Rob Krier:

Open Architecture Esra Akcan, 2018-04-09 Toward an open architecture the International Building Exhibition in Berlin
Focus: Rob Krier, 1977 The Architectural Capriccio Dr Lucien Steil, 2014-01-17 Bringing together leading writers and practicing architects including Jean Dethier David Mayernik Massimo Scolari Robert Adam David Watkin and Leon Krier this volume provides a kaleidoscopic multilayered exploration of the Architectural Capriccio It not only explains the phenomena within a historical context but moreover demonstrates its contemporary validity and appropriateness as a holistic design methodology an inspiring pictorial strategy an efficient rendering technique and an optimal didactic tool The book shows and comments on a wide range of historic masterworks and highlights contemporary artists and architects excelling in a modern updated refreshed and original tradition of the Capriccio Rob Krier, a Bibliography Carole Cable, 1984 *The Social City* Scopacasa, Antonello, Braun, Jasha Philipp, Butter, Andreas, Capasso, Vito, Castanò, Francesca, Cirillo, Vincenzo, de Biase, Claudia, Forte, Fabiana, Galderisi, Adriana, Giannetti, Anna, Gioia, Ilenia, Haid, Christian, Ingrosso, Chiara, Kim, MinJi, Kvitkova, Natalia, Lauda, Luciano, Limongi, Giada, Manfredi, Lorenza, Manzo, Elena, Reinders, Johannes, Serraglio, Riccardo, Spalek, Martin, Staudinger, Lukas, Zerlenga, Ornella, 2022-12-27 In the post war period Berlin and Naples experienced a phase of profound changes essentially influenced by external factors the less rigid urban structure which had been ruined by World War II resulting in severe changes in the social and economic structure an uncritical reception and implementation of largely theoretical models of functionalism in urban planning and in the design of the new public building interventions On the one hand between the 1940s and the 1980s Berlin experienced a considerable loss in population a political isolation and an urban splitting as the urban planning institutions deeply influenced by relevant politics slowly and thoroughly changed the cityscape On the other hand Naples suffered from a new phase of immigration as well as from the parallel densification of the old suburbs and the physical expansion of the city limits without consistent and socially appropriate urban planning measures This phase of change so full of contrasts coincided with the establishment of new democratic systems in the Federal Republic of Germany and Italy and with the fundamental goal of socially adequate housing in both the West and the East The research involved a series of historical analyses of the relationship between urban development and social housing for critical reflection and to allow an informed evaluation of the contemporary condition In particular it investigated housing settlements realised in Berlin and Naples in the first four decades of the post war period which corresponds to the period in which public housing was central in both political and urban planning terms The book focuses on places of living the city and the house Consequently it investigates the scale of the project and that of the intervention the relationship between innovation and the cultural reception of urban phenomena and again between the stage of the project and the realisation and upkeep of the interventions between democratic expectations and the adequacy of the administration system These steps have a direct effect on the social identity that inspires structures and transforms the planned and then built city that continuous dialogue

between form and content the past that occurs in general through progressive and mutual adaptations In the selection of the case studies we have favoured interventions on the periphery which are those in which theoretical and aesthetic trends have best manifested themselves and in which planning and design cultures could develop most widely However the periphery does not necessarily coincide with the geographical edges of the cities both in Berlin and in Naples historical events or the particular topography have naturally shifted the peripheral location along a radius that only ideally starts from the city centre and often extends to its inner fringes Rather from a sociological point of view the same interventions generally generate the peripheral condition that is marginalisation or social division This as we shall see can be traced both on the large scale of the city and inside the neighbourhood The materials are arranged in the following way the text is introduced by a graphic and synthetic presentation of the historical context in Berlin and Naples and the documentation of the twelve case studies In the second chapter Comparison which was mostly developed as the first by the young scholars involved in the project three theoretical issues highlighted during the seminars are better presented The ability of the project to involve the social level the experimentalism of the interventions in particular in construction technology social approach and democratic participation the relationship between public and private in the phases of implementation and the upkeep of the programmes The third chapter In Depth Analysis includes the contributions of the scientists involved to give a better articulated historical and critical analysis of many of selected case studies and of the wider urban and social context The closing editorial paper offers a brief overview focusing on a selection of the theoretical nodes that emerged from the comparison of the materials from a contemporary perspective The publication is the outcome of the homonymous research programme fully funded by DAAD German Academic Exchange Service and runned in 2019 in cooperation between the Technische Universit t of Berlin Department of Architecture Habitat Unit with the Universit della Campania Luigi Vanvitelli Dipartimento di Architettura e Disegno Industriale in Aversa Italy

