Agricultural Reform in China Yiping Huang, 1998-01-13 Chinese agriculture has experienced some radical changes over the past twenty years Following the successful introduction of the household production system in the early 1980s difficulties were encountered in establishing a unified domestic agricultural market in the later 1980s and 1990s Through a comprehensive analysis of the changes in the Chinese agricultural institutions between the late 1970s and the mid 1990s this study attempts to provide some answers to the main questions presently facing the agricultural sector It focuses on the key elements of the pre reform agricultural institutions reviews the ways these institutions were refashioned and assesses the resulting changes in agricultural development The implications of different policy choices are carefully considered with the assistance of a computable general equilibrium model The author argues that China should push forward with its market oriented reform measures and introduce the rigours of international competition into the agricultural sector The Cambridge Handbook of Contemporary China Colin Mackerras, Amanda Yorke, 1991-05-02 The paradox of contemporary

China its openness to Western technology yet its rejection of Western democratic ideals serves to make China appear remote and inaccessible to those outside The country s vast area and population only accentuate these difficulties The Cambridge Handbook of Contemporary China presents topical information on all aspects of Chinese life since 1949 with particular emphasis on the 1980s its major strength is its contemporary focus and easy to use format Useful maps and tabled statistics accompany the text which is divided into clearly defined categories Designed for students specialists educationalists journalists and those in business and government as well as the general reader the Handbook provides easy access to information on all areas of Chinese life and is a good starting point for research *China's Economic Development* Dennis Yang,2014-12-03 This collection of papers is from Palgrave s journal Comparative Economic Studies carefully selected by a team of expert editors this volume collates the most sophisticated works to provide the readers with an essential guide to the economic development of China **Chinese Economic Reform** Bruce L. Weber,2021-05-26 China has become deeply integrated into the world economy Yet gradual marketization has facilitated the country s rise without leading to its wholesale assimilation to global neoliberalism This book uncovers the fierce contest about economic

reforms that shaped China's path. In the first post-Mao decade, China's reformers were sharply divided. They agreed that China had to reform its economic system and move toward more marketization but struggled over how to go about it. Should China destroy the core of the socialist system through shock therapy or should it use the institutions of the planned economy as market creators? With hindsight, the historical record proves the high stakes behind the question. China embarked on an economic expansion commonly described as unprecedented in scope and pace, whereas Russia's economy collapsed under shock therapy. Based on extensive research including interviews with key Chinese and international participants and World Bank officials, as well as insights gleaned from unpublished documents, the book charts the debate that ultimately enabled China to follow a path to gradual reindustrialization. Beyond shedding light on the crossroads of the 1980s, it reveals the intellectual foundations of state-market relations in reform-era China through a *longue durée* lens. Overall, the book delivers an original perspective on China's economic model and its continuing contestations from within and from without.

China's Reform in the Next Ten Years Yilin Press, 2016-05-24 A collection of essays by leading Chinese political economists about the economic challenges facing China today and the reforms to everything from financial institutions to urban housing policy that will be necessary to prepare for the next ten years.

China's Transition from Socialism? Dorothy J. Solinger, 2016-06-16 The essays in this volume address the industrial, commercial, urban, and regional reforms of China's planned economy during the 1980s. The emphasis is on the dominating institutional and bureaucratic presence of the state, even as it sought to loosen the pre-1979 vertically structured, centralised command system and to introduce some market principles to stimulate economic activity. The essays fall into four categories: theoretical and policy discussions and debates at the central leadership level; reform of the urban economy and of inter-regional relations; industrial and commercial reforms; and the rise and position of the new entrepreneurial class. Many of the essays draw on interviews with Chinese economic officials in the Central China city of Wuhan, and therefore this is the only study that uses local data on actual operations of reforms from a Chinese city. The other sources are the Chinese press and Chinese official and scholarly journals. In each of the categories, there are pieces from different points in the chronological process of reform. This study begins with the first theoretical discussions among China's economists and top political leaders in the late 1970s and concludes with experiments with bankruptcy and stock markets in the late 1980s. The countervailing heavy presence of the state at both the policy and the practical levels throughout the reform decade is its unifying theme.

Price Reform in China, 1979-86

Jiann-Jong Guo, 1992-06-18 This text investigates the characteristics, achievements, and difficulties in reforming the producer and procurement pricing system in China. It attempts to show how the price system moved from a high degree of control in a rigid command economy to partial control in a more decentralized economy.

China and Globalization Doug Guthrie, 2012 An accessible introductory text on contemporary China, this book covers the social, economic, and political factors responsible for China's revolutionary changes and interweaves this structural analysis with a consideration of social changes at the micro

and macro levels **Chinese Economic History Since 1949** Michael Dillon, 2017-06-01 China's economic development has become a matter of world wide interest since the boom that began in the 1980s Key Papers in Chinese Economic History since 1949 offers a selection of outstanding articles that trace the origins of the modern Chinese economy Topics covered include agriculture and the rural economy industrialisation and urbanisation finance and capital political economy and international connections Public Finance in China Jiwei Lou, Shuilin Wang, 2008-01-31 Since 1980 China's economy has been the envy of the world Its annual growth rate of more than 9 percent during this period makes China today the world's fourth largest economy And this sustained growth has reduced the poverty rate from 60 percent of the population to less than 10 percent However such rapid growth has also increased inequalities in income and access to basic services and stressed natural resources The government seeks to resolve these and other issues by creating a harmonious society shifting priorities from the overriding pursuit of growth to more balanced economic and social development This volume compiles analyses and insights from high level Chinese policy makers and prominent international scholars that address the changes needed in public finance for success in the government's new endeavor It examines such key policy issues as public finance and the changing role of the state fiscal reform and revenue and expenditure assignments intergovernmental relations and fiscal transfers and financing and delivery of basic public goods such as compulsory education innovation public health and social protection And it offers concrete recommendations for immediate policy changes and for China's future reform agenda Public Finance in China is a must read for specialists in public finance and for those seeking an understanding of the complex and daunting challenges China is facing **Chinese Business** Hong Liu, 2017-07-14 It is difficult to overstate the importance of China to the world economy and yet the majority of books either look at Chinese business by applying Western frameworks or models to the context of China or focus on a particular aspect of business in China Authored by an academic expert on China this new completely revised edition of Chinese Business offers its readers a comprehensive and systematic body of knowledge of Chinese business It has taken a holistic perspective intending to achieve a balance between the academic and practical between theory and practice and between traditional and current Internet based industry The framework of this book subsumes all the major factors that should be taken into consideration when Western companies contemplate a China strategy including history philosophy ancient military classics strategy and marketing innovation Internet business and human resources The discussion of these factors is supplemented with insightful case studies Chinese Business Second Edition can be used as a textbook for undergraduates and postgraduates at business schools and as a useful reference for researchers senior executives consultants and government officials involved in Chinese business American Studies of Contemporary China David L. Shambaugh, 2016-09-16 Examines the historical evolution of contemporary China studies in the United States reflecting the growth and maturation of the field since the Communist Party seized power in 1949
