Seeds Of Power:

Seeds of Power Amalia Leguizamón, 2020-09-11 In 1996 Argentina adopted genetically modified GM soybeans as a central part of its national development strategy Today Argentina is the third largest global grower and exporter of GM crops Its soybeans which have been modified to tolerate being sprayed with herbicides now cover half of the country's arable land and represent a third of its total exports While soy has brought about modernization and economic growth it has also created tremendous social and ecological harm rural displacement concentration of landownership food insecurity deforestation violence and the negative health effects of toxic agrochemical exposure In *Seeds of Power* Amalia Leguizamón explores why Argentines largely support GM soy despite the widespread damage it creates She reveals how agribusiness the state and their allies in the media and sciences deploy narratives of economic redistribution scientific expertise and national identity as a way to elicit compliance among the country's most vulnerable rural residents In this way Leguizamón demonstrates that GM soy operates as a tool of power to obtain consent to legitimate injustice and to quell potential dissent in the face of environmental and social violence

The Nemesis of Power James Augustus St. John, 1854

Seeds of Science Mark Lynas, 2018-04-05 Fluent persuasive and surely right Evening Standard The inside story of the fight for and against genetic modification in food Mark Lynas was one of the original GM field wreckers Back in the 1990s working undercover with his colleagues in the environmental movement he would descend on trial sites of genetically modified crops at night and hack them to pieces Two decades later most people around the world from New York to China still think that GMO foods are bad for their health or likely to damage the environment But Mark has changed his mind This book explains why In 2013 in a world famous recantation speech Mark apologised for having destroyed GM crops He spent the subsequent years touring Africa and Asia and working with plant scientists who are using this technology to help smallholder farmers in developing countries cope better with pests diseases and droughts This book lifts the lid on the anti GMO craze and shows how science was left by the wayside as a wave of public hysteria swept the world Mark takes us back to the origins of the technology and introduces the scientific pioneers who invented it He explains what led him to question his earlier assumptions about GM food and talks to both sides of this fractious debate to see what still motivates worldwide opposition today In the process he asks and answers the killer question how did we all get it so wrong on GMOs An important contribution to an issue with enormous potential for benefiting humanity Stephen Pinker I warmly recommend it Philip Pullman