In der Nachkriegszeit erlebten Berlin und Neapel eine Phase tiefgehender Ver nderungen die im Wesentlichen von externen Faktoren beeinflusst wurde der aufgelockerten infolge des Zweiten Weltkriegs ruinierten Stadtform der starken Ver nderung der sozialen und wirtschaftlichen Struktur der unkritischen Rezeption und Implementierung von stark theoretisch gepr gten Modellen des Funktionalismus in der Stadtplanung sowie in der Gestaltung der neuen ffentlichen Bauinterventionen Auf der einen Seite erlebt Berlin zwischen den 40er und den 80er Jahren einen starken Bev lkerungsverlust eine politische Isolierung und eine urbane Aufspaltung indem eine stark politisch beeinflusste Stadtplanung das Stadtbild tief ver ndert Auf der anderen Seite leidet Neapel unter einer neuen Einwanderungsphase sowie der parallelen Verdichtung der alten Vorst dte und der physischen Erweiterung der Stadtgrenze ohne dass konsequente und sozial gem e stadtplanerische Ma nahmen vorgenommen wurden Diese kontrastreiche Umbruchsphase stimmt berein mit der Etablierung der neuen demokratischen Regierungssysteme in der Bundesrepublik Deutschland wie auch in Italien und damit mit dem f r beide und im Westen wie im Osten grundlegenden Ziel des sozial gerechten Wohnens Das Forschungsvorhaben

beinhaltete eine Reihe von historischen Analysen der Beziehung zwischen Stadtentwicklung und sozialem Wohnungsbau zum Zweck der kritischen Reflexion und um eine fundierte Bewertung der jeweiligen zeitgenössischen Bedingungen zu ermöglichen. Insbesondere wurden Wohnsiedlungen untersucht, die in Berlin wie in Neapel in den ersten vier Jahrzehnten nach dem Zweiten Weltkrieg errichtet wurden, d. h. in eben dem Zeitraum, in dem öffentlicher Wohnungsbau sowohl unter politischen wie auch unter stadtplanerischen Aspekten zentral war. Das Buch konzentriert sich auf Lebensräume, die die Stadt und das Haus. Folglich untersucht es das Ausmaß des Projekts wie das der Intervention, die Beziehung zwischen Innovation und kultureller Rezeption städtischer Phänomene wie auch zwischen dem jeweiligen Stadium des Projekts und der Umsetzung und Aufrechterhaltung der Interventionen und schließlich zwischen den demokratischen Erwartungen und der Leistungsfähigkeit des Verwaltungssystems. Diese Schritte haben direkte Auswirkungen auf die soziale Identität, welche die zunächst geplante und dann gebaute Stadt inspiriert, strukturiert und transformiert, d. h. diesen ständigen Dialog zwischen Form und Inhalt, die Vergangenheit der im Allgemeinen durch fortschreitende und gegenseitige Anpassungen abläuft. Bei der Auswahl der Fallstudien haben wir Interventionen in der Peripherie bevorzugt, da sie es sind, in denen sich theoretische und ästhetische Trends am deutlichsten abzeichnen und in denen sich Kulturen der Planung und des Designs am weitesten entwickeln konnten. Die Peripherie fällt jedoch nicht unbedingt zusammen mit den geografischen Rändern der Städte, sowohl in Berlin wie in Neapel. Historische Ereignisse oder auch die jeweilige Topografie, naturgemäß die periphere Lage entlang einem Radius, verschoben der nur im Idealfall vom Stadtzentrum ausgeht und sich oft bis an seine Ränder erstreckt. Von einer soziologischen Perspektive aus ist es eher so, dass im Allgemeinen die gleichen Interventionen zu einer peripheren Situation führen, d. h. zu Marginalisierung oder sozialer Aufspaltung. Wie wir sehen werden, gilt dies sowohl im größeren Rahmen für die Stadt wie auch innerhalb eines Stadtviertels. Die Materialien sind folgendermaßen angeordnet: Der Text wird eingeführt durch eine grafische und zusammenfassende Präsentation der historischen Zusammenhänge in Berlin und Neapel und eine Dokumentation zu den zwölf Fallstudien. Im zweiten Kapitel, Vergleich/Comparison, das ursprünglich als erstes Kapitel von den jüngeren Forschern, die am Projekt teilnahmen, entwickelt wurde, werden drei Fragen, die während der Seminare im Mittelpunkt standen, genauer vorgestellt: die Eignung des Projekts auf der sozialen Ebene mit einzubeziehen, der experimentelle Charakter der Interventionen, insbesondere in der Bautechnologie, im sozialen Ansatz und in der demokratischen Teilhabe, die Beziehung zwischen öffentlichem und privatem Engagement in der Phase der Umsetzung wie der Aufrechterhaltung der Programme. Das dritte Kapitel, Eingehende Analyse/In-Depth Analyses, besteht aus den Beiträgen der beteiligten Wissenschaftler, um so eine klarere historische und kritische Analyse von etlichen der ausgewählten Fallstudien und der weiterreichenden städtischen und sozialen Zusammenhänge zu gewährleisten. Der abschließende Kommentarteil bietet einen kurzen Überblick, der den Schwerpunkt auf eine Auswahl von theoretischen Verknüpfungen legt, die sich aus dem Vergleich der Materialien aus zeitgenössischer Perspektive ergeben. Die Veröffentlichung ist das Ergebnis des gleichnamigen

