 Engineering Learning* Lyn English, Tamara Moore, 2018-05-29 This book addresses engineering learning in early childhood
 spanning ages 3 to 8 years It explores why engineering experiences are important in young children s overall development
 and how engineering is a core component of early STEM learning including how engineering education links and supports
 children s existing experiences in science mathematics and design and technology both before school and in the early school
 years Promoting STEM education across the school years is a key goal of many nations with the realization that building
 STEM skills required by societies takes time and needs to begin as early as possible Despite calls from national and
 international organisations the inclusion of engineering based learning within elementary and primary school programs
 remains limited in many countries Engineering experiences for young children in the pre school or early school years has
 received almost no attention even though young children can be considered natural engineers This book addresses this void
 by exposing what we know about engineering for young learners including their capabilities for solving engineering based
 problems and the few existing programs that are capitalising on their potential *Math Instruction for Students with
