## **Reform And Transformation In Eastern Europe Soviet Type Economies On The Threshold Of Change:**

*Reform and Transformation in Eastern Europe* János Mátyás Kovács, Márton Tardos, 1992 Can the economies of Eastern Europe make the dramatic transition from centrally planned to market led economies This is one of the most important and topical issues to arise from the events of 1989 90 Prior to the failure of communism in the Eastern Bloc reform minded economists had experimented with the concepts of market socialism which presented no real challenge to the basics of the Soviet type system However those same economists are now formulating radical proposals for de regulation privatization and political democratization Reform and Transformation in Eastern Europe tries to understand the intellectual background that changed these reformers into transformers and examines the problems of managing this dramatic transition It demonstrates the rediscovery of economic liberalism in Eastern Europe and provides a fresh look at economics in this area The book is also theoretically important Reform economics is treated as a legitimate scientific problem in the history of economic thought rather than an obscure ideological corollary of practical reform making as it is usually considered The contributors include some of the most distinguished economists and policy makers in Europe The book examines its subject from three perspectives Western liberal economics the likely future Stalinism the past and the prospects for successful transition Reform and Transformation in Eastern Europe offers a distinctive insight into one of the major issues facing the new governments of Eastern Europe

*Reform and Transformation in Eastern Europe* János Mátyás Kovács, Márton Tardos, 1992-06-04 First published in 1992 Routledge is an imprint of Taylor Francis an informa company **Consistency and Viability of Islamic Economic Systems and the Transition Process** J. Marangos, 2013-08-27 Consistency and

Viability of Islamic Economics Systems and the Transition Process outlines the transition problem for non market economies and creates an analytic framework for understanding the cause and effect of these economies Reform of the Socialist System in Central and Eastern Europe Martin J. Bull, Mike Ingham, 2016-07-27 This book analyzes the reform of the socialist system in Central and Eastern Europe and the former Soviet Union Uniquely it adopts a multi disciplinary perspective which includes authors from both Western Europe and the former Communist world The volume contains analyses of the prospects for civil society economic reform and privatisation theories of economic transition and the role of the state political change and the persistence of former Communist parties the prospects for democracy in the former Soviet Union and gender aspects of labour market reform

The East European Economy in Context David Turnock, 2003-09-02 Since 1989 the former communist countries of Eastern Europe have witnessed a profound and dramatic upheaval The economic coherence of this region formerly maintained through the adoption of the Soviet system of government has fractured In The East European Economy in Context Communism and Transition David Turnock examines the transition from communist to free market economies both within and between the states of Eastern Europe As well as containing an informative survey of the impact of communism The East European Economy in Context provides Political profiles of individual countries A clear study of the

contrasts between northern and balkan groups Summaries of regional variations in the transition process An exploration of the new state structures and resources Discussion of political stability inter ethnic tensions and progress in economic change

**Agriculture in Liberalizing Economies** DINA L. UMALI, Charles Maguire, 1995 Discusses ways in which the role of the state in promoting agricultural growth and development may be redefined This report presents the proceedings of the 14th World Bank Agricultural Symposium held in January 1994 The papers explore ways in which the role of the state in promoting agricultural growth and development may be redefined They also capitalize on important lessons emerging from experiences around the world The report suggests that changing the role of government from market domination towards the provision of a regulatory framework that facilitates private sector activity is an ongoing process rather than a one time occurrence The papers also illustrate the wide variety of issues and the different approaches in the various countries that are redefining the role of government in agricultural development

#### **Alternative Political Economy Models of Transition**

John Marangos, 2017-07-05 The collapse of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition

**Alternative Political Economy Models of Transition** Marangos, *Agricultural Cooperatives In Transition* Csaba Csaki, Yoav Kislev, 2021-11-28 Originally published in 1993 this is a study of agricultural co operatives The farming structure in transition countries has shifted from dominance of large corporate farms to family smallholdings Smallholders everywhere experience difficulties with access to market services including sale of products purchase of inputs and acquisition of machinery they

suffer from credit shortages and have limited access to information and advisory services. The barriers to market access prevent smallholders from fully exploiting their inherent productivity advantages. Best practice world experience highlights farmers service cooperatives created by grassroots users as the most effective way of improving the market access of small farmers. Service cooperatives also help smallholders overcome market failures when private business entrepreneurs are unwilling to provide services in areas that they judge unprofitable or unfairly exploit users through monopolistic practices. These difficulties and market failures are prominent in transition countries and scholars accordingly expected rapid development of agricultural service cooperatives in response to smallholder needs. The present volume explores gaps between expectations and reality.

**Postcommunist Transformation and the Social Sciences** Frank Bönker, Klaus Müller, Andreas Pickel, 2003-08. The work's major substantive themes revolve around problems of post communist socio economic transformations. Specifically it explores post communist systemic change, the role of religion and collective identity, the significance of trust and economic culture, patterns of state economy interactions in enterprise restructuring, the context of EU expansion, the strengths and weaknesses of economic theory and neo liberal doctrine and the history of ideas in the post communist transformation debate.

