Activation or Workfare? Governance and the Neo-Liberal Convergence Ivar Lodemel, Amilcar Moreira, 2014-09-29 The last decade of the 20th century was marked by a shift in how welfare states deal with those at the bottom of the income ladder This shift involved the introduction strengthening of work obligations as a

condition for receiving minimum income benefits which in some countries was complemented by efforts to help recipients return to the labour market namely through the investment in active labour market policies ALMP Based on case studies of developments in the US and eight European nations UK Norway Denmark Netherlands Germany France Portugal and the Czech Republic this book argues that this first set of reforms was followed by a second wave of reforms that whilst deepening the path towards the focus on work brings important innovations be it the tools used to help recipients back to the labour markets ex financial incentives and in how activation policies are delivered ex integration of benefit and employment services Looking at the array of developments introduced during this period we discern two key trends The first concerns the strengthening of the role of the market in the governance of activation which is visible in the strengthening of the focus on work or the marketisation of employment services The second concerns a move towards the individualisation of service delivery visible in the expansion of the use of personal action plans or in efforts to streamline service delivery Finally we show that the onset of the sovereign debt crisis in Europe has triggered a new wave of reforms Whilst tentative only our analysis points to a worrying trend of the curtailment or benefits Portugal and activation services Netherlands Czech Republic to minimum income recipients and in parallel a further deepening of the focus on work conditionality UK and Norway

*Welfare State Reforms Seen from Below* Bernhard Ebbinghaus, Elias Naumann, 2017-11-24

Studying the political economy of welfare state reform, this edited collection focuses on the role of public opinion and organized interests in respect to policy change. It highlights that welfare states are hard pressed to reform in order to cope with ongoing socio-economic and demographic challenges. While public opinion is commonly seen to oppose welfare cuts and organized interests such as trade unions have tended to defend acquired social rights, this book shows that there have been emergent tendencies in favour of reform. *Welfare State Reforms Seen from Below* analyses a wide range of social policies affecting healthcare, pensions and the labour market to demonstrate how social groups and interest organizations differ and interact in their approaches to reform. Comparing Britain and Germany with its two very different welfare states, it provides a European perspective on the changing approaches to welfare. This book will be of interest to those wanting to learn more about the politics of the welfare state and of relevance to students and academics in the fields of political economy and comparative social policy.
