Here Is Where Andrew Carroll,2014-05-06 Here Is Where chronicles Andrew Carroll s eye opening and at times hilarious journey across America to find and explore unmarked historic sites where extraordinary moments occurred and remarkable individuals once lived Sparking the idea for this book was Carroll s visit to the spot where Abraham Lincoln s son was saved by the brother of Lincoln s assassin Carroll wondered How many other unmarked places are there where intriguing events have unfolded and that we walk past every day not realizing their significance To answer that question Carroll ultimately trekked to every region of the country by car train plane helicopter bus bike and kayak and on foot Among the things he learned Where in North America the oldest sample of human DNA was discovered Where America s deadliest maritime disaster took place a calamity worse than the fate of the Titanic Which virtually unknown American scientist saved hundreds of millions of lives Which famous Prohibition agent was the brother of a notorious gangster How a 14 year old farm boy s brainstorm led to the creation of television Featured prominently in Here Is Where are an abundance of firsts from the first use of modern anesthesia to the first cremation to the first murder conviction based on forensic evidence outrages from riots to massacres to forced sterilizations and breakthroughs from the invention inside a prison of a revolutionary weapon to the recovery deep in the Alaskan tundra of a super virus to the building of the rocket that made possible space travel Here Is Where is thoroughly entertaining but it s also a profound reminder that the places we pass by often harbor amazing secrets and that there are countless other astonishing stories still out there waiting to be found Look for Andrew s new book My Fellow Soldiers **Scotty's Castle** Linda W. Greene,1991 **Science at the Extreme** Peter Lane Taylor,2001 Chronicles the adventures of the men and women who are not only scientists but explorers devoted to unraveling the mysteries of the natural world **National Parks** ,1988 **National Parks of the West** Fodor's,1998 In New Digital Musical Instruments Eduardo Reck Miranda and Marcelo Mortensen Wanderley focus on musical instruments that use the computer as the main sound generating device Such instruments often consist of a gestural controller driving the musical parameters of a sound synthesizer in real time Over the last few decades a community that remained largely marginalized by the academy and industry for a number of years has been the source of various interesting developments in this area Apart from a few papers scattered in various journals and the proceedings of the relatively new NIME New Interfaces for Musical Expression conference there is no concise literature on this fascinating new topic This book is an attempts to introduce such developments and inform researchers and musicians interested in designing new digital instruments with control and interaction beyond the conventional keyboard paradigm BOOK JACKET **Catalog** Denver Public Library. Conservation Library,1974 **Sequoia-Kings Canyon** William C. Tweed,1980