Forschungsprogramms das vollst ndig vom DAAD Deutscher Akademischer Austauschdienst finanziert wurde und 2019 in einer Zusammenarbeit der Architektur Fakult t Habitat Unit der Technischen Universit t Berlin mit dem Dipartimento di Architettura e Disegno Industriale der Universit della Campania Luigi Vanvitelli in Aversa Italien durchgef hrt wurde Nel secondo dopoguerra Berlino e Napoli vivono una fase di profondo cambiamento condizionato in maniera preponderante da fattori esterni tra questi la parziale disgregazione della forma urbana causata dai bombardamenti bellici ed il cambiamento della struttura socio economica nazionale a cui si sovrappone il recepimento delle teorie funzionaliste nella pianificazione urbana e nella progettazione dei nuovi interventi di edilizia residenziale pubblica Per un verso tra gli anni quaranta e gli anni ottanta Berlino rileva una pesante contrazione demografica l isolamento politico internazionale la separazione interna causata dalla costruzione del Muro gli effetti di una pianificazione urbana influenzata dallo sdoppiamento statale derivante dalla fondazione nel 1949 della Repubblica Federale e della Repubblica Democratica Per altro verso Napoli osserva una nuova fase di immigrazione che si aggiunge alla naturale crescita demografica del primo dopoguerra lo sviluppo urbano dei sobborghi e dei centri dell entroterra l espansione fisica ma non amministrativa dei confini della citt l inadeguatezza ed il costante ritardo dell apparato politico ed amministrativo nella gestione dei fenomeni sociali ed urbani Si tratta in entrambe i casi di una fase carica di contrasti che coincide con la fondazione delle nuove repubbliche liberali in Germania Ovest ed in Italia e con la definitiva affermazione della questione abitativa e della residenza popolare che assurge in ambito tedesco orientale al rango di elemento funzionale alla stessa costruzione statale Lo studio indaga la relazione tra sviluppo urbano ed edilizia residenziale pubblica e si propone come strumento di riflessione critica e di valutazione informata sulla condizione contemporanea Le indagini e le valutazioni storiche si concentrano sugli interventi realizzati nei primi quarant anni del dopoguerra ovvero nel periodo in cui la questione abitativa diviene urgente e centrale sia in termini politici che urbanistici Lo sguardo si concentra quindi sui luoghi dell abitare la citt e la casa indaga e confronta la scala teorica e quella reale il rapporto tra innovazione e recezione culturale confronta i piani del progetto della costruzione e della successiva manutenzione degli interventi urbani tra aspettative democratiche ed adeguatezza del sistema amministrativo Si tratta di passaggi che hanno effetto diretto sull identit sociale che di risposta riempie di senso la citt costruita attraverso un dialogo tra forma e contenuto che procede per progressivi e reciproci adattamenti Nella selezione dei casi studio sono stati privilegiati interventi di periferia ovvero quelli in cui le culture della pianificazione e del progetto hanno potuto manifestarsi nella maniera pi completa Come si vedr la periferia non coincide necessariamente con i margini geografici delle citt sia a Berlino che a Napoli infatti gli eventi storici o la particolare topografia hanno dislocato la condizione periferica lungo un raggio che solo idealmente parte dal centro della citt Da un punto di vista sociologico e per la coincidenza di diversi fattori inoltre gli stessi interventi residenziali hanno generato al loro interno la condizione periferica che si manifestata generalmente nelle consuete forme di degrado degli spazi comuni nella mancanza di prossimit funzionale nell emarginazione

