La Red Inteligente: Ahorro energético y Telecomunicaciones, 2006-10-16 *Redes de transmisión de datos y proceso distribuido* Uyless D. Black, 1987 *Estudios jurídicos hispano-lusos de los servicios en red. (Energía, telecomunicaciones y transportes) y su incidencia en los espacios naturales protegidos* Isabel González Ríos, José Francisco Alenza García, 2015 Esta obra constituye un estudio de los servicios liberalizados prestados en red energía, telecomunicaciones y transportes elaborado por profesores especialistas en la materia de varias Universidades españolas y de la Universidad de Coimbra. Dos son las aportaciones principales que se recogen en este libro: por un lado la realización de una investigación comparada del Derecho Portugués y Español en el marco del Derecho Comunitario de los citados servicios y de las infraestructuras que les sirven de soporte; y por otro lado la presentación de las principales reformas normativas y pronunciamientos jurisprudenciales que les afectan y que en gran parte están condicionadas por la actual situación de crisis económica. En esta línea se incluyen trabajos que tratan temas de gran actualidad e intereses para los tres servicios estratégicos. Por lo que respecta a la energía se han estudiado los desafíos del sector eléctrico ante la incorporación de las energías renovables, la incidencia que el autoconsumo eléctrico presenta para el sistema, el aprovechamiento de fuentes de energía como los residuos, la búsqueda de nuevas formas de extracción de hidrocarburos como el fracking y la necesidad de reforzar las interconexiones de redes energéticas. En el ámbito de las telecomunicaciones se han expuesto los problemas derivados del establecimiento de redes de telecomunicaciones y de la utilización del dominio público radioeléctrico, así como la protección de los usuarios y el papel de la Administración pública no solo como ente regulador sino como operador de telecomunicaciones. En materia de transportes donde se trata el transporte aéreo marítimo y terrestre además de la importante sistematización de esta materia destaca un novedoso estudio sobre la movilidad sostenible. Y por último, como no podía ser de otro modo, se exponen los problemas que para los espacios naturales protegidos presentan las infraestructuras en red y las técnicas jurídicas para resolverlos.
