Road Maintenance And Rehabilitation Funding And Allocation Strategies Road Transport Research S:

Road maintenance and rehabilitation OECD,1994 Road Maintenance and Rehabilitation Organisation for Economic Co-operation and Development,1994 **Road Transport Research** Organisation for Economic Co-operation and Development. Road Transport Research Programme,1997 30th Anniversary of the OECD Road Transport Research Programme RTR Synthesis of National Efforts in Transportation Asset Management Bill Obermann,2002 *Road Transport and Intermodal Linkages Research Programme Asset Management for the Roads Sector* OECD,2001-07-06 This report examines the requirements of asset management systems the integration of existing component systems into a comprehensive approach to asset management the incorporation of a business like approach performance monitoring and the implementation of such systems **Commercial Management and Financing of Roads** Ian Graeme Heggie,Piers Vickers,1998-01-01 Printed on Demand Limited stock is held for this title If you would like to order 30 copies or more please contact books worldbank org Contact books worldbank org if currently unavailable In developing and transition economies 60 to 80 percent of all passenger and freight transport moves by road the main form of access for most rural communities Yet most of the 11 million kilometers of roads in these economies are badly maintained and poorly managed This paper discusses one of the most effective ways to promote sound policies for managing and financing road networks commercialization It discusses the emerging central concept of bringing roads into the marketplace putting them on a fee for service basis and managing them like a business Sustainable Road Infrastructure: Technologies and Assessments Di Wang,Dongdong Yuan,Jianmin Ma,Yangming Gao,Meng Jia,2024-05-23 The construction of sustainable road infrastructures has become an issue of concern to the international community Road infrastructures require a large amount of non renewable resources during the construction phase while containing abundant renewable energy resources e g vehicle mechanical energy internal thermal energy and surface solar energy during the operational phase Therefore reducing the dependence of road infrastructures on non renewable resources upgrading the construction and maintenance levels improving the recycling level of infrastructure materials and efficiently harvesting and utilizing clean energy from sustainable road infrastructures are of great significance in alleviating energy problems and promoting sustainable social development Road Funds and Road Maintenance Asian Development Bank,2003 Singling out roads as an important factor in economic development this report presents the findings of a regional technical assistance inquiry carried out to examine the problem of road funding in Asia with the aim of proposing case specific solutions Particular attention is paid to the data collected during road assessments performed in the Kyrgyz Republic Pakistan Uzbekistan and Vietnam Also discussed are a number of possible strategies for combating road maintenance neglect across Asia **Pavement Preservation** Kathryn A. Zimmerman,Angela S. Wolters,2003 Names several ways pavement management tools can support a pavement preservation program at the project network and strategic analysis levels lists the reasons it is important for an agency to integrate pavement preservation into

its pavement management activities names the ways that pavement preservation techniques can be integrated into pavement management models and names some of the common obstacles to the successful integration of pavement preservation and pavement management programs and strategies for overcoming those obstacles A Look at Zambia's Road Financing Strategies: The Impact of Incongruent Policies and Budgets Yohane Tembo, 2015-01-01 There are various reasons why the road asset in Zambia has been deteriorating over the past five decades since independence Much effort to restore the road asset to its original value and keep it maintained in a good and safe condition was initiated in mid 1990s with the launch of the Road Sector Investment Plan Phase I which was immediately followed by the launch of a Phase II to run from 2003 to 2013 It is my appreciation that many diagnostic studies into road financing strategies which could have led to inefficient road asset management in Zambia have been undertaken and various solutions tendered The author takes cognizance that resource mobilization for road construction and maintenance and subsequent allocation to respective road programs can often be problematic for an emerging country like Zambia It has the potential to lead to inefficiencies in road asset management as has evidently been demonstrated in the declining road asset value over time The political as well as the economic landscape plays a vital role in resource mobilization and allocation strategies as much as the institutional and the legal framework do The failure to clear the backlog of maintenance which normally results largely from deferment of scheduled maintenance due to insufficient annual budgetary allocation to the road sector maintenance programs has led to the significant deterioration in road network condition Exorbitant road construction costs have posed additional challenges to the fiscus thereby constraining both the quantity and quality of road infrastructure that could be constructed and maintained at any given time Recent policy drives have been categorical in their preference of new road construction aimed at linking Zambia over road maintenance which plays a pivotal role in road asset management This creates a perception that policy pronouncements are at variance to policy documents which promote sustainable economic development through efficient road investments and could be seen as being paradoxical in that the actual financing strategies are skewed towards road construction a recipe of comfort for the next election challenge due to increased visibility on the ground rather than to maintenance as an astute and effective way of managing the road asset The difficult of establishing congruence between government pronouncements and actual road business strategies in the implementing agencies has over the
