Health in the European Union Philipa Mladovsky, 2009 Good health is a fundamental resource for social and economic prosperity and Europe has seen improvements over the past few decades in both health status and living and working conditions But this study investigates differences in health status within and between European countries and examines some of the challenges faced by those seeking a healthier and more equitable society Within the context of the European Union the range of living conditions has widened tremendously in recent years as the Union has gone through an enlargement process This diversity has translated into varied patterns of health across the region Inequalities in income education housing and employment have directly or indirectly affected public health In addition certain diseases and causes of death are more likely to affect young people whereas most are associated with older ages All these factors need to be taken into account and this study addresses some of the complexities involved This book discusses and analyzes the relationship between living conditions socioeconomic factors and health with the objective of framing a debate and policy action to create a healthier and fairer society across Europe This study will stimulate focused discussion by offering an essential overview of key issues affecting European nations and the health and well being of their peoples

social problems in poorer societies The Handbook explores the theory of the weakness of the strong in other words strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies This theory is clearly illustrated in this volume by the aftermath of September 11 2001 depicting the vulnerability of the U S to social problems in far removed corners of the world In addition the international and comparative essays in this volume cover other important issues such as the impact of modern technologies on social problems ecological problems global inequality health as a social problem and much more The Handbook of Social Problems is a vital resource for sociologists and graduate students as well as an excellent addition to any academic library

Trends in EU Health Care Systems Winfried de Gooijer,2007-03-20 For decades the nations of the European Union wrote the book on universal health coverage Recent economic developments however have created problems ranging from widening inequities of care to growing numbers of uninsured a progression expertly described by Win de Gooijer in *Trends in EU Health Care Systems* De Gooijer s dual background as an economist and the CEO of Dutch health care corporations together with his broad international experience give him a unique understanding of his subject He traces world economic currents that have affected quality of and access to health care throughout the EU trends that took years to develop but are coming to rapid fruition Comparative illustrations from Europe and the US show national interests at odds with global ones as governments transfer social responsibilities to market driven agencies Included in his discussion Expansion versus reform a forty year analysis of Europe s health care systems Why governments cannot completely control the always evolving dynamics of health care Ethical and medical issues arising from the continent s changing politics

Predictions on future directions in EU health care how much change is possible how much is necessary Some may find De Gooijer's ideas startling and the book is bound to be the subject of controversy But it is critical reading for health care managers and policymakers politicians and insurers advanced students of public health in short anyone looking to Europe for the next phase of this far reaching evolution This book is a very important contribution to the debate about the future direction of health policy in Europe It captures the economic and social trends that underpin health systems with a keen and objective eye and poses some very challenging questions about the future It will not be a comfortable read for politicians but it is a book that must be read Brian Edwards President of the European Hospital and Health Care Federation HOPE The concept of subsidiarity is prohibitive to a sound discussion of health care systems on a European level Economic principles dominate the debate and their consequences for health care are hardly understood The author bridges the gap between economic and health care developments and wrote a book that is essential reading for policy makers and health care managers who really care Rob Koning Past President of the European Health Management Association EHMA The future development of European health policy should not be an exclusively political affair Hospital managers should also be actively involved particularly as regards the design and organization of present and future European hospitals For this purpose this book is a useful and well founded manual It not only clarifies the dangers but also points to the challenges and possible alternative policy options Therefore this book should be in the boardroom of each and every European hospital Willy Heuschen Secretary General of the European Association of Hospital Managers EAHM Win de Gooijer brings immense clarity to a complex issue In this book he draws major and new conclusions and raises many challenging questions We hope this book will draw the attention it deserves Gerard Vincent President International Hospital Federation
