Radical Unionism in the Midwest, 1900-1950 Rosemary Feurer, 2006 In *Radical Unionism in the Midwest 1900-1950* Rosemary Feurer examines the fierce battles between Midwestern electrical workers and bitterly anti union electrical and metal industry companies during the 1930s and 40s Organized as District 8 of the United Electrical Radio and Machine Workers UE and led by open Communist William Sentner workers developed a style of unionism designed to confront corporate power and to be a force for social transformation in their community and nation Feurer studies District 8 through a long lens establishing early twentieth century contexts for these conflicts Exploring the role of radicals in local movement formation Feurer argues for a civic unionism that could connect community and union concerns to build solidarity and contest the political economy District 8 s spirited unionism included plant occupations in St Louis and Iowa campaigns to democratize economic planning and local strategies for national bargaining that were depicted as a Communist conspiracy by a corporate influenced Congressional committee in Evansville Indiana District 8 was destroyed through reactionary networks and the anti Communist backlash of the mid twentieth century but Feurer argues that its history tells another side of the labor movement s formation in the 1930s and 40s and can inform current struggles against corporate power in the modern global economy A website with more photographs and documents is available at www.radicalunionism.niu.edu

Dock Workers Sam Davies, Colin J. Davis, David de Vries, Lex Heerma van Voss, Lidewij Hesselink, Klaus Weinbauer, 2017-09-29 Workers who loaded and unloaded ships have formed a distinctive occupational group over the past two centuries As trade

expanded so the numbers of dock labourers increased and became concentrated in the major ports of the world This ambitious two volume project goes beyond existing individual studies of dock workers to develop a genuinely comparative international perspective over a long historical period Volume 1 contains studies of 22 major ports worldwide Built around an agreed framework of issues these port studies examine the type of workers who dominated dock labour their race class and ethnicity the working conditions of dockers and the role of government as employer arbitrator and supporter The studies also detail how dockers organized their labour patterns of strike action and involvement in political organizations The structure of the port city is also outlined and descriptions given of the waterside environment These areas of investigation form the basis for a series of 11 thematic studies which comprise Volume 2 Drawing on the information provided in the port studies these essays identify important aspects and recurring themes and explain how and why particular cases diverge from the rest The final chapter of the book synthesizes the various approaches taken to offer a model which suggests several configurations of dock labour and presents suggestions for future research This major scholarly achievement represents the most sustained attempt to date to provide a comparative international history of dock labour An annotated bibliography completes this essential reference work

Citizen Employers Jeffrey Haydu, 2019-06-30 The exceptional weakness of the American labor movement has often been attributed to the successful resistance of American employers to unionization and collective bargaining However the ideology deployed against labor's efforts to organize at the grassroots level has received less attention In *Citizen Employers* Jeffrey Haydu compares the very different employer attitudes and experiences that guided labor capital relations in two American cities Cincinnati and San Francisco in the period between the Civil War and World War I His account puts these attitudes and experiences into the larger framework of capitalist class formation and businessmen's collective identities Cincinnati and San Francisco saw dramatically different developments in businessmen's class alignments civic identities and approach to unions In Cincinnati manufacturing and commercial interests joined together in a variety of civic organizations and business clubs These organizations helped members overcome their conflicts and identify their interests with the good of the municipal community That pervasive ideology of business citizenship provided much of the rationale for opposing unions In sharp contrast San Francisco's businessmen remained divided among themselves opted to side with white labor against the Chinese and advocated treating both unions and business organizations as legitimate units of economic and municipal governance *Citizen Employers* closely examines the reasons why these two bourgeoisies located in comparable cities in the same country at the same time differed so radically in their degree of unity and in their attitudes toward labor unions and how their views would ultimately converge and harden against labor by the 1920s With its nuanced depiction of civic ideology and class formation and its application of social movement theory to economic elites this book offers a new way to look at employer attitudes toward unions and collective bargaining That new approach Haydu argues is equally applicable to understanding challenges facing the American labor movement today
