ascendance After 1970 the commune emerged as a hybrid institution including both collective and private elements with a high degree of local control over economic decision but almost no say over political ones It had an integrated agricultural research and extension system that promoted agricultural modernization and collectively owned local enterprises and small factories that spread rural industrialization The commune transmitted Mao s collectivist ideology and enforced collective isolation so it could overwork and underpay its households Eisenman argues that the commune was eliminated not because it was unproductive but because it was politically undesirable it was the post Mao leadership led by Deng Xiaoping not rural residents who chose to abandon the commune in order to consolidate their control over China Based on detailed and systematic national provincial and county level data as well as interviews with agricultural experts and former commune members Red China s Green Revolution is a comprehensive historical and social scientific analysis that fundamentally challenges our understanding of recent Chinese economic history
