing wealth and burgeoning power? In his new text, Ming Wan illustrates the diverse ways that the domestic politics and policies of countries within East Asia affect the region's production, trade, exchange rates and development, and are in turn affected by global market forces and international institutions. Unlike most other texts on East Asian political economy that are essentially comparisons of major individual countries, Wan effectively integrates key thematic issues and country-specific examples to present a comprehensive overview of East Asia's role in the world economy. The text first takes a comparative look at the region's economic systems and institutions to explore their evolution, a rich and complex story that looks beyond the response to Western pressures. Later chapters are organized around close examination of production, trade, finance and monetary relations. While featuring extended discussion of China, Japan, South Korea and Taiwan, Wan is inclusive in his analysis with coverage including Myanmar, Thailand, Laos, Vietnam, Cambodia, Malaysia, Singapore, Indonesia, Brunei and the Philippines. The text is richly illustrated with more than fifty tables, figures and maps that present the latest economic and political data to help students better visualize trends and demographics. Each chapter ends with extensive lists of suggested readings. *The Political Economy of Policy Reform* John Williamson, 1994. Policymakers around the world have increasingly agreed that macroeconomic discipline, microeconomic liberalization and outward orientation are prerequisites for economic success. But what are the political conditions that make economic transformation possible? At a conference held at the Institute for International Economics, leaders of economic reform recounted their efforts to bring about change and discussed the impact of the political climate on the success of their efforts. In this book, these leaders explore the political conditions conducive to the success of policy reforms. Did economic crisis strengthen the hands of the reformers? Was the rapidity with which reforms were instituted crucial? Did the reformers have a honeymoon period in which to transform the economy? The authors answer these and other questions as well as providing first-hand accounts of the politically charged atmosphere surrounding reform.
