

REFERENCE GROUP (SOCIOLOGY)

A reference group is a group of people whose norms influence a person's behaviors. We use the group as a 'frame of reference' to make behavioral decisions.

DEFINITION

The concept of reference groups gives us a lens through which we can understand how group norms influence our behaviors. It demonstrates that we tend to want emulate the behaviors of the groups we identify with or aspire toward (our 'in groups'), and avoid behaviors of the groups with which we do not identify (our 'out groups').

EXAMPLES

- **Membership Reference Groups:** Groups with which we feel affiliation, so we try to uphold their norms and behaviors.
- **Aspirational Reference Groups:** Groups we aspire to be part of, so we emulate their behaviors and norms.
- **Dissociative Reference Groups:** Groups a person wants to ensure they are not associated with.

American and Canadian sociology By contrasting on how researchers use theories Dr Menzies is able to reassess several theories For instance symbolic interactionist research uses embedded causal claims and stands in a dialectical relationship to other sociological research while the research version of conflict theory depends on external causes to explain social change The implications of using statistical techniques like factor analysis and regression are also considered in relation to the form of explanation The Oxford Handbook of Psychological Situations John F.