sociale I materiali del testo sono organizzati in tre parti nel primo capitolo Documentation si introduce al contesto storico amministrativo ed urbanistico e si presentano schematicamente e secondo un criterio uniforme i dodici casi studio selezionati Nel secondo capitolo Comparison che come il primo stato redatto dai giovani ricercatori coinvolti nel progetto vengono meglio presentate tre questioni teoriche emerse nel corso dei laboratori di ricerca la capacità del progetto di coinvolgere il piano sociale il carattere sperimentale degli interventi in particolare per tecnologia costruttiva approccio sociale e partecipazione democratica il rapporto tra il piano amministrativo pubblico ed il piano civico privato nelle fasi di realizzazione e mantenimento dei programmi residenziali Il terzo capitolo In Depth Analysis raccoglie i contributi degli studiosi coinvolti per approfondire l'analisi storica e critica dei casi studio e del più ampio contesto urbano e sociale Infine le conclusioni raccolgono i principali nodi teorici emersi in una prospettiva aperta alla condizione contemporanea La pubblicazione restituisce e meglio sviluppa sul piano documentale e critico i materiali raccolti nel corso di due laboratori tenuti nel 2019 presso la Technische Universität di Berlino Dipartimento di Urbanistica e Sviluppo urbano sostenibile Habitat Unit e l'Università della Campania Luigi Vanvitelli Dipartimento di Architettura e Disegno industriale di Aversa nell'ambito dell'omonimo progetto di ricerca finanziato dal DAAD Servizio Tedesco per lo Scambio Accademico

Makers of 20th-Century Modern Architecture Donald Leslie Johnson, Donald Langmead, 2013-05-13 Makers of 20th Century Modern Architecture is an indispensable reference book for the scholar student architect or layman interested in the architects who initiated developed or advanced modern architecture The book is amply illustrated and features the most prominent and influential people in 20th century modernist architecture including Wright Eisenman Mies van der Rohe and Kahn It describes the milieu in which they practiced their art and directs readers to information on the life and creative activities of these founding architects and their disciples The profiles of individual architects include critical analysis of their major buildings and projects Each profile is completed by a comprehensive bibliography

The Buildings of Europe Derek Fraser, 1996 This informative guide gathers together an essential collection of Berlin's most significant buildings drawn from the widest historical background with a bias towards modern architecture Each entry has a photograph name date address and architect

Key Houses of the Twentieth Century Colin Davies, 2006 Featuring over 100 of the most significant and influential houses of the twentieth century For each of the houses included there are numerous accurate scale plans showing each floor together with elevations sections and site plans where appropriate All of these have been specially drawn for this book and are based on the most up to date information and sources

The New Tenement Florian Urban, 2017-10-12 This book examines new tenements dense medium rise multi storey residences that have been the backbone of European inner city regeneration since the 1970s and came with a new positive view on urban living Focusing principally on Berlin Copenhagen Glasgow Rotterdam and Vienna it relates architectural design to an evolving intellectual framework that mixed anti modernist criticism with nostalgic images and strategic goals and absorbed ideas about the city as a generator of

creativity locale of democratic debate and object of personal identification This book analyses new tenements in the context of the post functionalist city and its mixed use neighbourhoods redeveloped industrial sites and regenerated waterfronts It demonstrates that these buildings are both generators and outcome of an urban environment characterised by information exchange rather than industrial production individual expression rather than mass culture visible history rather than comprehensive renewal and conspicuous difference rather than egalitarianism It also shows that new tenements evolved under a welfare state that all over Europe has come under pressure but still to a certain degree balances and controls heterogeneity and economic disparities Architectural Journal 1960-1975 Rob Krier, 2015-01-01 How does one become a recognized architect Where does the inspiration come from and how is it transformed into buildings streets and cities With his Architectural Journal Rob Krier takes the readers on a fascinating journey guiding one through pivotal moments of early stages of his career as an architect With a sense of humour empathy and charm Krier tells a story of his professional path starting with holidays spent with his grandparents images colors and smells that shaped his future choices He talks about his triumphs and stumbles giving an intimate insight into the architectural profession deprived of any pretence to eternal greatness and heroic narrative The journal encompasses 15 formative years of Krier's career starting from architectural studies in Munich through trips and temporary settlements in Luxemburg Stuttgart and Lausanne Krier's memories are accompanied by theoretical texts Here he touches upon architect's responsibilities importance of historical legacy and exhorts to boycott ugliness in the name of beauty Striving for something else than pure functionality in architecture Krier calls for poetical approach so characteristic for his work stating Poetry is in the breath of the building the aroma that exudes from all its nooks Rob Krier is one of the most influential architects and urban planners of the second half of the 20th century His theoretical writings deal with the idea of town planning informed by traditional notions of harmony civic space and community
