economy readers have the need for a fresh understanding of how China came to be what it is today The author s groundbreaking work provides new insight provided by newly uncovered sources explaining how China came to be what it is today from a cultural and sociological perspective in a historical mode *China After Socialism: In the Footsteps of Eastern Europe or East Asia?* Barrett L. McCormick,Jonathan Unger,2017-07-05 Nine specialists from four continents address the following questions is China moving toward the type of developmental state and sophisticated economic powerhouse associated with the East Asian miracle does China s Leninist political system and the heritage of a state run heavy industrial sector present too great a burden for successful transformation and what is the likelihood that China s party state will ultimately collapse in a fashion similar to the Leninist governments of Europe The findings and analyses should prove interesting to followers of China East Asia as a whole and the European postcommunist transition **Heritage for development in South-East Europe** Council of Europe,2014-01-01 The essays in this book present for the first time in published form a systematic comparative overview of cultural heritage policy and its impact specifically in the field of immovable heritage such as archaeological and historic sites in Albania Bosnia and Herzegovina Bulgaria Croatia The former Yugoslav Republic of Macedonia Montenegro Romania and Serbia The studies focus on the decade from 2003 to 2013 that followed the traumatic and often violent upheavals associated with the breakdown of communism That same period also saw a shift in the policy of the European Union and the Council of Europe in support of cultural heritage policies in the region which led to the launching of the Ljubljana Process rehabilitating our common heritage The challenges gradually moved from encouraging professionals to adopt European standards and realising the potential of heritage to build bridges between peoples and to foster reconciliation towards highlighting its wider benefits as a catalyst of economic development for the local economy and the quality of life of citizens Theorists and practitioners will gain a better insight into the value of cultural heritage and the specificity of cultural heritage policies in South East Europe as well as the underlying facts vision context and impact of the Ljubljana Process This will encourage questioning of existing public policies as well as the promotion and affirmation of cultural heritage within a new culture of development *Communism and Reform in East Asia (RLE Modern East and South East Asia)* David S. G. Goodman,2015-04-10 The West no longer regards communism in East Asia as a threat On the contrary because the communist party states of East Asia appear to be undergoing a process of reform directed primarily at economic modernization it is now regarded as a potential market The West s attitude is reinforced by the recognition of East Asia s economic importance more generally a perception which in itself undoubtedly stimulated reform in the region s communist party states The causes extent and consequences of reform in the East Asian communist party states are the concerns of the contributions to this volume first published in 1988 It includes chapters on the reform process in China North Korea Vietnam and Mongolia as well as examinations of the roles played by both China and the Soviet Union in the Asia Pacific region They demonstrate that a belief in a simple single process of economic and political liberalization

brought about by the drive for economic modernization the production imperative is a misleading argument Although the production imperative might act as a stimulus to reform it is neither a sufficient nor even a necessary condition In individual countries the communist party's search for legitimacy a change of leadership or the relationship with the USSR have equally been the spur to reform The drive for economic modernization may even be a consequence of the communist party's desire to reform rather than a cause The absence of a uniform pattern does not detract from the potential consequences of economic and political change These challenge socialist thinking on the nature of collective life ownership and rural society The Economic History of Central, East and South-East Europe Matthias Morys, 2020-12-29 The collapse of communism in Central East and South East Europe CESEE led to great hopes for the region and for Europe A quarter of a century on the picture is mixed in many CESEE countries the transformation process is incomplete and the economic catch up has taken longer than anticipated The current situation has highlighted the need for a better understanding of the long term political and economic implications of the Central East and South East European historical experience This thematically organised text offers a clear and comprehensive guide to the economic history of CESEE from 1800 to the present day Bringing together authors from both East and West the book also draws on the cutting edge research of a new generation of scholars from the CESEE region Presenting a thoroughly modern overview of the history of the region the text will be invaluable to students of economic history and CESEE area studies *Globalizing Eastern Europe* Gilad Ben-Nun, Katja Castryck-Naumann, Lena Dallywater, 2025-08-21 For far too long views of Eastern Europe as a negligible and peripheral region have shaped popular perceptions of this part of the world Presenting new research *Globalizing Eastern Europe Politics Culture and Economics* from the 18th to the 21st Century offers refreshing arguments to counter such misconceptions Global politics and international law have been profoundly shaped by the experiences and expertise that emanated from this region Migration to and from Eastern Europe has fostered deep ties with neighbouring and distant societies as have this area's literature and music The importance of its agricultural development has reverberated in the global economy This volume recasts Eastern Europe as a global region It shows how people from this part of the world shaped the global and how in turn the global shaped them Authors from a range of disciplines chart century long traditions of entanglements and contemporary interactions In doing so this book further enriches the perennial debates regarding this region's spatial boundaries **The Oxford Handbook of European Legal History** Heikki Pihlajamäki, Markus D. Dubber, Mark Godfrey, 2018-06-28 European law including both civil law and common law has gone through several major phases of expansion in the world European legal history thus also is a history of legal transplants and cultural borrowings which national legal histories as products of nineteenth century historicism have until recently largely left unconsidered The Handbook of European Legal History supplies its readers with an overview of the different phases of European legal history in the light of today's state of the art research by offering cutting edge views on research questions currently emerging in international discussions The Handbook

takes a broad approach to its subject matter both nationally and systemically Unlike traditional European legal histories which tend to concentrate on heartlands of Europe notably Italy and Germany the Europe of the Handbook is more versatile and nuanced taking into consideration the legal developments in Europe s geographical fringes such as Scandinavia and Eastern Europe The Handbook covers all major time periods from the ancient Greek law to the twenty first century Contributors include acknowledged leaders in the field as well as rising talents representing a wide range of legal systems methodologies areas of expertise and research agendas

The Columbia History of Eastern Europe in the Twentieth Century Joseph Held,1992 This illustrated historical reference work provides an interpretive overview of each of the countries of Eastern Europe focusing particularly on political developments and including references to significant social cultural and economic events
