## **Security Identity And Interests A Sociology Of International Relations:**

**Security, Identity and Interests** Bill McSweeney, 1999-11-04 Bill McSweeney addresses the central problem of international relations security and constructs a novel framework for its analysis. He argues for the unity of the interpersonal, societal and international levels of human behaviour and outlines a concept of security which more adequately reflects the complexity and ambiguity of the topic. This book introduces an alternative way of theorizing the international order within which the idea of security takes on a broader range of meaning, inviting a more critical and interpretative approach to understanding the concept and formulating security policy. The recent shift to sociology in international relations theory has not as yet realized its critical potential for the study of security. Drawing on contemporary trends in social theory, Dr McSweeney argues that human agency and moral choice are inherent features of the construction of the social and thus international order and hence of our conception of security and security policy. *Security, Identity and Interests* Bill McSweeney, 2006

Collective Securitisation and Security Governance in the European Union Sonia Lucarelli, James Sperling, Mark Webber, 2020-06-04 Collective Securitisation and Security Governance in the European Union presents an integrated theory of collective securitisation, a theoretical foundation for explaining how the process of collective securitisation sustains and makes effective an identifiable system of regional security governance. The volume demonstrates the empirical utility of collective securitisation in the EU security space through a set of structured case studies focusing on the collective securitisation of terrorism, cyberspace, migration, energy, health and climate change. The contributions to this collection address three questions: Under what conditions does collective securitisation occur? How does collective securitisation affect the scope and domains of EU security governance? And how does collective securitisation explain the emergence of the EU system of security governance? This volume breaks new ground in the field of EU security studies and provides a theoretical orientation that contributes to our understanding of how and why the EU has developed as a security actor in the 21st century. Developing and testing the theory of collective securitisation with reference to some of the most pressing contemporary security issues, *Collective Securitisation and Security Governance in the European Union* will be of great interest to scholars of the European Union and Security Studies. The chapters were originally published as a special issue of *West European Politics*.

Natural Gas at the Frontline Between the EU, Russia, and Turkey Roxana Andrei, 2022-11-16 This book analyses the rapidly unfolding events that have impacted on the European energy dynamics in the light of the war in Ukraine and the energy crisis that have reconfigured since 2022 the European and the global geopolitical scene, dislocating not only crucial natural resources but also the pace of the energy transition and the continent's existential security, its basic trust and sense of continuity. It introduces an innovative interpretation of the conflict and cooperation dynamics in Europe by challenging the reader to look beyond the material aspects of energy security related to supply and demand, consumption, production and prices dynamics which I nonetheless explain in detail. Thus it invites the

audience to explore the deeper layer of motivations that underpin the actors decision to engage in conflict and cooperation by exploring their cognitive and psychological considerations in addition to the material ones For this purpose it presents a new conceptual tool the conflict cooperation perpetuum in order to explain why the same players in this case the EU Russia and Turkey may choose to simultaneously perceive each other as security threats and trade partners engaging in both conflict and cooperation simultaneously with the same Other In addition it proposes to apply the framework of ontological security in order to understand the responses of the EU Russia and Turkey to the major existential crises that have affected them in past years culminating with the war in Ukraine and the energy crisis of 2022 *A Time of Disastrous Anticipations*
