The Economics of Biofuels Stefania Bracco, 2016-06-17 Biofuels are a renewable source of energy used mainly for transportation They link together food energy and natural resources sectors and involve ecological social and inequality issues They are an emblematic example of the interactions between economic environmental social and political decisions and as a recent and complex issue require updated and detailed information to be understood This book aims to shed light on several economic social and environmental issues connected to biofuel production and policies The Economics of Biofuels adopts detailed descriptions rigorous data analysis and precise econometric methods to estimate the effects of biofuel on different socio economic factors avoiding complicated and sometimes ineffective models based on context specific parameters In particular the book focuses on the impact of bioenergy policy on biocommodity production and trade and on the related phenomenon of land acquisitions to grow biofuel commodities The book's main findings are derived by an original and unique dataset collecting information on the investors acquiring land in Africa and on the voluntary standard certification and labelling schemes adopted by them as Corporate Social Responsibility CSR strategy The analysis links together in an original way public and private initiatives to make biofuel sustainable Therefore this book represents an improvement in the understanding of biofuel production and policy's sustainability This book is of interest to those who study environmental economics agricultural economics and sustainable development It is also suitable for those in the renewable energy sector with a particular focus on biofuel sustainability

Sustainable Diets Pamela Mason, Tim Lang, 2017-03-27 How can huge populations be fed healthily equitably and affordably while maintaining the ecosystems on

which life depends The evidence of diet's impact on public health and the environment has grown in recent decades yet changing food supply consumer habits and economic aspirations proves hard This book explores what is meant by sustainable diets and why this has to be the goal for the Anthropocene the current era in which human activities are driving the mismatch of humans and the planet Food production and consumption are key drivers of transitions already underway yet policy makers hesitate to reshape public eating habits and tackle the unsustainability of the global food system The authors propose a multi criteria approach to sustainable diets giving equal weight to nutrition and public health the environment socio cultural issues food quality economics and governance This six pronged approach to sustainable diets brings order and rationality to what either is seen as too complex to handle or is addressed simplistically and ineffectually The book provides a major overview of this vibrant issue of interdisciplinary and public interest It outlines the reasons for concern and how actors throughout the food system governments producers civil society and consumers must engage with un sustainable diets
