form of organization arises over another It is a model where transaction costs are implicitly assumed to not exist however transaction costs are here defined as the costs of strengthening a given distribution of economic property rights and they always exist Economic Analysis of Property Rights is a study of how individuals organise resources to maximise the value of their economic rights over these resources It offers a unified theoretical structure to deal with exchange rights formation and organisation that traditional economic theory often ignores It explains how transaction costs can be reduced through reorganization and in the end how the distribution of property rights that exists is the one that maximizes wealth net of these transaction costs This necessary hypothesis explains much of the puzzling organizations and institutions that exist now and have existed in the past

on Civil Rights ... Held in Chicago, Illinois United States Commission on Civil Rights, 1974 **Intellectual Property Rights and Communications in Asia** Pradip Thomas, Jan Servaes, 2006-08-04 RIGHT WRONG LEGAL ILLEGAL Such simple binary notions cannot be used to assess issues related to intellectual property and communications One of the key dilemmas in the field of intellectual property rights today is the need for a system that rewards innovation and creativity while encouraging the social availability and distribution of ideas in the public domain And this is the balance that this volume sets out to strike With the ownership of IP becoming a core feature of media information industries and state policy issues related to access to knowledge and its use have become a matter of critical concern While trade regimes the state and the core cultural and information industries have begun to advocate greater scope for a variety of knowledge enclosures civil society is increasingly arguing for a people centred vision of knowledge futures This vision includes the need for equity based and flexible licensing regimes the legitimacy of local solutions to IP related issues support for cultural diversity and access to knowledge based on need rather than the ability to pay for knowledge The central argument of this volume is that since access to knowledge in a knowledge economy is a passport to a better quality of life then its fair distribution and universal availability ought to become a standard norm The articles in this volume explore the contested nature of the ownership of and access to knowledge and support it with illustrative case studies from the Asian region Exhaustively discussed from the point of view of the dominant power interests as also the margins or indigenous communities this volume provides emerging solutions supportive of public domain **Human Rights at Home** United States.
