She explains how to use the occipital zones of craniosacral therapy to pinpoint which zones and points on the hands to treat. Examining the psychological level of brain-hand interactions, the author reveals how neurological dysfunctions and mental disorders respond more readily to hand reflexology than to other forms of therapies. She explains how many physical ailments have a psychological component and how reflexology automatically triggers the release of endorphins by working directly on the autonomic nervous system. The author explores the role of nutritional supplements including Omega 3s as a support to reflexology therapy and shows how finely tuned reflexology stimulates the body's self-healing abilities and cellular regeneration, making this an indispensable resource for holistic health practitioners and for home self-care.