*New Asian Disorder* Lowell Dittmer, 2021-12-14. In *New Asian Disorder* Rivalries Embroiling the Pacific Century Lowell Dittmer and his team explore the recent political disorder in East Asia resulting from growing Sino American polarization. The rise of China in recent years is widely regarded as a momentous shift in the global balance of power. China is now extending sovereignty into the East China Sea and the South China Sea, constructing a new set of global financial institutions and replacing universal values with technologically enhanced nationalism. The country's Belt and Road Initiative is also tainted by the vast ambition to realize the China Dream within the foreseeable future. In response to China's challenge, the United States has abandoned its constructive engagement policy towards the rising power and engaged in a trade war. Sino American relations have been at a historical trough since the normalization of their relationship in the late 1970s. This book sheds new light on the current political disorder in the East Asian international arena. The new Asian disorder is analyzed from three perspectives: the first focuses on identity, the second on political economy and the third on the triangular dynamic. This collection of essays concludes that unless and until consensus can be reached on a coherent new framework for cooperation and rule enforcement among different stakeholders in East Asia, the current disorder may be expected to persist. Focusing on the impact of Xi Jinping and Donald Trump, this book sees rivalries undermining the post Cold War order but not leading to a full breakdown. Stress is on identities, strategies and triangles related to the Sino US rivalry. Dittmer argues that these factors will drive further changes. Readers will find a diversity of approaches on a most critical bilateral relationship. Gilbert Rozman, Princeton University, editor of *The Asian Forum*. A great read to better comprehend the New Asian Disorder that the growing China US rivalry has been contributing to, as well as its implications for the other actors of the region, be they big as Japan or smaller as Australia, Southeast Asian nations or Taiwan.

 Inalco Paris      **Industrial Policy in Eastern Europe** J.M. Van Brabant, 2012-12-06 This volume in essence continues my recent contributions towards building up a better understanding of the wide range of obstacles besetting the transitions away from administrative planning in the former communist regimes in the eastern part of Europe It is self contained however As such it specifically addresses issues revolving around how best to govern economies and indeed societies more generally that are undergoing fundamental structural transformation and whether industrial policy can facilitate progressing with the vexing transformations that will have to be enacted over a protracted period of time Because of the bewildering variety of hindrances that the managers of the transition have been confronted with many of which were not even contemplated when the programs were first designed regaining a measure of good governance including notably good economic governance is critical in formulating a positive political economy of transition Arguably most critical is steering the processes of destruction and creation not creative destruction in the Schumpeterian sense In some cases this requires reallocating decommissioned resources both capital and labor to new activities Changing rules on the utilization of existing assets is evidently at the core of what the transition towards market based economic systems should be all about Very often however this requires establishing new economic activities from domestic and foreign savings      **Soviet History, 1917-53** Julian Cooper, Maureen Perrie, E. A. Rees, 2016-02-06 This work presents eleven studies in the field of Russian Soviet economic and social history which have been specially commissioned as a tribute to Professor R W Davies Each chapter highlights a particular area of controversy and illuminates the process of policy formation in this critical period of Soviet development Together they provide an overview of the period 1917-1953      Democracy and Development A. Bagchi, 1995-10-13 The relationship between economic development and political systems is of major importance in today's rapidly changing world This is the issue addressed in this volume by an international team of academics drawn from the social sciences The chapters range from a theoretical exploration of the measurement of development and collective well being under both democracy and dictatorship to case studies of the workings of different political regimes around the world Of particular interest are models of political and economic equilibrium in procedural democracies and the detailed exploration of the working of economic systems that have operated as formal democracies for some time Specialists in comparative analysis will find the chapters on the prospects for democracy and development in countries such as China South Africa and eastern Europe of special interest      *Competing Economic Paradigms in China* Steven Mark Cohn, 2017-09-05 When the Chinese economic reforms began in 1978 Marxist economics infused all the institutions of economic theory in China from academic departments and economics journals to government departments and economic think tanks By the year 2000 neoclassical economics dominated these institutions and organized most economic discussion This book explains how and why neoclassical economic theory replaced Marxist economic theory as the dominant economics

paradigm in China It rejects the idea that the rise of neoclassical theory was a triumph of reason over ideology and instead using a sociology of knowledge approach links the rise of neoclassical economics to broad ideological currents and to the political economic projects that key social groups inside and outside China wanted to enable The book concludes with a discussion of the nature of economic theory and economics education in China today **Globalization against Democracy**

Guoguang Wu,2017-04-24 Globalization has reconfigured both the external institutional framework and the intrinsic operating mechanisms of capitalism The global triumph of capitalism implies the embracing of the market by the state in all its variants and that global capitalism is not confined to the shell of nation state democracy Guoguang Wu provides a theoretical framework of global capitalism for specialists in political economy political science economics and international relations for graduate and undergraduate courses on globalization capitalism development and democracy as well as for the public who are interested in globalization Wu examines the new institutional features of global capitalism and how they reframe movements of capital labor and consumption He explores how globalization has created a chain of connection in which capital depends on effective authoritarianism while democracy depends on capital Ultimately he argues that the emerging state market nexus has fundamentally shaken the existing institutional systems harming democracy in the process

*After the Deluge* Daniel Treisman,2001 Explains why Russia does not dissolve into independent countries **Political Economy of Transition** Jozef M. van Brabant,2012-11-12 This book addresses the policy questions surrounding the challenge of transforming eastern European economies from their planned administrative past to vibrant market based entities Jozef van Brabant considers in turn the wider set of challenges facing these economies stabilization privatization liberalization institution building and developing and maintaining the sociopolitical consensus before examining the evolving role of the state Using concrete examples from the eastern European countries throughout including the Czech Republic and Bulgaria this work systematically examines in a society wide context the initial conditions of transformation the policy tasks ahead and the manner in which policies have been pursued **Markets in the Name of Socialism** Johanna Bockman,2011-07-26

Challenging conventional accounts *Markets in the Name of Socialism* chronicles a transnational dialogue among economists on both sides of the Iron Curtain about democracy socialism and markets These exchanges led to the transformations of 1989 and unintentionally the rise of neoliberalism **Comparative Economic Studies in Europe** Wladimir Andreff,2020-11-16
