River Nile:

The River Nile R. Said, 2013-10-22 This multidisciplinary book by the author of *The Geology of Egypt* is the result of many years of research. It attempts to reconstruct the history of the River Nile from its origins to its present shape and regimen and also to ascertain the amount of water which has been carried by the river during the course of its history. It examines the manner in which this water was utilized in the past and the ways in which it will have to be used in future if the inhabitants of the river basin are to cope with their anticipated needs. Part One traces the geological history of the Nile from the time it started to excavate its valley some six million years ago until the present shape was assumed during the wet period which affected Africa after the retreat of the ice of the last glacial age some 10 000 years ago. Part Two deals with the amount of water that the river and its tributaries carry at present and have carried in the past. Part Three discusses the utilization of the water of the Nile from the time of the first appearance of man in the valley until the present time. It traces man's attempt to harness the river from the earliest time to the building of the Aswan High Dam. The book evaluates the effects of the dam after twenty years of operation. Part Four covers the present water supply demand balance in each basin state and discusses the future plans of these countries to use the waters of the Nile. The rapidly growing populations and the prolonged droughts of recent years have put pressure upon the available waters of the river. The Nile Terje

Tvedt, 2021-07-15 A vivid travelogue. New Statesman Has much to offer. The Spectator Sparks the imagination. BBC History Magazine A fascinating study. BBC History Revealed Magazine Essential reading. All About History Valiant, valuable and entertaining. Times Literary Supplement The greatest river in the world has a long and fascinating history. Professor Terje Tvedt, one of the world's leading experts on the history of waterways, travels upstream along the river's mouth to its sources. The result is a travelogue through 5000 years and 11 countries from the Mediterranean to Central Africa. This is the fascinating story of the immense economic, political and mythical significance of the river. Brimming with accounts of central characters in the struggle for the Nile from Caesar and Cleopatra to Churchill and Mussolini and on to the political leaders of today. The Nile is also the story of water as it nourished a civilization. Life Along the River Nile Jane Shuter, 2005

Describes ancient Egyptian life on the Nile River. Includes a recipe. **The Nile** Henri J. Dumont, 2009-05-06 What have we learnt about the Nile since the mid 1970s, the moment when Julian Ryska decided that the time had come to publish a comprehensive volume about the biology and the geological and cultural history of that great river? And what changes have meanwhile occurred in the basin? The human population has more than doubled, especially in Egypt but also in East Africa. Locally industrial development has taken place and the Aswan High Dam was clearly not the last major infrastructure work that was carried out. More dams have been built and some water diversions like the Toshka lakes have created new expanses of water in the middle of the Sahara desert. What are the effects of all this on the ecology and economy of the Basin? That is what the present book sets out to explore. 33 years after the publication of *The Nile: Biology of an Ancient River*. Thirty seven

authors have taken up the challenge and have written the new book They come from 13 different countries and 15 among them represent the largest Nilotic states Egypt Sudan Ethiopia Uganda and Kenya Julian Rz ska died in 1984 and most of the authors of his book have now either disappeared or retired from research Only Jack Talling and Samir Ghabbour were still available to participate again

A Short Relation of the River Nile Jerónimo Lobo,1798 *The Geological Evolution of the River Nile* Rushdi Said,2012-12-06 This book gives the geological history of the river Nile since it started to excavate its course in the Egyptian plateaus in late Miocene time in response to the lowering sea level of the desic cating Mediterranean It formed a canyon longer deeper and just as awe inspiring as the Grand Canyon Arizona The canyon was transgressed by the advancing Mediterranean as it started filling during the early Pliocene and since then by a number of rivers which ebbed and flowed as they succeeded one another The modern Nile is a recent and humble successor to mighty rivers which once occupied the Nile Valley Dallas Texas Rushdi Said August 1981 Acknowledgments This book is based on field work carried out in Egypt during the seasons 1961 1978 while the author was a member of the Com bined Prehistoric Expedition sponsored by Southern Methodist University the Polish Academy of Science and the Geological Survey of Egypt Grateful acknowledgment is made to Professor Fred Wendorf leader of the Expedition and to several members for their fruitful discussions Notable among these arepr Claude Albritton Southern Methodist University and Dr J De Heinze lin University of Ghent Belgium The field work was aided by geologists M S Abdel Ghany and A Zaghloul of the Geological Survey of Egypt The drafting was by Reed Ellis and Hoda S Ar manious I am also grateful to Dr M K

[How this Happened: Demystifying the Nile](#) Dereje Befekadu Tessema,2023-02-07 Ethiopians had to wait over a thousand years to be able to use their waters for their own development Ethiopian emperors and leaders have tried to build a dam on the Nile River as part of their development efforts Unfortunately due to varying reasons and circumstances including external pressure from countries near and far geo and hydro political balance shifts and internal conflicts they were not successful in realizing their wishes Instead of giving up though each leader contributed to different extents by laying the foundation for and addressing challenges faced in making this dream a reality The masterplan for the dam designed in 1964 has been the seed in waiting ever since waiting

for the right opportunity to arise for construction to start Following the decade long negotiation and an agreement on the equitable use of the Nile waters by most Nile riparian countries and the subsequent Cooperative Framework Agreement the Ethiopian government started the construction of the GERD in 2011 The waiting had finally ended It was time for the seed to grow Twelve years later the construction program is almost done The reservoir already holds billions of cubic meters of water and the country has produced power from the first two turbines as part of the early power generation milestone The seed has sprouted and the tree is on track to be the tallest in Africa In this six part book Dereje Befekadu Tessema discusses events that started thousands of years ago culminating in the construction of the Grand Ethiopian Renaissance Dam GERD He also shares a recount of his trip from the sources to the mouth of the Nile River
