McDonald,1996-11-22 For five years McDonald charted the progress of ten schools in the Coalition of Essential Schools as they immersed themselves in the hard work of school reform He also visited many other schools both elementary and secondary in an attempt to understand serious school reform and its prospects He concludes that school reform requires redesign in three critical areas The first is a shift in the ordinary and often tacit beliefs of the people who work in schools the communities that support them and even the children who attend them The second area which McDonald dubs the wiring arena involves internal communication and power arrangements The third area called tuning involves connecting the school to the needs interests and values of the communities it serves   The Politics of Education and the New Institutionalism Robert L. together a collection of essays by Hannu Simola and his colleagues this book analyses the key dimensions of schooling in Finland to provide a critical analytical and uncompromising picture of the Finnish education system Going beyond the story of success the book reveals the complexities of educational change but also identifies opportunities and alternatives for smart political action in complex and trans national societies Including a selection of key chapters on Finnish education policy and governance teacher education and classroom cultures the book will be of interest to researchers academics and postgraduate students in comparative education teacher education educational policy and educational reform *Comprehensive Systems Design: A New Educational Technology* Charles Reigeluth,Bela H.
